General Science, Grades 5 - 8 Mark

Twain Media

Earth Science for grades 5 to 8 is designed to aid in the review and practice of earth science topics.

Earth Science covers topics such as Earth, the moon, the solar system, rocks and minerals, landforms, and weather patterns.

The book includes realistic diagrams and engaging activities to support practice in all areas of earth science.

The 100+ Series science books span grades 5 to 12. The activities in each book reinforce essential science skill practice in the areas of life science, physical science, and earth

science. The books include engaging, grade-appropriate activities and clear thumbnail answer keys. Each book has 128 pages and 100 pages (or more) of reproducible content to help students review and reinforce essential skills in individual science topics. The series is aligned to current science standards.

It can be surprising which objects float and which don't. An apple floats, but a ball of aluminum foil does not. If that same ball of foil is shaped into a boat, it floats! Why? And how is it possible that a huge ship made of steel can float? Answering these

questions about density and flotation is David A. Adler's clear, concise text, paired with Anna Raff's delightful illustrations. Activities that demonstrate the properties of flotation are included.
