"Art Under Control in North Korea is the first publication in the West to explore the role of art in one of the world's most isolated nations. This timely publication places North Korean art in its historical, political and social contexts, discusses the state system of producing, employing, promoting and honouring artists, and examines the range of art produced, from painting and calligraphy to architecture and applied art. Jane Portal also compares the control exerted over artists by North Korean leaders to that of other absolute dictatorships, and looks at the way in which archaeology has been employed for political ends to justify the present leadership and its lineage."--BOOK JACKET.

Korea boasts a ceramics history that dates back 10,000 years. It is distinguished by its infinite embrace of nature. Through a continued mutual exchange with China, Korea developed a ceramics style that captured the Korean spirit. The uniqueness of Korean ceramics stems from the austere humility of the earthenware, the jade-green color of Goryeo celadon, the wit of

Joseon buncheong ware and the refined beauty of Joseon white porcelain.

This special issue presents discussions of the role and meaning of religion for Korean society. Covering wide-ranging time periods, the authors explore with their own cases four major characteristics of Korean religion: Creativity, Greater Responsiveness, Adaptability, and Prophethood. Their topical religious traditions include Neo-Confucianism, Christianity, Buddhism, and Korean new religious movements. HarperCollins

Argues that the virtual nature of much environmental science and the application of non-science principles such as the precautionary principle facilitate the virtuous corruption of environmental science. This book illustrates that the problem is widespread than this area alone would suggest and is common in the important field of climate science.

NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT--OVERSTOCK SALE -- Significantly reduced list price This edition of *North Korea: A Country Study* replaces the previous edition, published in 1994. Like its predecessor, this study attempts to review the history and treat in a concise manner the dominant social, political, economic, and military aspects of contemporary North Korea. Sources of information included books, scholarly journals, foreign and domestic newspapers, official reports of governments and international organizations, and numerous periodicals and Web sites on Korean and East Asian affairs. A word of caution is necessary, however. Even though more information is forthcoming from and about North Korea since it became a member of the United Nations in 1991, the government of a closed society such as that of North Korea controls information for internal

and external consumption, limiting both the scope of coverage and its dissemination. A chronology of major historical events is provided at the front of the book (see table A). Chapter bibliographies appear at the end of the book, and brief comments on some of the more valuable and enduring sources recommended for further reading appear at the end of each chapter. A glossary also is included. Spellings of place-names in the book are in most cases those approved by the U.S. Board on Geographic Names (BGN); spellings of some of the names, however, cannot be verified, as the BGN itself notes. Readers of this book are alerted that because the BGN recognizes the Sea of Japan as the formal name of the body of water to the east of the Korean Peninsula, this book also uses that term.. Similarly, the Yellow Sea is identified as the West Sea. The McCune-Reischauer system of transliteration has been employed except for the names of some prominent national and historical figures. Thus, Kim Il-song is rendered as Kim Il Sung, and Kim Chong-il is rendered as Kim Jong Il. The names of Korean authors writing in English are spelled as given in the original publication. Measurements are given in the metric system. A conversion table (see table B) is provided to assist readers who are unfamiliar with metric measurements. Other related items: Foreign Countries collection can be found here: <https://bookstore.gpo.gov/catalog/international-foreign-affairs/foreign-country-studies> The body of the text reflects information available as of August 1, 2007. Certain other parts of the text, however, have been updated: the Chronology and Introduction discuss significant events that have occurred since the completion of research, and

the Country Profile and portions of some chapters include updated information as available.

Colonial Legacies BRILL

Imagine a land where all the animals are free . . . To the creatures of the woodland, the land of Animalia sounds like a dream - a tropical island where all the animals live in harmony. They are over-shadowed by a much more evil community; the polluted Megatropolis, whose dirty skyscrapers block the horizon. And then one day, Wirral the Squirrel's woodland is destroyed by developers and he is thrown into the nightmare world of Megatropolis. But Wirral believes in Animalia and he joins with Froggo, a world-class amphibian balloonist, and Wilhamina, a girl squirrel, to lead the enslaved animals of the city to a new life. So begins an exciting adventure through the mean streets of Megatropolis, over the sea and through the sky. Developed out of an exceptional fusion of creative talents, this story explodes onto every page. The plot is fast, furious and funny; the illustrations are full of rich depth and colour; and the characters live on long after you have turned the final page. It will delight children of all ages and is sure to become an enduring classic. 'Young audiences will delight in the clever wordplay and smartly-drawn comic characters.' As millions of women and girls left country towns to generate Korea's manufacturing boom, the factory girl emerged as an archetypal figure in twentieth-century popular culture. This book explores the factory girl in Korean literature from the 1920s to the 1990s, showing the complex ways in which she has embodied the sexual and class violence of industrial life.

