The islands of Martha's Vineyard and
Nantucket, off the Cape Cod coast of
Massachusetts, were first inhabited by
members of the Wampanoag tribe.
English settlements were established in
the mid-1600s. As the populations and
commerce grew, so did the need for
reliable transportation. The islands were
first served by privately owned sailing
vessels, but things began to change with
the introduction of marine steam power.
In 1818, the little steamer *Eagle* was the
first to cross Nantucket Sound. Although
she only remained in these waters for
three months, she began what was to
become a tradition of steamboat travel

to the islands that lasted for 170 years. The images in this volume include well-known steamers with familiar names like Nobska, Naushon, Gay Head, and Uncatena, as well as many others.

Cleveland's Flats Menasha Ridge Press
Cleveland is home to many fascinating neighborhoods and districts. Perhaps the most intriguing, however, is an area known as the Flats. Typically, the term "Flats" refers to the northern portion of the Cuyahoga River Valley. The Cuyahoga River ceases to be the idyllic flow of water seen to the south of Cleveland as it approaches the city's steel mills. The river is more man-made than natural where it meets the Flats, and a wide array of industries sit along its banks. The Flats have been a vital component and a reflection of Cleveland's rise, decline, and ongoing renaissance. Cleveland's Flats is a chronicle of this remarkable region. From the refineries of Standard Oil to massive ore boats carefully navigating the Cuyahoga, Cleveland's Flats treats the reader to scenes found in no other place.

Rowman & Littlefield

Stories and photos that reveal the haunting history of Cleveland, Ohio. Many of Cleveland's dearly departed haunt the Forest City to this day. A spirit lingers in the ballroom, and a little girl cries on the third floor of Franklin Castle, the most haunted site in the city. The man in the green hat will not leave the stage at the Palace Theater. Chief Joc-O-Sot still wanders Erie Street Cemetery centuries after his death, unable to rest in his grave, while a phantom in full Civil War uniform paces inside the Soldiers' and Sailors' Monument. In this fascinating book, authors Beth A. Richards and Chuck L. Gove of Haunted Cleveland Ghost Tours share the chilling tales of the city's spectral past.

During World War II, the U.S. Navy's submarine service suffered the highest casualty percentage of all the American armed forces, losing one in five submariners. But despite the odds, these underwater warriors accounted for almost 60 percent of Japanese shipping losses, and were a major factor in winning the war. 16 U.S. submarines - and one German U-Boat - that saw action during WWII are now open to the public. Most have been restored and authentically equipped. *Final Patrol* takes a fascinating look at these subs and the personal stories of the brave sailors who lived, fought, and often died in them. Now, visitors can climb into these cramped steel cylinders, peer through their torpedo tubes, and imagine diving under the sea - perhaps for the last time - to stalk a fanatical enemy who threatened our nation's freedom.

Planners face a controversial task because their professional role requires them to be spokespersons for the public interest. In a welter of conflicting pictures and voices, how might the public interest be discovered? Once identified, how might it be expressed so that competing publics attend to it? There are no easy answers, but the experience of planners today suggests ways of working and innovations of promise. The focus on planning practice prompted the editors to analyze images that are now at work in our cities. For Vale and Warner, all city design and constructions offer material that people should include in images of their

environment. The built and building city are part of the experience of all city dwellers; it is theirs to incorporate, interpret, or ignore. Essays included in this text trace the interplay between physical objects of planners and architects and the social experience and outlooks of image makers and their audiences. *Imaging the City* explores urban image making from civic boosterism of medieval cities to iconic imagery of Times Square. Vale and Warner bring together urban historians, geographers, city planners, architects, and cultural commentators to analyze the creation of urban imagery from the signature skyscrapers of Kuala Lumpur to the re-creation of the South Bronx and the use of city images in film, literature, television, and on the Internet. Urban dwellers, urban planners, architects, municipal officials, sociologists, urban historians - all will perceive their worlds with a heightened sense of awareness after reading this book.

Acting Locally Arcadia Publishing

Missionary-geographer John

Heckewelder was prophetic in the 1790s when he mapped the place where the Cuyahoga River flows into Lake Erie. He wrote, "Cujahaga will hereafter be a place of great importance." In 1796, surveyors arrived to plot a new town and named it after their superintendent, Moses Cleaveland. Soon Cleveland (the a was omitted on early maps) was a magnet for inventors and entrepreneurs. By 1829-1830, a lighthouse was necessary to support lake traffic spurred by shipbuilding, shipping, and population growth. A succession of taller, brighter structures has guided mariners into the Cleveland harbor, creating a splendid history. Remarkable people have tended these sometimes-silent sentinels through decades of calm nights and dramatic

storms, subtly contributing to the region's growth and prosperity.
