Have you reached the point in parenthood where restful sleep just feels like a delusional fantasy, one that will never be attained? Are you the parent of a baby who struggles to fall asleep every night, not being able to fall into a natural feeding and sleeping schedule? Are you so sleep deprived, that you have trouble functioning and even the slightest of inconveniences send you straight to a mental breakdown? Do you worry about your baby's health due to their extensive period of little sleep, believing that, sooner or later, it will take a toll on their overall well-being? Experiencing a lack of sleep is one of the most common and most challenging aspects of being a new parent.

But it doesn't have to remain that way. Getting enough sleep is crucial to maintaining focus throughout the day and be able to complete everyday tasks. However, in order for you to get your restful night's sleep, it all begins with getting your baby to sleep. This is a sample of what you'll discover in *Baby Sleep Training: Get Your Baby to Sleep Through the Night in 4 Easy-to-Follow Steps*: How much sleep your baby really needs How to analyze and interpret your baby's cries, taking the guesswork out of deciphering their needs Why sleep deprivation is not something that should be taken lightly The 4-straightforward-steps you need to implement into you and your baby's lives in order to get them to soothe themselves and fall asleep on their own Free bonus- a 90-minute guided meditation to regain your sanity and find more relaxation Want to know why more than 80 percent of children experience setbacks in potty training and how to do it right? Does every time you change diapers remind you of an all-out war where your child starts hitting and kicking? Do you feel how changing 8-10 diapers every day burns a deep hole in your pockets? According to the National Diaper Bank Network, you spend about \$900 a year on diapers. Yet, you feel your stress levels rising just by thinking about potty training even though you know you have to start someday. You are not alone. In 1957, the average age to start potty training was 11 months and 90% of children were dry by the age of two. Today, it is not until the age of four that most children are reliably dry. But potty training doesn't need to be the scary battleground you think it is. If you know the right attitude, your toddler can be diaper free with no stress involved. This is a sample of what you'll discover in *The No-Stress Potty Training Solution: Everything you need to know*

**Instant Potty Training: Child-friendly Key Strategies to Help You Toilet Train Your Preschooler Quickly and Successfully** Tiny World Company

Real-world, from-the-trenches toddler parenting advice from the author of the bestselling Oh Crap! Potty Training.

Toddlers—commonly defined as children aged between two and five years old—can be a horribly misunderstood bunch. What most parents view as bad behavior is in fact just curious behavior. Toddlerdom is the age of individuation, seeking control, and above all, learning how the world works. But this misunderstanding between parents and child can lead to power struggles, tantrums, and even diminished growth and creativity. The recent push of early intellectualism coupled with a desire to “make childhood magical” has created a strange paradox—we

have three-year-olds with math and Mandarin tutors who don’t know how to dress themselves and are sitting in their own poop. We are pushing the toddler mind beyond its limit but simultaneously keeping them far below their own natural capabilities. In the frank, funny, and totally authentic Oh Crap! I Have a Toddler, social worker Jamie Glowacki helps parents work through what she considers the five essential components of raising toddlers: —Engaging the toddler mind —Working with the toddler body —Understanding and dealing with the toddler behavior —Creating a good toddler environment —You, the parent Oh Crap! I Have a Toddler is about doing more with less—and bringing real childhood back from the brink of over-scheduled, over-stimulated, helicopter parenting. With her signature down-and-dirty, friend-to-friend advice, Jamie is here to help you experience the joy of parenting again and giving your child—and yourself—the freedom to let them grow at their own pace and become who they are.
