Evaluating Teaching Jones & Bartlett Learning

Sharpen advising expertise by exploring critical issues affecting the field Beyond Foundations, a core resource for experienced academic advisors, gives practitioners insight into important issues affecting academic advising. In addition to gaining understanding of foundational concepts and pressing concerns, master advisors engage with case studies to clarify their roles as educators of students, as thought leaders in institutions, and as advocates for the profession. Pillar documents—the NACADA Core Values, NACADA Concept of Academic Advising, and CAS Standards—serve as sources of both information and inspiration for those seeking to improve advising. New strategies inform advisors helping a diverse student population delineate meaningful educational goals. Each chapter prompts productive discussions with fellow advisors interested in cultivating advising excellence. To promote advisor influence in higher education, experienced contributors explain new trends—including the impact of external forces and legal issues on postsecondary institutions—and the evolution of advising as a profession and a field of inquiry. Expert insight and practical focus contribute to the development of experienced advisors. Use existing resources in new ways to master advising roles and encourage student success Apply theory to advance advising practice Create and optimize professional development opportunities Establish recognition for the contributions of academic advisors to the institution and higher education Face challenges created by the changing higher education landscape

Advisors must meet the expectations of students, parents, faculty members, administrators, and outside agencies, all while navigating an increasingly complex range of issues presented by a student population unlike any that has come before. Beyond Foundations provides the insight and clarity advisors need to help students achieve their educational goals and to advance the field.

As the role of the physical therapist widens to include more primary care and diagnostic responsibilities, there is a greater need for a single, up-to-date resource that explores professional roles and developments in this changing field. This new book is the definitive reference on this important topic. This concise book provides information on every vital area important to professionalism: documentation, law and ethics, and leadership - all in the context of the five roles of the physical therapist as defined by the APTA's Guide to Physical Therapist Practice, 2nd Edition. Readers will find information on the history of professionalism in physical therapy, the five roles of the physical therapist (Patient/Client Manager, Consultant, Critical Inquirer, Educator, and Administrator), the role of the physical therapist in today's health care system, and professional leadership and development. Case studies, "how to lists" and "tips from the field" encourage critical thinking and provide strategies for various issues. The book also offers tips on preparing a portfolio, determining leadership style, and preparing a professional development plan based on the APTA's five roles. Develops and defines principles and concepts of professionalism to guide physical therapists in times of change Follows the APTA's Guide and includes quotes and information from this document throughout Offers a comprehensive history of physical therapy, with unique information on origins of the profession Offers comprehensive coverage of legal and ethical issues, showing how these issues affect the entire practice of physical therapy Discusses billing

and reimbursement practices, with specific information on how to document and bill as an aspect of practice Defines and explains the role of the consultant, both as an autonomous health care provider or as a member of a health care team Features real-life case studies and discussion questions at the end of each chapter to encourage practical application of concepts and test readers' knowledge Provides end-of-chapter "tips" to help readers develop best practices

What English Teachers Need to Know, a set of companion texts designed for pre-service teachers and teachers new to the field of ELT, addresses the key question: What do English language teachers need to know and be able to do in order for their students to learn English? These texts work for teachers across different contexts (countries where English is the dominant language, one of the official languages, or taught as a foreign language); different levels (elementary/primary, secondary, college or university, or adult education); and different learning purposes (general English, workplace English, English for academic purposes, or English for specific purposes). Volume I, on understanding learning, provides the background information that teachers need to know and be able to use in their classroom. Volume II, on facilitating learning, covers the three main facets of teaching: planning, instructing, and assessing. Volume III, on designing curriculum, covers the contexts for, processes in, and types of ELT curricula—linguistic based, content-based, learner-centered, and learning-centered. Throughout the three volumes, the focus is on outcomes, that is, student learning. Features • Situated in current research in the field of English language teaching and other disciplines that inform it • Sample data, including classroom vignettes • Three kinds of activities/tasks: Reflect, Explore, and Expand

