MATHEWS

United States of America V. Cerone
Bloomsbury Publishing
USA

Author Will Bevis claims he found The Stone/Lee Civil War Papers described within seven years ago, while trespassing near midnight, at Jefferson's Rock, a small national park near Harpers Ferry, West Virginia. He also claims his life has been threatened over these papers which he says expose the greatest lie that the American people have ever been told and which they still believe today: that the South lost the Civil War. He says that the Federal Government quickly tried to obtain these papers through threats but that he gave them to a well

known Atlanta businessman who promised to make them public--but who then double-crossed him. The one thing he has never said is that this work is a work of fiction. He claims that no one would publish it as non-fiction, and that he finally gave up hopes of ever doing so. Bevis states he decided it was better to publish this as fiction than for the public never to hear of it at all. Here then are the Stone/Lee Civil War papers. Do they expose the Greatest Civil War Lie ever told the American people? Or are they themselves the greatest Civil War lie ever told?

Case on Appeal

Springer

This comprehensive and highly readable collection of essays

highlights 50 important events that changed the course of American history. What Happened? An Encyclopedia of Events That Changed America Forever is designed to introduce beginning U.S. history students and lay readers to the most significant events in the nation's history. More than that, it also will give readers insight into why a particular event is important. This book consists of 50 chapters in four volumes, each dealing with a critically important event in American history from the 17th century to the present. Each chapter includes a factual essay on the subject prepared by John Findling or Frank Thackeray. The factual material is augmented with an interpretive

essay on the same subject, written by a specialist in the field. Through this juxtaposition, readers can learn not only about the who, what, and where of an event, but also why it is important in the sweep of American history. *Nomination of Thomas J. Meskill to be United States Circuit Judge* DIANE Publishing
In 1950, the Committee on Political Parties of the American Political Science Association (APSA) published its much-anticipated report, *Toward a More Responsible Two-Party System*. Highly critical of the existing state of affairs, the report became extremely controversial: before publication, scholars attacked the committee's draft and

suggested it should be suppressed. When released it received a barrage of criticisms. Most academics concluded it was an ill-conceived and mistaken initiative. Mark Wickham-Jones provides the first full, archival-based assessment of the arguments within APSA about political parties and the 1950 report. He details the report's failure to generate wider discussion between media, politicians, and the White House. He examines whether it was dominated by a dogmatic attachment to "party government," and charts the relationship between behavioralists and institutionalists. He also discusses the political dimension to research during the

McCarthyite years, and reflects on the nature of American political science in the years after 1945, the period in which behavioralism (which privileges the influence of individuals over institutions) became dominant. Detailing APSA's most direct and significant intervention in the political process, Wickham-Jones makes an important contribution to debates that remain in the forefront of discussions about American politics.

Whatever Happened to
Party Government?

iUniverse

The book, *Because of May 10th, 1980; The Flamingo Incident* is a detailed, personal account of the events leading up to, during and after the May 10th, 1980 bombing of the Bahamian military vessel the HMBS Flamingo. As a survivor of the attack, Farrington says that the book means a great deal to him. He wrote it a little at a time and sometimes cried as he recalled the events, and sometimes laughed remembering the good times he shared with his fellow crew members. The book was written so that everyone, especially the families of the fallen men and their children would know and appreciate

the sacrifice that was made for the nation.

culture of the language

they are learning. This book aims to demonstrate that substantial intercultural learning can and does occur in the modern language classroom, and explores the features of the classroom that support meaningful culture-in-language-learning. The author argues that transformative modern language education is intimately tied to a view of language learning as an engagement in meaning-making activity, or semiotic practice. The empirical evidence presented is analyzed and then linked to both the theorizing of culture-in-language-teaching and to practical concerns of teaching.

