Custom LASIK: Surgical Techniques and Complications is the most comprehensive resource on LASIK currently available. This new edition of LASIK: Surgical Techniques and Complications has been revised and updated to include the latest in wavefront technology, new microkeratome instruments, and the most recent surgical procedures, in addition to various complex cases and complications. The collaboration of Drs. Buratto and Brint, along with a team of international surgeons, have produced a complete text specifically to improve the quality of vision. Amateur surgeons benefit from the format in which basic surgical procedures are explained. Advanced laser procedure with ablations and intralase without the blade are more advanced techniques specifically detailed to assist the expert surgeon. The scope of this new edition is designed to provide the multitude of LASIK techniques that have emerged and the technological advancements that have made them possible. With over 1,000 color illustrations demonstrating the various

procedures and concepts, readers are able to develop a more thorough understanding of LASIK. These images supplement the wealth of surgical strategies presented throughout this resource. [Point of Care Ultrasound for Emergency Medicine and Resuscitation](#) Springer
 Kanski's Clinical Ophthalmology: A Systematic Approach is the classic specialty text providing the perfect ophthalmology foundation for trainees through to experienced practitioners. The famous visually dynamic and succinct format enables easy comprehension and focused guidance in the diagnosis and management of ophthalmic disorders. Build the ultimate foundation in ophthalmology with this market-leading resource. Benefit from guidance on examination, imaging, and the recognition of systemic conditions associated with ocular disease. Completely revised by award-winning ophthalmic educator Brad Bowling, the eighth edition reflects the latest advances, making this an indispensable resource to enhance learning, aid exam preparation and guide clinical practice. Designed for rapid reference and efficient recall, the concise but comprehensive chapters use crisp targeted text, bulleted lists, tables, and visual aids to highlight salient points across all ophthalmology subspecialties. Features detailed updates on key evolving topics such as the spectrum of macular disease, with many new disorders added to this edition across a range of

subspecialties. Increased emphasis on practical investigation and management. Includes 2,600 illustrations, images and artworks, with over 900 brand new for this edition, including ultra wide-field imaging, fundus autofluorescence, and high-resolution OCT. Consult this title on your favourite e-reader.

[Drug-induced Ocular Side Effects and Drug Interactions](#) Elsevier Health Sciences

Providing practical advice on home treatments, this accessible guide explains what can be done to relieve symptoms and, if possible, clear up the problem for many common medical conditions. Illustrated with step-by-step photographs, this book's well-rounded approach includes practical techniques, preventive measures, complementary remedies, and conventional medical treatments for use in the home. An integrated approach to health is increasingly popular among doctors and patients, and Home Doctor helps you use all of the information available to treat many common conditions at home. Practical and easy-to-use, it includes over one-hundred-and-fifty common symptoms, illnesses, and injuries with advice on when you can treat them safely and effectively and when to call a doctor. With basic first-aid procedures as well as a quick A-Z reference covering over-the-counter drugs and natural remedies, it's like having your own in-home healthcare

provider 24/7.

[Chemistry and Biology of Hyaluronan](#) Humana Press

Written by experts in the field, this comprehensive resource offers valuable information on the practical uses of drugs in primary eye care. Discussions of the pharmacology of ocular drugs such as anti-infective agents, anti-glaucoma drugs, and anti-allergy drugs lead to more in-depth information on ocular drugs used to treat a variety of disorders, including diseases of the eyelids, corneal diseases, ocular infections, and glaucoma. The book also covers ocular toxicology, focusing on drug interactions, ocular effects of systemic drugs, and life-threatening systemic emergencies. [Allogeneic Stem Cell Transplantation](#) Elsevier Health Sciences

