Celebrated Weekends World Scientific
Volumes include: Statutory record.
Long Range Acquisition Estimates
Rowman & Littlefield
Containing roughly 850 entries about
Spanish-language literature throughout
the world, this expansive work provides

coverage of the varied countries,
ethnicities, time periods, literary
movements, and genres of these
writings. Providing a thorough
introduction to Spanish-language
literature worldwide and across time is a
tall order. However, World Literature in
Spanish: An Encyclopedia contains
roughly 850 entries on both major and
minor authors, themes, genres, and
topics of Spanish literature from the

Middle Ages to the present day, affording an amazingly comprehensive reference collection in a single work. This encyclopedia describes the growing diversity within national borders, the increasing interdependence among nations, and the myriad impacts of Spanish literature across the globe. All countries that produce literature in Spanish in Europe, Africa, the Americas, and Asia are represented, covering both canonical authors and emerging contemporary writers and trends. Underrepresented writings—such as texts by women writers, queer and Afro-Hispanic texts, children's literature, and works on relevant but less studied topics such as sports and nationalism—also appear. While writings throughout the centuries are covered, those of the 20th

and 21st centuries receive special consideration.

Marine Mussels Springer

A comprehensive volume providing broad and detailed coverage of marine mussels *Marine Mussels: Ecology, Physiology, Genetics and Culture* provides readers with in-depth, fully up-to-date information on all major aspects of marine mussels. Written by an internationally renowned expert in the field, this authoritative volume addresses morphology, ecology, feeding, phylogeny and evolution, reproduction and larval development, settlement and recruitment, genetics, disease, management of culture systems and more. The book encompasses many different species of marine mussels: genus *Mytilus*, other important

commercial marine genera such as *Perna*, *Aulacomya* and *Choromytilus*, and non-commercial genera including *Modiolus*, *Geukensia*, *Brachidontes* and hydrothermal vent *Bathymodiolus*. Comprising twelve extensively cross-referenced chapters, the book discusses a diversity of integrated topics that range from fundamental physiology of marine mussels to new techniques being applied in their biology and ecology. Author Elizabeth Gosling reviews contemporary developments and issues in the field such as the use of DNA genetic markers in detecting and diagnosing different strains of pathogenic bacteria, the use of mussels as monitors of marine contaminants, sophisticated modelling techniques that simulate disease and forecast outbreaks,

and the impacts of global warming, ocean acidification and hypoxia on marine mussels. Presenting an inclusive, highly detailed treatment of mussel biology, physiology, genetics, and culture, this invaluable resource: Contains thorough descriptions of external and internal anatomy, global and local distribution patterns, the impacts of mussels on marine ecosystems, and the processes of circulation, respiration, excretion and osmoregulation Reflects significant advances in mussel science and new areas of research in marine mussels Describes the fundamentals of mussel aquaculture, the types and levels of contaminants in the marine environment and new approaches for sustainable aquaculture development Discusses the

application of genetic methods, population genetics, global breeding programmes and the emerging area of bivalve genomics Addresses the role of mussels in disease transmission to humans, including production and processing controls, regulation of monitoring and quality control Marine Mussels: Ecology, Physiology, Genetics and Culture is essential reading for biological scientists, researchers, instructors and advanced students in the fields of biology, ecology, aquaculture, environmental science, toxicology, genetics, pathology, taxonomy and public health.

Handbook of Rock Art Research

Bloomsbury Publishing USA

The physical properties associated with the saturated and trans fats obtained

through partial hydrogenation of vegetable oils (PHVOs) provide the solid fat content, melting and textural properties that consumers require in food products like butter, margarines, vegetable creams, spreads, and confectionary fats. However, saturated and trans fats increase low density lipoprotein, while trans fats also lower high-density lipoprotein serum levels. These indicators increase the risk of developing cardiovascular disease, type II diabetes, stroke, and have recently been associated with metabolic syndrome. Consequently, regulatory agencies worldwide have passed legislation restricting the addition of PHVOs and their derivatives (i.e., shortenings) to food products. This has lead research groups worldwide to

investigate different mechanisms to provide structural and physical properties to edible, healthy unsaturated oils. The overall objective is to achieve similar functional properties to those provided by PHVOs and shortenings to food products. This book encompasses the work of leading researchers discussing, from a scientific and technological perspective, the latest and most innovative approaches to structure edible oils without the use of trans fats. Additionally, the authors discuss practical uses and technical limitations associated with the use of "structured edible oils" in different food systems. Appealing to researchers and professionals working in lipid science, food chemistry and fat metabolism, it fills the gap in the literature for a book in

this fast-changing field.

