Nationally syndicated radio talk show host and columnist Kevin McCullough Â tackles the thorny issue of why the audacity of hope is not found in the current path that President Barack Obama has laid. As the first pundit in the world to predict that President Barack Obama would become president of the United States (verified on-air by Rush Limbaugh), Kevin McCullough was not surprised when Mr. Obama was

elected to that office. Yet even McCullough admits he's surprised by President Obama's actions since the election. Surprised by the overt falsehoods already carried out by this administration. Surprised by our country's sudden deficit of clarity and common sense. Surprised by a blatant lack of accountability.Â In No He Can't, McCullough stands as the loyal but outraged loyal opposition to the current state of affairs.

How Spanish-language radio has influenced American and Latino discourse on key current affairs issues such as citizenship and immigration. Winner, Book of the Year presented by the American Association of Hispanics in Higher Education Honorable Mention for the 2015 Latino Studies Best Book presented by the Latin American Studies Association The last two decades have produced continued

Latino population growth, and marked shifts in both communications and immigration policy. Since the 1990s, Spanish-language radio has dethroned English-language radio stations in major cities across the United States, taking over the number one spot in Los Angeles, Houston, Miami, and New York City. Investigating the cultural and political history of U.S. Spanish-language broadcasts throughout the twentieth century, *Sounds of Belonging* reveals how these changes have helped Spanish-language radio secure its dominance in the major U.S. radio markets. Bringing together theories on the immigration experience with sound and radio studies, Dolores Inés Casillas documents how Latinos form listening relationships with Spanish-language radio programming. Using a vast array of sources, from print culture and industry journals to sound archives of radio programming, she reflects on institutional growth, the evolution of programming genres, and reception by the radio industry and listeners to map the trajectory of Spanish-language radio, from its grassroots origins to the current corporate-sponsored

business it has become. Casillas focuses on Latinos' use of Spanish-language radio to help navigate their immigrant experiences with U.S. institutions, for example in broadcasting discussions about immigration policies while providing anonymity for a legally vulnerable listenership. *Sounds of Belonging* proposes that debates of citizenship are not always formal personal appeals but a collective experience heard loudly through broadcast radio.

Advanced technologies in astronomy at various wavelengths have provided us with high resolution and high quality data on the QSO population. This meeting was aimed at understanding the morphology and nature of the host galaxies and environments of QSOs. The invited lectures as well as the contributed and poster papers highlighted the main issues of current research: the stellar and gaseous content of the underlying galaxy; the characterization of the population of companions and the nature of their interaction with the host galaxy; the connection between radio-loud QSO and

radio-galaxies, and QSOs and ULIRGs; the evolution with redshift of both the host galaxy and its environment, and the main implications in theories of galaxy formation and evolution. This volume provides a valuable overview and timely update of the exciting and rapidly developing field of QSO hosts and their environments - essential reading for graduate students and researchers.

Not since the Civil War has America been so divided over such a seemingly unsolvable issue as U.S. immigration policy. The president and congress are at an impasse, while vigilante groups patrol our nation's borders looking for one of the million yearly invaders. Why are 20 million people disregarding America's sovereign borders and laws to come to this country? Popular radio host Darrell Ankarlo follows the lives of several Mexican citizens as they contemplate their existence south of the border, their temptation to sneak into America, and what waits for them here. To understand the issue first-hand, Ankarlo

stared down gun barrels, was caught in the middle of a drug-lord showdown, and then wandered the Arizona desert after illegally sneaking back into America. Another Man's Sombrero explores issues raised by these personal stories and offers perspectives—often contradictory—from U.S. citizens.

"It was all so honest, before the end of our collective innocence. Top Forty jocks screamed and yelled and sounded mightier than God on millions of transistor radios. But on FM radio it was all spun out for only you. On a golden web by a master weaver driven by fifty thousand magical watts of crystal clear power . . . before the days of trashy, hedonistic dumbspeak and disposable three-minute ditties . . . in the days where rock lived at many addresses in many cities." —from FM As a young man, Richard Neer dreamed of landing a job at WNEW in New York—one of the revolutionary FM stations across the country that were changing the face of radio by rejecting strict formatting and letting disc jockeys play whatever they wanted. He felt that when he got there,

he'd have made the big time. Little did he know he'd have shaped rock history as well. FM: The Rise and Fall of Rock Radio chronicles the birth, growth, and death of free-form rock-and-roll radio through the stories of the movement's flagship stations. In the late sixties and early seventies—at stations like KSAN in San Francisco, WBCN in Boston, WMMR in Philadelphia, KMET in Los Angeles, WNEW, and others—disc jockeys became the gatekeepers, critics, and gurus of new music. Jocks like Scott Muni, Vin Scelsa, Jonathan Schwartz, and Neer developed loyal followings and had incredible influence on their listeners and on the early careers of artists such as Bruce Springsteen, Genesis, the Cars, and many others. Full of fascinating firsthand stories, FM documents the commodification of an iconoclastic phenomenon, revealing how counterculture was coopted and consumed by the mainstream. Richard Neer was an eyewitness to, and participant in, this history. FM is the tale of his exhilarating ride.

