In 2008 Dr. Afrin started coming to understand that a newly recognized type of mast cell disease, now called mast cell activation syndrome (MCAS), was the underlying diagnosis in many patients he was seeing who were each suffering large assortments -- quite different from one patient to the next -- of chronic multisystem inflammatory illnesses of unclear cause. Dr. Afrin soon gained experience that MCAS is far more prevalent than the only mast cell disease previously known to medicine (the rare disease of mastocytosis) and that most MCAS patients, once accurately diagnosed, can eventually find significantly helpful medications targeted at the disease. The

frequency and magnitude of the improvements Dr. Afrin has seen -- even the relief that comes from finally having a unifying diagnosis other than "psychosomatism" -- have spurred him to focus in this area, not only tending to the needs of his patients but also pursuing research to advance our understanding of the disease and helping to educate other professionals who in turn can help even more of the many people who have long been suffering not only the symptoms of the disease but also the natural concern of not understanding why one would be so "unlucky" to have acquired so many medical problems. As it turns out, such patients are not so unlucky and truly have just one root issue (and a very common one at that), which has the biological capability to develop, directly or indirectly, into most or all of their previously diagnosed problems. There is a great deal yet to learn about this, but even with just the present very limited understanding, the opportunity to diagnose and help patients with MCAS seems to be enormous and Dr. Afrin felt a description of the disease, written for the general public, might help lead some MCAS patients on a journey to diagnosis and improvement sooner rather than later. Dr. Afrin hopes this book will help people who might have, or do have, MCAS. A portion of the proceeds of purchases of this book will go to support research and education in this area.

Apolonia "Lina" Flores is a sock enthusiast, a volleyball player, a science lover, and a girl who's just looking for answers. Even though her house is crammed full of books (her dad's a bibliophile), she's having trouble figuring out some very big questions, like why her dad seems to care about books more than her, why her best friend's divorced mom is obsessed with making cascarones (hollowed eggshells filled with colorful confetti), and, most of all, why her mom died last year. Like colors in cascarones, Lina's life is a rainbow of people, interests, and unexpected changes. In her first novel for young readers, Diana López creates a clever and honest story about a young Latina girl navigating growing pains in her South Texan city.

This book examines how the COVID-19 pandemic and racial inequities affect the educational assessment of students, either separately or in combination, as the health crisis was viewed as a factor intersecting with and exacerbating existing racial inequities in educational systems. The four empirical papers in this book attend to the challenges of implementing virtual standardized testing during the coronavirus pandemic, the different educational and assessment experiences of diverse groups of school-age students, and the reconsideration of traditional assessment approaches in response to mounting research evidence and growing concerns around enduring social and racial inequities faced by Black, Latinx, Asian, Indigenous, and other non-white citizens and communities. The four conceptual papers focus primarily on the ways in which assessment may contribute to systemic racism and offer potential solutions to move the educational assessment field forward. In totality, the volume offers needed empirical evidence, innovative methodological approaches, and theoretical and substantive examinations of the effects of the twin pandemics. *Twin Pandemics* will be a key resource for academics, researchers, and advanced students of Educational Assessment, Education, Psychometrics, Educational Research, Ethnic Studies, Research Methods, Sociology of Education and Psychology. The chapters included in this book were originally published as a

special issue of Educational Assessment.
