After falling overboard from a yacht,

Sanger Rainsford swims to a nearby island. There General Zaroff, a big-game hunter who knows of Rainsford from published accounts of his hunting snow leopards in Tibet, invites him to dinner. Zaroff is bored of hunting because it no longer challenges him; he has moved to Ship-Trap Island in order to capture shipwrecked sailors. Zaroff offers sailors a choice—should they decline to be hunted, they will be handed over to Ivan, who had once been official knouter for The Great White Czar. Rainsford denounces this as barbarism, but has no way out. He reluctantly agrees to be hunted...

NCLEX-RN Exam Elsevier Health Sciences As nurses know firsthand, the impact of psychological trauma is not limited to those who experience it. Others—including nurses and caregivers—are indirectly affected. In healthcare, patients' psychological trauma may manifest in odd, uncomfortable, or confusing behaviors. Nurses and healthcare workers must recognize that patients may be feeling unsafe or struggling with low self-esteem, anxiety, grief, loneliness, or depression born from trauma. As nurses listen to, empathize with, and sometimes grieve with the people they care for, they need to comprehend the “why” behind these feelings and actions. The Influence of Psychological Trauma in Nursing helps nurses gain awareness and knowledge

about trauma and recovery so they can heal and bring holistic healing to others. Authors Karen J. Foli and John R. Thompson provide a primer on psychological trauma, helping readers identify and understand the common forms of trauma in society. Filled with examples, tools, assessments, and learning objectives, this book helps nurses move forward as trauma-informed caregivers.

The NCLEX(R) Playbook: Winning Strategies and Test Taking Methods for NCLEX-RN Success Test Prep Books

Since the late 1970s when Congressman Claude Pepper held widely publicized hearings on the mistreatment of the elderly, policy makers and practitioners have sought ways to protect older Americans from physical, psychological, and financial abuse. Yet, during the last 20 years fewer than 50 articles have addressed the shameful problem that abusers "and sometimes the abused themselves" want to conceal. Elder Mistreatment in an Aging America takes a

giant step toward broadening our understanding of the mistreatment of the elderly and recommends specific research and funding strategies that can be used to deepen it. The book includes a discussion of the conceptual, methodological, and logistical issues needed to create a solid research base as well as the ethical concerns that must be considered when working with older subjects. It also looks at problems in determination of a report's reliability and the role of physicians, EMTs, and others who are among the first to recognize situations of mistreatment. *Elder Mistreatment in an Aging America* will be of interest to anyone concerned about the elderly and ways to intervene when abuse is suspected, including family members, caregivers, and advocates for the elderly. It will also be of interest to researchers, research sponsors, and policy makers who need to know how to advance our knowledge of this problem.
