Investigation of Alternative Methods of Grass Cutting HarperCollins

This book presents recent mathematical methods in the area of inverse problems in imaging with a particular focus on the computational aspects and applications. The formulation of inverse problems in imaging requires accurate mathematical modeling in order to preserve the significant features of the image. The book describes computational methods to efficiently address these problems based on new optimization algorithms for smooth and nonsmooth convex minimization, on the use of structured (numerical) linear algebra, and on multilevel techniques. It also discusses various current and challenging applications in fields such as astronomy, microscopy, and biomedical imaging. The book is intended for researchers and advanced graduate students interested in inverse problems and imaging.

Using Lady Morgan's *The Wild Irish Girl* as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.

Fifteen years have gone by since those glory days, and Neely has come home to Messina to bury Coach Eddie Rake, the man who molded the Spartans into an unbeatable football dynasty. Now, as Coach Rake's "boys" sit in the bleachers waiting for the dimming field lights to signal his passing, they replay the old games, relive the old glories, and try to decide once and for all whether they love Eddie Rake – or hate him. For Neely Crenshaw, a man who must finally forgive his coach – and himself – before he can get on with his life, the stakes are especially high.