This is a comprehensive textbook addressing the unique aspects of drug development for ophthalmic use. Beginning with a perspective on anatomy and physiology of the eye, the book provides a critical appraisal of principles that underlie ocular drug product development. The coverage encompasses topical and intraocular formulations, small molecules and biologics (including protein and gene therapies), conventional formulations (including solutions, suspensions, and emulsions), novel formulations (including nanoparticles, microparticles, and hydrogels), devices, and specialty products. Critical elements such as pharmacokinetics, influence of formulation technologies and ingredients, as well as impact of disease conditions on products development are addressed. Products intended for both the front and the back of the eye are discussed with an eye towards future advances. @font-face {font-family:"Cambria Math"; panose-1:2 4 5 3 5 4 6 3 2 4; mso-font-charset:0; mso-generic-font-family:roman; mso-font-pitch:variable; mso-font-signature:3 0 0 1 0;}@font-face {font-family:Calibri; panose-1:2 15 5 2 2 4 3 2 4; mso-font-charset:0; mso-generic-font-family:swiss; mso-font-pitch:variable; mso-font-signature:-469750017 -1073732485 9 0 511 0;}p.MsoNormal, li.MsoNormal, div.MsoNormal {mso-style-unhide:no; mso-style-qformat:yes; mso-style-parent:""; margin:0cm; mso-pagination:widow-orphan; font-size:12.0pt; font-family:"Times New Roman",serif; mso-foreast-font-family:Calibri; mso-foreast-theme-font:minor-latin; mso-ansi-language:EN-US; mso-foreast-language:EN-US;} .MsoChpDefault {mso-style-type:export-only; mso-default-props:yes; font-family:"Calibri",sans-serif; mso-ascii-font-family:Calibri; mso-ascii-theme-font:minor-latin; mso-foreast-font-family:Calibri; mso-foreast-theme-font:minor-latin; mso-hansi-font-family:Calibri; mso-hansi-theme-font:minor-latin; mso-bidi-font-family:"Times New Roman"; mso-bidi-theme-font:minor-bidi; mso-ansi-language:EN-US; mso-foreast-language:EN-US;}div.WordSection1 {page:WordSection1;}

This text covers both basic science and clinical aspects of the cornea and associated external diseases. In this edition the editors have incorporated relevant basic science information into the clinical science chapters. It also contains an expanded surgery section - especially refractive surgery. Emphasis on the third edition is on clinical information (the basic science has been incorporated into the clinical chapters). The clinical section has been expanded by ten per cent to reflect changes in the field.

[Ocular Allergy](#) Elsevier Health Sciences

Be ready to prescribe and administer drugs safely and effectively—and grasp all the vitals of pharmacology—with the fully updated [Pharmacotherapeutics for Advanced Practice](#), 4th edition. Written by pharmacology nursing experts, this easy-to-read text offers proven frameworks for treating more than 50 common diseases and disorders. Learn how to identify disorders, review possible therapies, then prescribe and monitor drug treatment, accurately. Based on current evidence and real-life patient scenarios, this is the perfect pharmacology learning guide and on-the-spot clinical resource. Absorb the key principles and practical methods for accurate prescribing and monitoring, with . . . NEW chapter on Parkinson's disease, osteoarthritis, and rheumatoid arthritis NEW and updated therapies, and updated and additional case studies, with sample questions NEW content on the impacts of the Affordable Care Act Updated chapters on complementary and alternative medicine (CAM) and pharmacogenomics Updated evidence-based algorithms and drug tables - Listing uses, mechanisms, adverse effects, drug interactions, contraindications, and monitoring parameters, organized by drug class; quick access to generic and trade names and dosages Quick-scan format organizes information by body system Chapter features include: Brief overview - Pathophysiology of each disorder, and relevant classes of drugs Monitoring Patient Response section - What to monitor, and when Patient Education section - Includes information on CAM for each disorder Drug Overview tables - Usual dose, contraindications and side effects, and special considerations Algorithms - Visual cues on how to

approach treatment Updated Recommended Order of Treatment tables - First-, second- and third-line drug therapies for each disorder Answers to Case Study Questions for each disorder - Strengthens critical thinking skills Selecting the Most Appropriate Agent section - The thought process for choosing an initial drug therapy Principles of Therapeutics unit - Avoiding medication errors; pharmacokinetics and pharmacodynamics; impact of drug interactions and adverse events; principles of pharmacotherapy for pediatrics, pregnancy/lactation, and geriatrics Disorders units - Pharmacotherapy for disorders in various body systems Pharmacotherapy in Health Promotion unit - Smoking cessation, immunizations, weight management Women's Health unit - Including contraception, menopause, and osteoporosis Integrative Approach to Patient Care unit - Issues to consider when presented with more than one diagnosis Standard pharmacotherapeutics text for nurse practitioners, students, and physician assistants Ancillaries - Case Study answers, multiple choice questions and answers for every chapter, PowerPoints, Acronyms List [Custom LASIK](#) JAYPEE BROTHERS MEDICAL PUBLISHERS PVT. OphthoBook is the printed version of the amazing OphthoBook.com online book and video series.