Live Your Best Life Ancient, time-tested wisdom: Okinawa, Japan is a tiny, tiny island south of the Japanese mainland where people live their life's purpose every day. How is it possible for so many

to live each day in such meaningful ways? The Okinawan concept of Ikigai. How to Ikigai describes the lifestyle choices that have led to an island full of fulfilled, long-living people. Magical reality come to life: Examples of ikigai in action are often magical. Take David Michiels. David stuttered severely well into his adulthood. In clinical terms, his stutter was difficult to treat. But David started to work in a liquor store. Before long, his focus turned to one specific section of the sales floor: the scotch section. As he spent more of his days learning about scotch, he began to share his knowledge with customers. Eventually, David noticed that his stutter vanished when he talked to anyone about scotch. Over time, David's passion led to a new life. Today, he is a renowned whiskey expert, traveling the world tasting and purchasing whiskey on behalf of his employer. He feels his life is meaningful because of ikigai. A humble look at happiness: Bringing together an exploration of joy not unlike that of *The Book of Joy* by the Dalai Lama and Archbishop Desmond Tutu, a look inward reminiscent of *The Untethered Soul* by Michael A. Singer, and deep truths like

those explored by Singer in *The Surrender Experiment*, *How to Ikigai* describes the concept of Ikigai with clarity and meaning. *How to Ikigai* explains a simple but abstract map for living a meaningful life. After reading this book, you will understand how to implement Ikigai's four directions in your own life: • Do what you love • Do what you're good at • Do what the world needs • Do what you can be rewarded for

Who better to face the greatest evil of the 20th century than a humble man of faith? As Adolf Hitler and the Nazis seduced a nation, bullied a continent, and attempted to exterminate the Jews of Europe, a small number of dissidents and saboteurs worked to dismantle the Third Reich from the inside. One of these was Dietrich Bonhoeffer, a pastor and author. In this New York Times bestselling biography, Eric Metaxas takes both strands of Bonhoeffer's life--the theologian and the spy--and draws them together to tell a searing story of incredible moral courage in the face of monstrous evil. In Bonhoeffer, Metaxas presents the fullest account of Bonhoeffer's life, including his: heart-wrenching decision to leave the safe haven of America to return to Hitler's Germany involvement in the famous Valkyrie plot and in "Operation 7," the effort to smuggle Jews into neutral Switzerland lifelong dedication to sharing the tenets of his faith This edition, revised

and with a new introduction from the author, shares the deeply moving story through previously unavailable documents, including personal letters, detailed journal entries, and firsthand personal accounts to reveal never-before-seen dimensions of Bonhoeffer's life and work. Praise for Bonhoeffer: "Metaxas has created a biography of uncommon power--intelligent, moving, well researched, vividly written, and rich in implication for our own lives. Or to put it another way: Buy this book. Read it. Then buy another copy and give it to a person you love. It's that good." --Archbishop Charles Chaput, author, *First Things* "Metaxas tells Bonhoeffer's story with passion and theological sophistication." —Wall Street Journal "Metaxas presents Bonhoeffer as a clear-headed, deeply convicted Christian who submitted to no one and nothing except God and his Word." --Christianity Today "Metaxas has written a book that adds a new dimension to World War II, a new understanding of how evil can seize the soul of a nation and a man of faith can confront it." --Thomas Fleming, author, *The New Dealers' War*

In the past few years, trust in traditional media has reached new lows. Many Americans disbelieve what they hear from the "mainstream media," and have turned to getting information from media echo chambers which are reflective of a single party or ideology. In this book, Paul Matzko reveals that this is not the first such moment in modern American history. The Radio Right tells the story of the 1960s far Right, who were frustrated by what they perceived to be liberal bias in the national media, particularly the media's sycophantic relationship with the John F. Kennedy administration. These people turned for news and commentary to a resurgent form of ultra-conservative mass media: radio. As networks shifted their resources to television, radio increasingly became the preserve of cash-strapped, independent station owners who were willing to air the hundreds of new right-wing programs that sprang up in the late 1950s and 1960s. By the early 1960s, millions of Americans listened each week to conservative broadcasters, the most prominent of which were clergy or lay broadcasters from across the religious spectrum, including Carl McIntire, Billy

