 Take coparenting to the next level and provide a stable environment for your children as you and your spouse begin tackling your separation or divorce. For parents who are separating and want to put their children first, birdnesting could be the interim custody solution you've been looking for. Instead of the children splitting their time being shuttled between mom and dad's separate homes, birdnesting allows the children to stay in the "nest" and instead, requires mom and dad to swap, allowing each parent to stay elsewhere when not with the children. Initially popularized by celebrities, this method of coparenting is now becoming more mainstream as a way to help ease children into a new family dynamic. Birdnesting takes work and commitment but with Dr. Ann Gold Buscho's guidance, you'll learn everything you need to know about this revolutionary method. In *The Parent's Guide to Birdnesting*, you will discover the pros and cons, the financial and interpersonal considerations, and if it's the right decision for you and your family.

A Parent's Guide to Divorce W. W. Norton & Company
 If you want to be in better, happier control of your family, this book has simple, workable solutions! If the kids are uncooperative, disrespectful or won't help with the chores then it means you aren't in control! This book can remedy with that as well. If you don't have those situations, but would just like to have a happier family, any of the 18 Keys can help you have that. Parents are faced with more challenges than ever before and will find these solutions invaluable. "18 Keys to Having a Happier Family" was created with the purpose to preserve the value of the family in the face of declining morals and other challenges to parents in raising their children. It is important to make it easier for parents to nurture and enjoy their children they so love and for children to respect their parents. Most families no longer spend enough quality time together. A current and alarming statistic is that parents engage in meaningful conversation with their children only an average of 3 1/2 minutes per week (according to the A. C. Nielsen Co.). Fewer parents are able to stay home for hands-on and caring parenting. Instead, they're struggling to meet the challenges of juggling family and work,

especially in today's economy. Many families share fewer meals together and have fewer loving moments. Too often the kids are "glued" to the TV, video games and computers. Parents may feel they don't have time to spend with their children, but making the time is vital to the children's and the parent's well-being. If you are concerned about the decline of family values, you are not alone. The meaning of "Family Values" may have become misused and confused, but the value of the family is immense and indisputable as the foundation of a sane and thriving society. Family Values can be defined as valuing the family -- valuing the love, care and support of the family members individually and as a group and spending quality time together. "Family life is the source of the greatest happiness. This happiness is the simplest and least costly kind, and it cannot be purchased with money." Robert J. Havighurst Kids are our future and help for you and them is here in this simple, friendly guide to creating a happier family! Order this valuable easy-to-use book for you and your family or as a great gift! Note: This book is open to and may be applied by anyone of any race, color, creed, culture or gender/sex. It is non-religious and non-political. Anyone of any religion and political preference may benefit from it. Religious freedom and tolerance along with one's human rights, liberty and the pursuit of happiness are wholly supported by the authors. "This is the book parents have been waiting for"—Michael Thompson, coauthor of *Raising Cain*. The book that is "helpful, hopeful, and engaging"—Jeanne Brooks-Gunn, Ph.D., Columbia University. It is the book that addresses the new reality for parents of kids in their 20s and the issues that everyone in the media is talking about: When will this new generation of 20-somethings leave home, find love, start a career, settle down—grow up? And it's the book that will soothe your nerves. It's loaded with information about what to expect and guidance on what to do when problems arise (as they probably will). In other words, this is the book parents need—*Getting to 30*, by Jeffrey Jensen Arnett, the world's leading authority on the post-adolescent phase he named emerging adulthood, and Elizabeth Fishel, author of *Sisters* and other books. As *Getting to 30* shows, the road to adulthood is longer than we think—and, for parents, bumpier. It explains what's really happening to your 18- to 29-year-old, including the story behind your child's moods. The phenomenon of the boomerang child—and why it's actually a good thing, for parents and kids. The new landscape of 20-something romance. And it gives all the tools parents need to deal with the challenges, from six ways to listen more than you talk, to knowing when to open (and close) the Bank of Mom and Dad while saving for retirement, to figuring out the protocol for social media. Published in hardcover as *When Will My Grown-Up Kid Grow Up?*, *Getting to 30* includes the latest research on the optimistic and supportive attitude most parents have regarding their 20-something children.