This open access book explores the histories and geographies of fishing in North Korea and the surrounding nations. With the ideological and environmental history of North Korea in mind, the book examines the complex interactions between local communities, fish themselves, wider ecosystems and the politics of Pyongyang through the lens of critical geography, fisheries statistics and management science as well as North Korean and more generally Korean and East Asian studies. There is increasing global interest in North Korea, its politics, people and landscapes, and as such, this book describes encounters

with North Korean fishing communities, as well as unusual moments in the field in the People's Republic of China, the Russian Federation and the Republic of Korea (South Korea). It addresses fish, fishing infrastructure, fishing science and fishing statistics and other non-human elements of North Korean and other nations' developmental regimes as actors and participants within them as much as humans and their technologies. The book enables readers to gain extensive insights into the aspirations and practices of fishing in North Korea and its neighbours, the navigation of difficult political and developmental situations and changing ecological realities in a time of environmental and climate crisis familiar to many across the globe.

This is a dictionary of Cebuano Visayan, the language of the central part of the Philippines and much of Mindanao.

Although the explanations are given in English, the aim of this work is not to provide English equivalents but to explain Cebuano forms in terms of themselves. It is meant as a reference work for Cebuano speakers and as a tool for students of the Cebuano language. There is a total of some 25,000 entries and an addenda of 700 forms which were prepared after the dictionary had been composed. This dictionary is the product of eleven years work by more than a hundred persons. The work was edited by John Wolff but the sources are entirely native, and all illustrations are composed by native speakers. To date, this work probably represents the most authoritative dictionary of the Cebuano Visayan language.

Cannabis: Evolution and Ethnobotany is

a comprehensive, interdisciplinary exploration of the natural origins and early evolution of this famous plant, highlighting its historic role in the development of human societies.

Cannabis has long been prized for the strong and durable fiber in its stalks, its edible and oil-rich seeds, and the psychoactive and medicinal compounds produced by its female flowers. The culturally valuable and often irreplaceable goods derived from cannabis deeply influenced the commercial, medical, ritual, and religious practices of cultures throughout the ages, and human desire for these commodities directed the evolution of the plant toward its contemporary varieties. As interest in cannabis grows and public debate over its many uses rises, this book will help us understand why humanity continues to rely on this plant and adapts it to suit our needs.

Rules of the House offers a dynamic revisionist account of the Japanese colonial rule of Korea (1910–1945) by examining the roles of women in the civil courts.

Challenging the dominant view that women were victimized by the Japanese family laws and its patriarchal biases, Sungyun Lim argues that Korean women had to struggle equally against Korean patriarchal interests. Moreover, women

were not passive victims; instead, they proactively struggled to expand their rights by participating in the Japanese colonial legal system. In turn, the Japanese doctrine of promoting progressive legal rights would prove advantageous to them. Following female plaintiffs and their civil disputes from the precolonial Choson dynasty through colonial times and into postcolonial reforms, this book presents a new and groundbreaking story about Korean women's legal struggles, revealing their surprising collaborative relationship with the colonial state.

The Memoirs of Lady Hyegyong

University of Notre Dame Press

It is well known that Taiwan and South Korea, both former Japanese colonies, achieved rapid growth and industrialization after 1960. The performance of former European and American colonies (Malaysia, Singapore, Burma, Vietnam, Laos, Cambodia,

Indonesia, and the Philippines) has been less impressive. Some scholars have attributed the difference to better infrastructure and greater access to education in Japan's colonies. Anne Booth examines and critiques such arguments in this ambitious comparative study of economic development in East and Southeast Asia from the beginning of the twentieth century until the 1960s. Booth takes an in-depth look at the nature and consequences of colonial policies for a wide range of factors, including the growth of export-oriented agriculture and the development of manufacturing industry. She evaluates the impact of colonial policies on the growth and diversification of the market economy and on the welfare of indigenous populations. Indicators such as educational enrollments, infant mortality rates, and crude death rates are used to compare living standards across East and Southeast Asia in the 1930s. Her analysis of the impact that Japan's Greater Asian Co-Prosperty Sphere and later invasion and conquest had on the region and the living standards of its people leads to a discussion of the painful and protracted transition to independence following Japan's defeat. Throughout Booth emphasizes the great variety of economic and social policies pursued by the various colonial governments and the diversity of outcomes. Lucidly and accessibly written, *Colonial Legacies* offers a balanced and elegantly nuanced exploration of a complex historical reality. It will be a lasting contribution to scholarship on the modern economic history of East and Southeast Asia and of special interest to those concerned with the dynamics of development and the history of colonial regimes.