The combination of this text, along with the online video lectures, creates the most informative and easy-to-understand ophthalmology review ever written. It is geared toward medical students, optometry students, and non-ophthalmologists who want to learn more about the eye without getting bogged down with mindless detail. The book is broken down into ten chapters: 1. Eye History 2. Anatomy 3. Glaucoma 4. Retina 5. Infection 6. Neuroophthalmology 7. Pediatric Ophthalmology 8. Trauma 9. Optics 10. Lens and Cataract Each chapter also includes "pimp questions" you might be asked in a clinic. Also, an entire chapter of ophthalmology board-review questions, flashcards, and eye abbreviations. Perhaps most useful, each chapter corresponds to the 20-minute video lectures viewable at OphthoBook.com. And lots of fun cartoons!

[The Wills Eye Manual](#) Oxford Clinical Imaging Guides

Malpractice settlements are large for undetected hydroxychloroquine and chloroquine toxicity which, if untreated, can lead to permanent loss of central vision. Knowledge of the ocular toxicity of these drugs has increased during the past fifty years as their use has expanded. Hydroxychloroquine and Chloroquine Retinopathy is the first single-source book on the subject and is essential for the practicing ophthalmologists, rheumatologists, dermatologists, and internists who prescribe these drugs. It covers clinical topics such as signs and symptoms of toxicity, toxicity screening, ancillary testing, to whom and why the drugs are prescribed and dosing considerations. Additionally, the book addresses practice management considerations, including coding, reimbursement and equipment costs, and the medico-legal responsibilities of the rheumatologist and of the ophthalmologist. Guidelines for the management of hydroxychloroquine and chloroquine vary around the world and differences between the guidelines of the United Kingdom, the United States, and other countries are identified. The book concludes with a collection of case examples illustrating common clinical scenarios and their management. This book is a "must-have" resource for physicians who use these drugs.

[Handbook of Nonprescription Drugs](#) Lippincott Williams & Wilkins

Since the original publication of [Allogeneic Stem Cell Transplantation: Clinical Research and Practice](#), Allogeneic hematopoietic stem cell transplantation (HSC) has undergone several fast-paced changes. In this second edition, the editors have focused on topics relevant to evolving knowledge in the field in order to better guide clinicians in decision-making and management of their patients, as well as help lead laboratory investigators in new directions emanating from clinical observations. Some of the most respected clinicians and scientists in this discipline have responded to the recent advances in the field by providing state-of-the-art discussions addressing these topics in the second edition. The text covers the scope of human genomic variation, the methods of HLA typing and interpretation of high-resolution HLA results. Comprehensive and up-to-date, [Allogeneic Stem Cell Transplantation: Clinical Research and Practice, Second Edition](#) offers concise advice on today's best clinical practice and will be of significant benefit to all clinicians and researchers in allogeneic HSC transplantation.

[Cicatrising Conjunctivitis](#) Springer

This book presents the clinical features, invasive and non-invasive modalities of diagnosis of conjunctival and corneal infections, especially atypical clinical situations in unusual cases of keratitis, and manage the disease entity. Infections of cornea continues to be the leading cause of ocular morbidity and blindness worldwide. Early diagnosis helps in better outcome. Proper understanding of the microbiological and clinical characteristics of this disease entity enables ophthalmologists to initiate appropriate therapy. Corneal infections, especially due to uncommon

organisms, are difficult to diagnose and treat. With 17 chapters, this volume covers the entire spectrum of corneal and conjunctival infections. This is a quick go-to book for general as well as specialist ophthalmologists.

It was probably the French chemist Portes, who first reported in 1880 that the mucin in the vitreous body, which he named hyalomucine, behaved differently from other mucoids in cornea and cartilage. Fifty four years later Karl Meyer isolated a new polysaccharide from the vitreous, which he named hyaluronic acid. Today its official name is hyaluronan, and modern-day research on this polysaccharide continues to grow. Expertly written by leading scientists in the field, this book provides readers with a broad, yet detailed review of the chemistry of hyaluronan, and the role it plays in human biology and pathology. Twenty-seven chapters present a sequence leading from the chemistry and biochemistry of hyaluronan, followed by its role in various pathological conditions, to modified hyaluronans as potential therapeutic agents and finally to the functional, structural and biological properties of hyaluronidases. Chemistry and Biology of Hyaluronan covers the many interesting facets of this fascinating molecule, and all chapters are intended to reach the wider research community. Comprehensive look at the chemistry and biology of hyaluronans Essential to Chemists, Biochemists and Medical researchers Broad yet detailed review of this rapidly growing research area

