Dubbed "The lazy man's way to easy sex and romance with 20 or more women a month," How to Become an Alpha Male is the no-risk, never-fail blueprint on how to 'magnetically' attract an endless flow of horny, ready-for-sex women to you... without ever having to play their games or deal with rejection. Sold as an ebook at AlphaMaleMethod.com, John Alexander's guide is now available, for the first time ever, as a hardcopy book. You see, once you have these secrets all the 'work' of meeting women will be done for you... automatically! You can just 'flip on' your magnetic powers of attraction... so to speak... and instantly bring sex, romance and more roaring into your life! Why does the Alpha Male Method work so well? Because it's based on the same hush-hush psychological tactics advertisers have used for centuries to get filthy rich. They work for anyone, anywhere and at any time (no matter how desperate your situation is right now).

The Truck and Coach curriculum (T&C) level 3 has been developed in keeping with the prescribed Ministry of Training, Colleges and Universities (MTCU) Training Standards, which apply to the Truck

and Coach Technician apprenticeship. The curriculum layout used provides an opportunity to cross-reference the in-school learning outcomes and content to the specific workplace Training Standards. For easy reference, a time allocation has been included for each reportable subject along with the Theory/Practical breakdown for the delivery of the Learning Content. More detailed time allocations for the instructor have been provided for each topic area to ensure consistency for each appropriate intake. The reportable subjects are Trade Practices and Auxillary Systems; Engine Systems; Electricity and Electronics; Fuel Systems; Vehicle Electronic Management and Emission Systems; Drive Trains; and Steering, Suspension and Break Systems.--Includes text from document.

Longman Scientific and Technical

Frost & Sullivan's 2014 Growth, Innovation, and Leadership Book of the Year "EXPONENTIAL ORGANIZATIONS should be required reading for anyone interested in the ways exponential technologies are reinventing best practices in business." —Ray Kurzweil, Director of Engineering at Google In business, performance is key. In performance, how you organize can be the key to

growth. In the past five years, the business world has seen the birth of a new breed of company—the Exponential Organization—that has revolutionized how a company can accelerate its growth by using technology. An ExO can eliminate the incremental, linear way traditional companies get bigger, leveraging assets like community, big data, algorithms, and new technology into achieving performance benchmarks ten times better than its peers. Three luminaries of the business world—Salim Ismail, Yuri van Geest, and Mike Malone—have researched this phenomenon and documented ten characteristics of Exponential Organizations. Here, in EXPONENTIAL ORGANIZATIONS, they walk the reader through how any company, from a startup to a multi-national, can become an ExO, streamline its performance, and grow to the next level.

"EXPONENTIAL ORGANIZATIONS is the most pivotal book in its class. Salim examines the future of organizations and offers readers his insights on the concept of Exponential Organizations, because he himself embodies the strategy, structure, culture, processes, and systems of this new breed of company." —John Hagel, The Center for the Edge Chosen by Benjamin Netanyahu, Prime Minister of Israel, to be one of Bloomberg's Best Books of 2015

*A Big Heart* New Directions Publishing

Bob Mizon, one of the world's best known campaigners against the veil of light pollution that has taken away the starry sky from most of the world's population, takes readers to a hundred places in the UK and the USA where the wonders of the night sky might still be enjoyed in perfect or near-perfect night skies. Visiting small hotels and simple campsites, and savoring vast dark-sky reserves where the night sky is actively protected, The Million-Star Hotel celebrates the black skies of yesteryear - which may become a reality for more and more of us as modern technology reins in lighting and puts it only where needed. How can you prepare for your stay beneath the stars?

What astronomy can you do during the daytime? What kind of equipment will you need? Questions such as these are answered, and if town dwellers return inspired - and, Bob hopes, also inspired to look with fresh eyes at their own local lighting - there is enough information here for them to equip themselves for some urban astronomy too.