Applied Artificial Intelligence Thomas Nelson

CHOICE Highly Recommended, Sept 2022 Oceanography and Marine Biology: An Annual Review remains one of the most cited sources in marine science and oceanography. The ever-increasing interest in work in oceanography and marine biology and its relevance to global environmental issues, especially global climate change and its impacts, creates a demand for authoritative refereed reviews summarizing and synthesizing the results of recent research. For nearly 60 years, OMBAR has been an essential reference for research workers and students in all fields of marine science. This volume considers such diverse topics as the

Great Barrier Reef Expedition of 1928-29, Mediterranean marine caves, macromedusae in eastern boundary currents, marine biodiversity in Korea, and development of a geo-ecological carbonate reef system model to predict responses of reefs to climate change. Volume 59 is available to read Open Access on the Taylor & Francis eBooks site (<https://www.taylorfrancis.com/books//10.1201/9781003138846>) An international Editorial Board ensures global relevance and expert peer review, with editors from Australia, Canada, Hong Kong, Ireland, Singapore and the United Kingdom. The series volumes find a place in the libraries of not only marine laboratories and oceanographic institutes, but also universities

worldwide. If you are interested in submitting a review for consideration for publication in OMBAR, please email the Editor in Chief, Stephen Hawkins, at S.J.Hawkins@soton.ac.uk.

"For the contemporary film audience, science fiction has become a key locus for displaying-and imaginatively addressing-its most pressing concerns. Those concerns increasingly surface not just as displaced subjects, injected into

conventional sf narratives, but as inflections in the very nature of the genre. We might describe these issues that bulk so large in our everyday world as angling into the world of science and technology, becoming a kind of slant presence in the genre, and in the process altering the thrust of our sf films and other screen media, resulting in what seems like a proliferation of sub-genre labels that mark off a substantially "new" group of sf cinemas. These cinemas challenge us to view or "read" them differently, from perspectives that are just coming into focus. Through an introductory overview and series of articles on various of these contemporary "slants" and the theories that drive them, this volume offers a guide to both what the new sf cinemas

are about and how we have come to think about or "read" them differently. In the process, it also links these fragments of the constantly growing sf supertext to our changing sense of how genres function as a process, marked by consistent growth and evolution, and discussed in ways that reflect contemporary culture's own constant changes"--

While there has always been a large public interest in ancient pictures painted or carved on stone, the archaeological study of rock art is in its infancy. But intensive amounts of research has revolutionized this field in the past decade. New methods of dating and analysis help to pinpoint the makers of these beautiful images, new interpretive models help us understand this art in relation to culture.

Identification, conservation and management of rock art sites have become major issues in historical preservation worldwide. And the number of archaeologically attested sites has mushroomed. In this handbook, the leading researchers in the rock art area

provide cogent, state-of-the-art summaries of the technical, interpretive, and regional advances in rock art research. The book offers a comprehensive, basic reference of current information on key topics over six continents for archaeologists, anthropologists, art historians, and rock art enthusiasts.

State Yellow Book CRC Press

To find the real Puerto Rico a€" the one that shopping malls and condos have yet to reach a€" head for the towns and villages of the Cordillera Central, or Central Mountains. Bisected by the Ruta Panoramica (Scenic Route), the mountains provide a relaxing getaway with an atmosphere so unlike the coast that it feels like an entirely different island. The Ruta PanorAmica is a driving

adventure covering more than a hundred miles of countryside, including coffee plantations, old JA-baro country and four forests: Carite, Toro Negro, Guilarte and Maricao. Along the route are valleys, canyons, wide-open terraces and views of the Atlantic and the Caribbean. Visitors who don't have time to do the whole Ruta PanorAmica might consider a driving tour starting out from San Juan to the San Cristobal canyon in Aibonito, returning via Barranquitas a€" easily doable in a day if you start out early. Or take a few days to enjoy secluded swimming holes, hiking trails, cloud forest and the hospitality of the mountain locals. This guide tells you everything about the region: where to stay & eat, what to see & do, how to get around, the history & culture, the fiestas

& the cuisine. Filled with maps & photos. Royal Society of Chemistry Handbook of Numerical Methods for Hyperbolic Problems explores the changes that have taken place in the past few decades regarding literature in the design, analysis and application of various numerical algorithms for solving hyperbolic equations. This volume provides concise summaries from experts in different types of algorithms, so that readers can find a variety of algorithms under different situations and readily understand their relative advantages and limitations. Provides detailed, cutting-edge background explanations of existing algorithms and their analysis Ideal for readers working on the theoretical aspects of algorithm development and its numerical analysis