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

The second edition of Professional and Student Portfolios for Physical Education has been fully updated to reflect the new physical education standards for beginning and practicing teachers and K-12 physical education content standards for school students. Among the updates and new features in this book, you'll find a CD-ROM full of portfolio builders that provide a step-by-step process for developing professional and student portfolios. The practical procedures and tips provided in the book can be used for every phase of a teacher's career: -PE teachers can use it to guide their students in creating portfolios. -Teachers can create their own professional portfolios. -College students training to be PE teachers can create their own portfolios for evaluation within their universities and to help them land their first jobs. The following are among the new features in this edition: -New standards. All three sets of professional teacher standards and content standards are identified and applied in each chapter. -Expected outcomes. Each chapter includes a set of expected outcomes that identifies the knowledge and skills the reader should acquire after completing the chapter. -Integration of assessment, learning, and teaching. Student portfolios model successful integration as students reflect on learning, develop self-direction and feedback skills, set goals, create new challenges, and communicate achievement results. These concepts are introduced in chapter 1 and developed further in chapter 3. -Rubric development. Chapter 3 discusses the design of rubrics, criteria for determining the quality of rubrics, and converting rubric scores to grades. Rubrics are also presented and illustrated in chapters 2 and 4. -Use of technology. The application of technology for portfolio assembly, management, and storage is a significant feature of this second edition. General guidelines for creating electronic-based and Web-based portfolios, including hardware, storage, and software recommendations, are presented in chapter 1. The specific use of technology in developing student and teacher portfolios is covered in chapters 2, 3, and 4, where you will also find sample portfolio systems for PETE programs; elementary, middle, and high school students; and practicing teachers. -CD-ROM portfolio builders. The accompanying CD-ROM includes templates for creating electronic-based portfolios for teacher candidates, K-12 students, and practicing teachers. These templates provide a step-by-step process for developing professional and student portfolios. When completed, the portfolio can be copied to a CD for distribution and review. It can also be uploaded to the Internet for access as a Web-based portfolio. The portfolio systems in Professional and Student Portfolios for Physical Education, Second Edition, are detailed and illustrated. With its updated information on standards, its inclusion of rubric development, and its detailed information on the use of technology in building portfolios, this book is a valuable resource for both teachers and students.

Athri was fortunate to attend a five day workshop on NLP by one of the founders of NLP, Mr. Richard Bandler. That was the decisive moment when Athri got obsessed with training. His background from 1967 to 1997, as a Medical Representative, Field Manager and Area Manager, gave him just the right climate and atmosphere for training. In this MNC Pharma Company in which he worked, (John Wyeth and brother limited) the emphasis and practice of training was practically a day and night affair. The area managers go to the HO (Bombay) every month and literally mug up word to word detail, the specific technical words, the sequence of the sentences, the display of the folder, the eye contact, the closing with pointed statements in order to get assurance of prescription from the doctor, was all practice so thoroughly that this extremely content and process specific detail is ground very thoroughly at the field managers meetings and then on to the medical representatives meeting. This cyclic intensive training literally got into Athri's psyche. Soft Skills Initiatives is a natural evolution as far as Athri is concerned. Before Pharma experience Athri had the privilege of working in Avery India Madras. He worked as GM in 3 auto dealerships (Daewoo, Hyundai, and Tata Motors). He moved to ICFAI as Consultant trainer (soft skills). He worked as Marketing Manger in SD Pharmacy and GM in two Pan India Training Companies. He also worked as Marketing Manager (Overseas customers) and growing software developer and for a short while for ICICI home Loans. This rich and varied experience helped him establish himself as a note worthy and successful trainer all over South India. The title of the booklet wants to convey to the reader. Routledge

What English Language Teachers Need to Know Volume III Corwin Press

A central aspect of teachers' professional knowledge and competence is the ability to assess students' achievements adequately. Giving grades and marks is one prototypical task in this context. Besides giving grades, assessments for school placements or tracking decisions belong to these tasks. Relevant students' characteristics which influence teachers' assessments do not only involve academic achievement but also students' responses to different task demands as well as non-academic characteristics such as learning motivation or school anxiety. Closely associated with the investigation of teachers' assessment competences and, more specifically, the investigation of conditions associated with high quality of assessments is the development and evaluation of teacher training programs to improve professional competences. In recent years, there has been considerable progress in the domain of professional teacher training; however, only a very limited number of studies are dedicated to the question to what extent training programs might offer valuable approaches to improve the quality of assessments and to implement high assessment competences. Another important field which is closely related to teachers' competences concerns the question how teachers' professional development is linked to students' learning and learning outcomes. In recent years, the societal demand for evidence that teachers' professional development will result in improved student learning outcomes is increasing. This volume brings together questions on assessment, training, and learning in the professional development of teachers which have not been fully discussed yet. The identification of these research gaps was the reason for dedicating a series of lectures given at the University of Luxembourg 2012 to the topic of professionalization of teachers in these domains. Therefore, this book contains contributions from outstanding international scholars in different academic disciplines to present ideas about open research questions concerning the domains of assessment, training, and learning in the professional development of teachers.