For visitors and recent arrivals, Atlanta Rising, will serve as the essential primer on the ins and outs of the South's capital city. For natives, the book offers up a rich menu of surprising new facts and fresh insights about their own hometown.

[The Story of the Tour De France](#) Atlanta Rising

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

The Open Access version of this book, available at

<https://www.taylorfrancis.com/books/9781138125124>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. This volume addresses a crucial, yet largely unaddressed dimension of minority language standardization, namely how social actors engage with, support, negotiate, resist and even reject such processes. The focus is on social actors rather than language as a means for analysing the complexity and tensions inherent in contemporary standardization processes. By considering the perspectives and actions of people who participate in or are affected by minority language politics, the contributors aim to provide a comparative and nuanced analysis of the complexity and tensions inherent in minority language standardisation processes. Echoing Fasold (1984), this involves a shift in focus from a sociolinguistics of language to a sociolinguistics of people. The book addresses tensions that are born of the renewed or continued need to standardize 'language' in the early 21st century across the world. It proposes to go beyond the traditional macro/micro dichotomy by foregrounding the role of actors as they position themselves as users of standard forms of language, oral or written,

across sociolinguistic scales. Language policy processes can be seen as practices and ideologies in action and this volume therefore investigates how social actors in a wide range of geographical settings embrace, contribute to, resist and also reject (aspects of) minority language standardization.

Coalgebraic logic is an important research topic in the areas of concurrency theory, semantics, transition systems and modal logics. It provides a general approach to modeling systems, allowing us to apply important results from coalgebras, universal algebra and category theory in novel ways. Stochastic systems provide important tools for systems modeling, and recent work shows that categorical reasoning may lead to new insights, previously not available in a purely probabilistic setting. This book combines coalgebraic reasoning, stochastic systems and logics. It provides an insight into the principles of coalgebraic logic from a categorical point of view, and applies these systems to interpretations of stochastic coalgebraic logics, which include well-known modal logics and continuous time branching logics. The author introduces stochastic systems together with their probabilistic and categorical foundations and gives a comprehensive discussion of the Giry monad as the underlying categorical construction, presenting many new, hitherto unpublished results. He discusses modal logics, introduces their probabilistic interpretations, and then proceeds to an analysis of Kripke models for coalgebraic logics. The book will be of interest to researchers in theoretical computer science, logic and category theory.

The bestselling book that the New York Times hailed as "a highly readable and substantial guide to the grown-up realms of money and business," Get a Financial Life is a must-read for anyone in their twenties and thirties (or beyond) who wants to understand the basics of personal finance. If you've been meaning to get your finances in shape but have no idea where to start, this is your playbook. Get a Financial Life busts open the system, teaching tricks for becoming master of your own money universe. No matter what's happening in the economy, all the guidance you need is right here. You'll learn how to: • Pay off your credit cards and student loans and live debt free • Start saving, even if you're living paycheck to paycheck • Take advantage of the latest tax rules and save a bundle • Find smart investments while still supporting socially responsible companies • Come up with a down payment and buy a home, even in a tough economy • Afford grad school • Protect yourself from identity theft And you'll discover why a 401(k) is your best friend—in boom times and even if the market is tanking. From tracking your spending to finding deals on insurance to navigating the new world of homebuying, this easy-to-understand, comprehensive guide provides an up-to-date road map of the world of personal finance. Whether you earn \$30,000 or \$300,000, are single or married, are drowning in debt or just looking for ways to keep your savings secure in uncertain times, you'll find the answers you need in Get a Financial Life. "A daring book....A life's worth of smart financial advice" (Newsweek).