Presents a method of different algorithms for specific applications and the relative advantages and limitations of different algorithms for engineers or readers involved in applications Written by leading subject experts in each field who provide breadth and depth of content coverage

This second volume details the continued spread of Muslim culture and peoples during the sixteenth, seventeenth and eighteenth centuries, a period that saw the height of the powerful Ottoman, Safavid and Mughal empires, followed by their precipitous decline. The contributions of Muslims to the development of Western civilization continue to be highlighted in this

chronology, most notably the impact of the Ottoman Empire on Western art and literature and its role in creating an environment in which the Protestant Reformation could take root. This volume reveals the interconnectedness of the Muslim, Jewish, African and European diasporas during this period.

Location Directory BRILL

A horrific crime that defies explanation, a rookie FBI agent in uncharted territory, and an extraordinary hero for the ages: an investigation spirals out of control in this heart-pounding thriller. Odessa Hardwicke's life is derailed when she's forced to turn her gun on her partner, Walt Leppo, a decorated FBI agent who turns suddenly, inexplicably violent while apprehending a rampaging murderer. The shooting, justified by self-defense,

shakes the young FBI agent to her core. Devastated, Odessa is placed on desk leave pending a full investigation. But what most troubles Odessa isn't the tragedy itself -- it's the shadowy presence she thought she saw fleeing the deceased agent's body after his death. Questioning her future with the FBI and her sanity, Hardwicke accepts a low-level assignment to clear out the belongings of a retired agent in the New York office. What she finds there will put her on the trail of a mysterious figure named Hugo Blackwood, a man of enormous means who claims to have been alive for centuries, and who is either an unhinged lunatic, or humanity's best and only defense against unspeakable evil. From the authors who brought you The Strain Trilogy comes a

strange, terrifying, and darkly wondrous world of suspense, mystery, and literary horror. The Hollow Ones is a chilling, spell-binding tale, a hauntingly original new fable from Academy Award-winning director Guillermo del Toro and bestselling author Chuck Hogan featuring their most fascinating character yet.

Fodor's South America John Wiley & Sons Veteran travel writer Mark Seal was tired of buying disappointing travel guides. He wanted insider information about special travel destinations—the kind of tips you'd get from the locals or people who know all the best and hippest places—like celebrities. Sixteen years and a few hundred interviews later, Seal's Celebrated Weekend feature articles—city-by-city, star-by-star

investigations of the coolest places to eat, sleep, and see—have enlightened and entertained countless passengers reading American Way, American Airlines' onboard magazine. And here's the best of the best, published for the first time in one place! Inside you'll . . . Raft down roaring rivers in Kevin Costner's Aspen paradise. Dine at Elizabeth Hurley's must-try Paris bistros and brasseries. Hang in the New Orleans jazz clubs where Harry Connick Jr. grew up. Shop at Penélope Cruz's clothing boutique in Madrid. Check into the landmark Philadelphia hotel where Kevin Bacon has stayed. Grab a burger in the New York saloon that Brooke Shields has frequented since childhood. Tucked in between the essential are tantalizing insider stories from today's most

exciting stars? told in their own words. It's like having your closest friend tell you all the best places to go. Whether you're a serious world explorer or an armchair traveler, Celebrated Weekends has everything you need to know to enjoy the most thrilling cities in the world.

 Oceanography and Marine Biology: An Annual Review, Volume 59

The classic reference work that provides annually updated information on the countries of the world.

The Statesman's Year-Book Oxford University Press

This volume presents the proceedings of the CLAIB 2016, held in Bucaramanga, Santander, Colombia, 26, 27 & 28 October 2016. The proceedings, presented by the Regional Council of Biomedical Engineering for Latin America (CORAL), offer research findings, experiences and activities between institutions and universities to develop Bioengineering, Biomedical Engineering and related sciences. The conferences of the American Congress of Biomedical Engineering are sponsored by the International Federation for Medical and Biological Engineering (IFMBE), Society

for Engineering in Biology and Medicine (EMBS) and the Pan American Health Organization (PAHO), among other organizations and international agencies to bring together scientists, academics and biomedical engineers in Latin America and other continents in an environment conducive to exchange and professional growth.

Cabinet of Curiosities Fodor's FLINS, originally an acronym for Fuzzy

Logic and Intelligent Technologies in Nuclear Science, is now extended to Applied Artificial Intelligence for Applied Research. The contributions to the seventh in the series of FLINS conferences contained in this volume cover state-of-the-art research and development in applied artificial intelligence for applied research in general and for power/nuclear engineering in particular.
