 Is gospel Christianity dead? Pundits are writing the obituary of historic, orthodox Christianity, but pastor and author J. D. Greear (Gospel, Stop Asking Jesus into Your Heart) believes the postmortems are premature. Jesus promised to build his church. He said that the gates of hell would not prevail against it. The church is not going away. Along with this promise, Jesus gave clear

instructions for how the church would prevail. He promised to build it on the rock of the gospel. The most pressing need for Christianity today is not a new strategy. It is not an updated message. It is a return to keeping the gospel above all.

An accessible explanation of the technologies that enable such popular voice-interactive applications as Alexa, Siri, and Google Assistant. Have you talked to a machine lately? Asked Alexa to play a song, asked Siri to call a friend, asked Google Assistant to make a shopping list? This volume in the MIT Press Essential Knowledge series offers a nontechnical and accessible explanation of the technologies that enable these popular devices. Roberto

Pieraccini, drawing on more than thirty years of experience at companies including Bell Labs, IBM, and Google, describes the developments in such fields as artificial intelligence, machine learning, speech recognition, and natural language understanding that allow us to outsource tasks to our ubiquitous virtual assistants. Pieraccini describes the software components that enable spoken communication between humans and computers, and explains why it's so

difficult to build machines that understand humans. He explains speech recognition technology; problems in extracting meaning from utterances in order to execute a request; language and speech generation; the dialog manager module; and interactions with social assistants and robots. Finally, he considers the next big challenge in the development of virtual assistants: building in more intelligence--enabling them to do more than communicate in

natural language and endowing them with the capacity to know us better, predict our needs more accurately, and perform complex tasks with ease.

 Legendary storyteller Barbara Taylor Bradford presents a spellbinding story of four women transformed by old memories and surprising revelations when they meet again at a school reunion in Paris. As students at the prestigious Anya Sedgwick School of Decorative Arts in Paris,

Alexandra Gordon, Kay Lenox, Jessica Pierce, and Maria Franconi share the challenges and excitement of developing their various artistic talents to the fullest under Sedgwick's caring and demanding guidance. Once best friends, they part enemies, and after graduation go their separate ways, pursuing careers and establishing lives in different corners of the world. Alexandra, a set designer, becomes a leading figure in New York's theater world. Kay, who marries and moves to

Scotland, designs a successful line of clothing. Jessica, an interior designer, makes her home in California, while Maria returns to her native Italy, where she continues to work in her family's textile business. For each of them, the arrival of an invitation to Paris to celebrate Anya Sedgwick's eighty-fifth birthday stirs up complicated feelings: Nostalgic memories are colored by poignant regrets, and the reluctance to revisit their own pasts mixes with

curiosity about their former friends. It is ultimately their desire to deal with unfinished business that convinces all of them to attend the party. During three eventful weeks in Paris, they visit their old haunts, rekindle ties, and awaken in one another the sense of wonder, adventure, and possibilities they had shared so long ago. Barbara Taylor Bradford has long been recognized as one of today's finest chroniclers of women's lives. From her blockbuster debut novel,

*A Woman of Substance*, to her most recent bestseller, *The Triumph of Katie Byrne*, her books have sold more than 61 million copies worldwide. *Three Weeks in Paris* is vintage Bradford, filled with the emotional power and captivating plot twists her readers cherish.