**Greg LeMond** Routledge

A stunning new collection by one of Iraq's brightest poetic voices The Iraqi Nights is the third collection by the acclaimed Iraqi poet Dunya Mikhail. Taking The One Thousand and One Nights as her central theme, Mikhail personifies the role of Scheherazade the storyteller, saving herself through her tales. The nights are endless, seemingly as dark as war in this haunting collection, seemingly as endless as war. Yet the poet cannot stop dreaming of a future beyond the violence of a place where "every moment / something ordinary / will happen under the sun." Unlike Scheherazade, however, Mikhail is writing, not to escape death, but to summon the strength to endure. Inhabiting the emotive spaces between Iraq and the U.S., Mikhail infuses those harsh realms with a deep poetic intimacy. The author's vivid illustrations — inspired by Sumerian tablets — are threaded throughout this powerful book.

[Finding a Million-Star Hotel](#) Taylor Trade Publishing

"Greg LeMond was Lance Armstrong before Lance Armstrong . . . the story of a true hero . . . This

is a must read if you believe in miracles."—John Feinstein, New York Times–bestselling author In July 1986, Greg LeMond stunned the sporting world by becoming the first American to win the Tour de France, the world's pre-eminent bicycle race, defeating French cycling legend Bernard Hinault. Nine months later, LeMond lay in a hospital bed, his life in peril after a hunting accident, his career as a bicycle racer seemingly over. And yet, barely two years after this crisis, LeMond mounted a comeback almost without parallel in professional sports. In summer 1989, he again won the Tour—arguably the world's most grueling athletic contest—by the almost impossibly narrow margin of 8 seconds over another French legend, Laurent Fignon. It remains the closest Tour de France in history. "[A] blend of chaos, kindness and cruelty typifies the scenes that journalist de Visé brings to life in this sympathetic-verging-on-reverential retelling of LeMond's trailblazing career (first American to enter the tour, first to win it) . . . As an author in quest of his protagonist's motivation, [de Visé] subjects it to extreme torque."—The Washington Post "A great book . . . Well written and thoroughly researched . . . Engrossing and hard to put down. If you're a Greg LeMond fan, The Comeback is a must read because it's a detailed accounting of his career and—more importantly—his life and person off the bike. It's also an important reminder that American cycling did not begin and end with Lance Armstrong."—PEZ

[Radiomics and Radiogenomics in Neuro-oncology](#) Diversion Books

A complete history of first 100 years of black cast movie posters. Stunning images. From world's leading archive.

[The Comeback](#) Springer Nature

A simple reader especially for young Asians learning English, interacting with culturally familiar images to explore some concepts of opposites.

Bloomsbury Publishing

This book constitutes the proceedings of the First International Workshop on Radiomics and Radiogenomics in Neuro-oncology, RNO-AI 2019, which was held in conjunction with MICCAI in Shenzhen, China, in October 2019. The 10 full papers presented in this volume were carefully reviewed and selected from 15 submissions. They deal with the development of tools that can automate the analysis and synthesis of neuro-oncologic imaging.

[Make Hay whilst the Sun shines.](#) [Song.] Simon and Schuster

A brilliant poetic exploration of language and gender, place, and time, seen through the mirror of exile In Her Feminine Sign follows on the heels of Dunya Mikhail's devastating account of Daesh kidnappings and killings of Yazidi women in Iraq, The Beekeeper. It is the first book she has written in both Arabic and English, a process she talks about in her preface, saying "The poet is at home in both texts, yet she remains a stranger." With a subtle simplicity and disquieting humor reminiscent of Wislawa Szymborska and an unadorned lyricism wholly her own, Mikhail shifts between her childhood in Baghdad and her present life in Detroit, between Ground Zero and a mass grave, between a game of chess and a flamingo. At the heart of the book is the symbol of the tied circle, the Arabic suffix taa-marbuta—a circle with two dots above it that determines a feminine word, or sign. This tied circle transforms into the moon, a stone that binds friendship, birdsong over ruins, three kidnapped women, and a hymn to Nisaba, the goddess of writing. A section of "Iraqi haiku" unfolds like Sumerian symbols carved onto clay tablets, transmuted into the stuff of our ordinary, daily life. In another poem, Mikhail defines the Sumerian word for freedom, Ama-ar-gi, as "what seeps out / from the dead into our dreams."