In 1901, the Northern Pacific was an unlikely prize: a twice-bankrupt construction of the federal government, it was a two-bit railroad (literally—five years back, its stock traded for twenty-five cents a share). But it was also a key to connecting eastern markets through Chicago to the rising West. Two titans of American railroads set their sights on it: James J. Hill, head of the Great Northern and largest individual shareholder of the Northern Pacific, and Edward Harriman, head of the Union Pacific and the Southern Pacific. The subsequent contest was unprecedented in the history of American enterprise, pitting not

only Hill against Harriman but also Big Oil against Big Steel and J. P. Morgan against the Rockefellers, with a supporting cast of enough wealthy investors to fill the ballroom of the Waldorf Astoria. The story, told here in full for the first time, transports us to the New York Stock Exchange during the unfolding of the earliest modern-day stock market panic. Harriman vs. Hill recreates the drama of four tumultuous days in May 1901, when the common stock of the Northern Pacific rocketed from one hundred ten dollars a share to one thousand in a mere seventeen hours of trading—the result of an inadvertent “corner” caused by the opposing forces. Panic

followed and then, in short order, a calamity for the “shorts,” a compromise, the near-collapse of Wall Street brokerages and banks, the most precipitous decline ever in American stock values, and the fastest recovery. Larry Haeg brings to life the ensuing stalemate and truce, which led to the forming of a holding company, briefly the biggest railroad combine in American history, and the U.S. Supreme Court ruling against the deal, launching the reputation of Justice Oliver Wendell Holmes as the “great dissenter” and President Theodore Roosevelt as the “trust buster.” The forces of competition and combination, unfettered growth,

government regulation, and corporate ambition—all the elements of American business at its best and worst—come into play in the account of this epic battle, whose effects echo through our economy to this day.

This book is a classic in the history of art. In it François Baschet recounts the research and creation of his

Sound Sculptures, with which he began a pioneering career combining art and science, sculpture and music. The willingness to share his findings inspired another breakthrough: participatory exhibitions, spaces where everyone could explore and play with sound. François Baschet's conception of acoustics—a method of understanding the functional relations between form, matter, action and sound—not only gave rise to the invention of hundreds of Sound Sculptures of all sizes and sonority, which can be found all over the world, but also led François and his brother to collaborate with personalities such as Jean Cocteau, Pierre Schaeffer and

ToruTakemitsu. François Baschet relates a funny collection of stories about the artistic life in Paris and New York in 40s and 60s. This reissue of The Sound Sculptures of Bernard and François Baschet includes fragments still unpublished when the first edition appeared, and incorporates the original text of the *Organologie des Structures Sonores* Baschet (written by the two brothers), with Spanish translations.

The Belgian Campaign and the Surrender of the Belgian Army, May 10-28, 1940 Ilr Press

Olga was the sexy young wife of an old millionaire. She wore black painted toenails, a small black Luger, and very little else. Anabel was a talented

stripper with an act that drove the customers wild. She wore nothing at all—and got rich that way. When private eye Peter Chambers investigates a strange death and stranger blackmail, he winds up in a deadly duel with hoods, racketeers, vice-lords, and two females who are sheer murder!

What Happened? An Encyclopedia of Events That Changed America Forever [4 volumes]

Gale, Cengage Learning

Based on extensive primary sources, many never previously translated into English, this is the definitive account of the origins of Ceres as it went from being classified as a new planet to reclassification as the

first of a previously unknown group of celestial objects. Cunningham opens this critical moment of astronomical discovery to full modern analysis for the first time. This book includes all the voluminous correspondence, translated into English, between the astronomers of Europe about the startling discovery of Ceres by Piazzi in 1801. It covers the period up to March 1802, at which time Pallas was discovered. Also included are Piazzi's two monographs about Ceres, and the sections of two books dealing with Ceres, one by Johann Bode, the other by Johann Schroeter. The origin of the word 'asteroid' is explained, along with several chapters on the

antecedents of the story going back to ancient Greek times. The formulation of Bode's Law is given, as are the details on the efforts of Baron von Zach to organize a search for the supposed missing planet between Mars and Jupiter. Examples of verse created to commemorate the great discovery are included in this first volume. The author, who has a PhD in the History of Astronomy, is a dedicated scholar of the story of asteroids and his research on the discovery of Ceres is comprehensive and fully sourced. The discovery came at a time when rival astronomers were in hot competition with each other, and when

the true nature of these celestial bodies was not yet known. With astronomers in France, Italy and beyond vying to understand and receive credit for the new class of astral bodies, drama was not in short supply--nor were scientific advances.
