*Popular Science Monthly* Inkshares  
 Why do 'Jaws', 'Field of Dreams', 'The Big Lebowski', and 'The Godfather' remain strikingly popular in this age of fragmented audiences and ever-faster spin cycles? "Hollywood Blockbusters:

The Anthropology of Popular Movies" argues that these films continue to captivate audiences because they play upon underlying tensions and problems in American culture, much like the myths that anthropologists study in non-Western contexts. In making this argument, the authors employ and extend anthropological theories about ritual, kinship, gift giving, power, egalitarianism, literacy, metalinguistics, stereotypes, and the mysteries of the Other. The results - original insights into modern film classics, American culture, and anthropological theory - will appeal to students of Film, Media, Anthropology, Sociology, and Cultural Studies.  
*Popular Science*  
 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