James Hargis, and Clarence Manion. Though divided by theology, these speakers were united by their distrust of political and theological liberalism and their antipathy towards JFK. The political influence of the new Radio Right quickly became apparent as the broadcasters attacked the Kennedy administration's policies and encouraged grassroots conservative activism on a massive scale. Matzko relates how, by 1963, Kennedy was so alarmed by the rise of the Radio Right that he ordered the Internal Revenue Service and Federal Communications Commission to target conservative broadcasters with tax audits and enhanced regulatory scrutiny via the Fairness Doctrine. Right-wing broadcasters lost hundreds of stations and millions of listeners. Not until the deregulation of the airwaves under the Carter and Reagan administrations would right-wing radio regain its former prominence. The Radio Right provides the essential pre-history for the last four decades of conservative activism, as well as the historical context for current issues of political bias and censorship in the media.

“A gift of love to others who are seeking solace.” —Olivia Newton-John On the morning of May 11, 2015, Erin Davis, one of Canada’s most beloved radio personalities, suffered a devastating blow Erin was on set in Jamaica when she received the news that her twenty-four-year-old daughter, Lauren—who had marked a joyous Mother’s Day just hours before—had failed to awaken to her baby’s cries. Thus began Erin’s journey of grieving out loud with her family, friends and listeners, and of demonstrating how to pick up and keep going after experiencing the worst loss a parent can endure. Struck with grief and unable to find the answer to why Lauren had died, Erin and her husband, Rob, started down the long road through loss, determined not only to survive but also to reclaim the joy in their lives. Inspiring and unflinching, *Mourning Has Broken* charts a way forward after life has dealt a crushing blow. It reminds us that we are not alone in grief, and that although life is unpredictable and unfair, we can survive and return to joy. *QSO Hosts and Their Environments* St. Martin’s Paperbacks

is at war. The fight against global jihad has cost 7,000 American lives and almost \$2 trillion, and yet, most Americans do not understand what is at stake. The public lacks knowledge and safety because two presidents and their administrations neglected the most basic strategic question: who is the enemy? Presidents Bush and Obama both named the global jihadi movement—a movement with an intent to destroy the West—“violent extremism.” Their tidy term was an attempt to maintain peace with the Muslim community. But when they failed to appropriately name the enemy, they failed to fully understand Islamic extremism. This failure is why the U.S. has been in Afghanistan for sixteen years with no end in sight. But this war is eminently winnable if we remove our ideological blinders, accurately name our enemy, and draw up a strategy to defeat the ideas that inspire terrorism. So says Dr. Sebastian Gorka, one of the most experienced and sought-after authorities on counterterrorism. Dr. Gorka has been one of the intelligence community’s go-to experts on counterterrorism since 9/11. He’s been called to brief Congress and the

Marine Corps and was asked to analyze the Patriot’s Day Boston Marathon Bombing for the US government. Dr. Gorka’s report for the trial of Dzhokhar “Jahar” Tsarnaev was widely circulated in counterterrorism circles and the media because it accurately painted a picture, not of a teenager on the cover of *Rolling Stone*, but of a terrorist. Dr. Gorka is respected by peers because he understands our enemy is not “terror” or “violent extremism.” Our enemy is the global jihadi movement, a modern totalitarian ideology rooted in the doctrines and martial history of Islam whose goals are to build an empire, suppress “false Muslims,” and engage in guerilla warfare against infidels. Taking his cue from the formerly top-secret analyses that shaped the U.S. response to the communist threat, Dr. Gorka has produced a compelling profile of the jihadi movement—its mind and motivation—and a plan to defeat it.

Is racial equality the answer to every question of public policy? Are a huge group of citizens being kept down by "the man"? Radio host and bestselling author Larry Elder has made a career out of being a thorn-in-the-side of the conventional wisdom crowd. He deflates the pompous and points out the completely logical truths hidden behind the nutty rhetoric and out-of-control pandering of many of the politicians and so-called leaders of a variety of special interest groups. In Stupid Black Men, he takes on the mind-set that always

captures the most media attention—as well as masses of public money—in this country: those who rail against racism as the root of all problems, and who end up hurting precisely those they claim to be helping. Whether they are demagogues like Al Sharpton, established politicians like Hillary Clinton, or entertainers like Danny Glover, no one escapes Elder's cogent arguments and rapier wit. His sometimes hilarious and always infuriating examples of wrong-headedness skewer not just politicians for their smugness and hypocrisy, but also actors, educators, religious leaders and the "mainsream media" for keeping the story in the headlines. But Elder has a positive message, too: though they are fewer—and generally not as loud-mouthed—there are leaders and role models today who want to sweep away race-based whining and urge everyone in America, to share in the hard work, smart thinking and optimism that make this country great.