During the past decade a significant international research effort has been directed towards understanding the composition and regulation of the precocular tear film. This effort has been motivated by the recognition that the tear film plays an essential role in maintaining corneal and conjunctival integrity, protecting against microbial challenge and preserving visual acuity. In addition, research has been stimulated by the knowledge that alteration or deficiency of the tear film, which occurs in countless individuals throughout the world, may lead to desiccation of the ocular surface, ulceration and perforation of the cornea, an increased incidence of infectious disease, and potentially, pronounced visual disability and blindness. 7 To promote further progress in this field of vision research, the International Conference on the Lacrimal Gland, Tear Film and Dry Eye Syndromes: Basic Science and Clinical Relevance was held in the Southampton Princess Resort in Bermuda from November 14 to 17, 1992. This meeting was designed to assess critically the current knowledge and 'state of the art' research on the structure and function of lacrimal tissue and tears in both health and disease. The goal of this conference was to provide an international exchange of information that would be of value to basic scientists involved in eye research, to physicians in the ophthalmological community, and to pharmaceutical companies with an interest in the treatment of lacrimal gland, tear film or ocular surface disorders (e. g. Sjogren's syndrome).

[Kanski's Clinical Ophthalmology E-Book](#) Hatherleigh Press

Featuring the clinical expertise of respected authorities in the field, the second edition of [Color Atlas of Ophthalmology](#) is a lavishly illustrated atlas designed to guide clinicians through the accurate diagnosis and appropriate management of the full range of ophthalmic disorders. For each disease or condition, the book provides full-color clinical photographs that are supplemented by succinct descriptions of symptoms, associated findings, differential diagnosis, and management. Features: Concise text and bullet-point format enables rapid reference and review of important topics More than 600 new high-quality illustrations and photographs depict key concepts Coverage of current medical management and surgical treatments includes discussion of the latest refractive surgery techniques and treatments for cataracts Consistent presentation throughout the book enhances ease of use This pocket-sized atlas is a valuable resource for clinicians, residents,

and students in ophthalmology, optometry, primary care, and emergency medicine.

Vitreoretinal Surgery Springer Nature

A cataract is a clouding that develops in the crystalline lens of the eye or in its envelope, varying in degree from slight to complete opacity and obstructing the passage of light. This book reviews research in the field of cataracts inclusive of the application of virtual reality in cataract surgery simulation for ophthalmology training and an analysis of the surface properties of four different intraocular lens materials currently used in cataract surgery. Also discussed, herein, is the future of cataract surgeries; disability glare effects and cataracts as a problem of road safety in driving; the pharmacological treatment of ocular inflammatory diseases; among others.

Contact Lens Complications Penguin

Dry eye is one of the most common disorders encountered in ophthalmological practice. Its symptoms cause considerable discomfort and substantially reduce the patient's quality of life. As it is a complex and multifactorial condition, research investigating dry eye is a matter of great interest all over the world. In this book, the wide range of current basic and clinical research in dry eye and correlated ocular surface diseases is presented by scientists from Germany, Austria and the USA. These renowned authors provide clear and extensive descriptions of their projects, enabling scientists and clinical ophthalmologists to quickly bring themselves up to date with cutting edge research in this field. This overview of research into the pathogenesis and clinical treatment of dry eye is a must for all ophthalmologists dealing with this syndrome and looking to

increase their knowledge base.

Research Projects in Dry Eye Syndrome Springer Science & Business Media

Updated to include the newest drugs, procedures, and treatment protocols, the Fourth Edition of this best-selling manual is a reliable quick-reference guide for all clinicians who treat eye disorders. Every disorder encountered in the office, emergency room, or hospital is covered in concise outline format: symptoms, signs, etiology, differential diagnosis, work-up, treatment, and follow-up. This edition includes many new radiologic studies, laboratory tests, diagnostic methods, surgical techniques, and medications introduced in the past five years. The Wills Eye Manual, Fourth Edition is also available electronically for PDAs. See Media listing for details.
