LEGO Ninjago: Dark Island Trilogy, Part 2 Little, Brown Books for Young Readers

What will the world look like in fifty years? In one hundred years? Four hundred years? Will we still pollute our skies with carbon? Will we still build monuments by the curb to nameless waste gods only to have our diapers, wrappers, cartons, and packaging squished into a foul-smelling hell-on-wheels to be hauled to the methane-emitting monument of NIMBY our global civilization is creating? No! Lets drive cars, build gardens, and live in buildings that leave the earth cleaner than we found it! In this little book Professor Bradley Layton takes us on a journey through the bowels of MIT, the dumpsters of our cities, and shares his own

personal account of moving away from the landfill in Missoula, Montana, home of A River Runs Through It, downtown river surfing, and epic fly fishing. Once youve made your way through this book, youll never look at garbage or trash the same way again. You will see and help create a future where nothing goes to waste. You will help restore the earth to The Garden that we were entrusted with in The Beginning.

The most ambitious comics event of 2016 brings war to the 41st century - with Rai leading the charge! One hundred years from today, Father - the benevolent artificial intelligence that governs

the island nation of Japan - will gain sentience. To defend its borders, Father will take drastic action by launching Japan into space...where its people will thrive in isolation, away from the overpopulated and resource-deprived planet below. Over the centuries, as New Japan orbits our increasingly unstable world, it will become a model society - one built on peace, prosperity... and Father's control. A thousand years from today, Father will create the first Rai, founding a lineage of technologically enhanced heroes engineered to defend New Japan and sworn to protect it from all enemies. For hundreds of years into the future, the Rai will single-handedly enforce New Japan's justice well...and serve Father without question. Now, at the dawn of 4001 A.D., the latest Rai is about to inherit the dark truth behind the origin of his kind...and discover the sinister secret at the heart of Father's existence. For New Japan to live, Earth must die...and as Rai challenges his former master for the first time in more than a millennium, the lone guardian of New Japan will be cast out of his own Father's kingdom... Exiled from the only realm he's ever known, Rai now walks the ravaged world of 4001 A.D. in search of forgotten heroes like himself... on a mission to collect the last surviving legends of a broken planet...and to forge a rebellion with the power to bring the most advanced civilization in history crashing back down to Earth.
