"With *How to Make Your Money Last*, you will learn how to turn your retirement savings into a steady paycheck that will last for life. Today, people worry that they're going to run out of money in their older age. That won't happen if you use a few tricks for squeezing higher payments from your assets--from your Social Security account (find the hidden values there), pension (monthly income or lump sum?), home equity (sell and invest the proceeds or take a reverse mortgage?), savings (should you buy a lifetime annuity?), and retirement accounts (how to invest and--critically--how much to withdraw from your savings each year?). The right moves will not only raise the amount you have to spend, they'll

stretch out your money over many more years. You will also learn to look at your savings and investments in a new way. If you stick with super-safe choices the money might not last. You need safe money to help pay the bills in your early retirement years. But to ensure that you'll still have spending money 10 and 20 years from now, you have to invest for growth, today. Quinn shows you how. At a time when people are living longer, yet retiring with a smaller pot of savings than they'd hoped for, this book will become the essential guide"--

The Cliff-Dwellers (Historical Novel) SAGE

Dominated by men and bound by the restrictive Hays Code, postwar Hollywood offered little support for a female director who sought to make unique films on controversial subjects. But Ida Lupino bucked the system, writing and directing a string of movies that exposed the dark underside of American society, on topics such as rape, polio, unwed motherhood, bigamy, exploitative sports, and serial murder. The first in-depth study devoted to Lupino's directorial work, this book makes a strong case for her as a trailblazing feminist auteur, a filmmaker with a clear signature style and an abiding interest in depicting the plights of postwar American women. Ida Lupino, Director not only examines her work as a cinematic auteur, but also offers a serious consideration of her diverse and long-ranging career, getting her start in Hollywood as an actress in her teens and twenties, directing her first films in her early thirties, and later working as an acclaimed director of television westerns, sitcoms, and suspense dramas. It also demonstrates how Lupino fused generic elements of film noir and the social problem film to create a distinctive directorial style that was both highly

expressionistic and grittily realistic. Ida Lupino, Director thus shines a long-awaited spotlight on one of our greatest filmmakers.

Chromatic Cinema Amphoto Books

Chromatic Cinema Color permeates film and its history, but study of its contribution to film has so far been fragmentary. Chromatic Cinema provides the first wide-ranging historical overview of screen color, exploring the changing uses and meanings of color in moving images, from hand painting in early skirt dance films to current trends in digital color manipulation. In this richly illustrated study, Richard Misek offers both a history and a theory of screen color. He argues that cinematic color emerged from, defined itself in response to, and has evolved in symbiosis with black and white. Exploring the technological, cultural, economic, and artistic factors that have defined this evolving symbiosis, Misek provides an in-depth yet accessible account of color's spread through, and ultimate effacement of, black-and-white cinema.

Part of the exclusive new CAEZIK Notable line of books. In the 1960's, before anyone had even conceived of the concept of virtual reality, before computers were even in main-stream thought, Daniel F. Galouye imagined the unimaginable. In doing so, he wrote one of the most influential science fiction books of the day, and one that continues to not only influence modern writers but continues to resonate with science fiction readers everywhere. He conceived of a world that exists only virtually...one of the first stories about virtual reality. This is *Matrix*, decades before *Matrix* was conceived. Douglas Hall is part of a team that builds an artificial environment to simulate reality. This enables them to get public opinion polls without waiting for the opinions of people around them. But then something goes terribly wrong and his partners on the program start disappearing. But is it a simulated disappearance, or is someone out to get them all? And what is the true nature of reality?
