Plan B 3.0: Mobilizing to Save Civilization Northwestern University Press

As heard on NPR's This American Life "Absorbing . . . Though it's non-fiction, *The Feather Thief* contains many of the elements of a classic thriller." —Maureen Corrigan, NPR's Fresh Air "One of the most peculiar and memorable true-crime books ever." —Christian Science Monitor A rollicking true-crime adventure and a captivating journey into an underground world of fanatical fly-tiers and plume

peddlers, for readers of *The Stranger in the Woods*, *The Lost City of Z*, and *The Orchid Thief*. On a cool June evening in 2009, after performing a concert at London's Royal Academy of Music, twenty-year-old American flautist Edwin Rist boarded a train for a suburban outpost of the British Museum of Natural History. Home to one of the largest ornithological collections in the world, the Tring museum was full of rare bird specimens whose gorgeous feathers were worth staggering amounts of money to the men who shared Edwin's obsession: the Victorian art of salmon fly-tying. Once inside the museum, the champion fly-tier grabbed hundreds of bird skins—some collected 150 years earlier by a contemporary of Darwin's, Alfred Russel Wallace, who'd risked

everything to gather them—and escaped into the darkness. Two years later, Kirk Wallace Johnson was waist high in a river in northern New Mexico when his fly-fishing guide told him about the heist. He was soon consumed by the strange case of the feather thief. What would possess a person to steal dead birds? Had Edwin paid the price for his crime? What became of the missing skins? In his search for answers, Johnson was catapulted into a years-long, worldwide investigation. The gripping story of a bizarre and shocking crime, and one man's relentless pursuit of justice, *The Feather Thief* is also a fascinating exploration of obsession, and man's destructive instinct to harvest the beauty of nature.

Acoustic Properties: Radio, Narrative, and the New Neighborhood of the Americas discovers the prehistory of wireless culture. It examines both the coevolution of radio and the novel in

Argentina, Cuba, and the United States from the early 1930s to the late 1960s, and the various populist political climates in which the emerging medium of radio became the chosen means to produce the voice of the people. Based on original archival research in Buenos Aires, Havana, Paris, and the United States, the book develops a literary media theory that understands sound as a transmedial phenomenon and radio as a transnational medium. Analyzing the construction of new social and political relations in the wake of the United States' 1930s Good Neighbor Policy, Acoustic Properties challenges standard narratives of hemispheric influence through new readings of Richard Wright's cinematic work in Argentina, Severo Sarduy's radio plays in France,

and novels by John Dos Passos, Manuel Puig, Raymond Chandler, and Carson McCullers. Alongside these writers, the book also explores Che Guevara and Fidel Castro's Radio Rebelde, FDR's fireside chats, Félix Caignet's invention of the radionovela in Cuba, Evita Perón's populist melodramas in Argentina, Orson Welles's experimental New Deal radio, Cuban and U.S. "radio wars," and the 1960s African American activist Robert F. Williams's proto-black power Radio Free Dixie. From the doldrums of the Great Depression to the tumult of the Cuban Revolution, *Acoustic Properties* illuminates how novelists in the radio age converted writing into a practice of listening, transforming realism as they struggled to channel and shape popular power.

The ideas and practices related to afrofuturism have existed for most of the 20th century, especially in the north American African diaspora community.

After Mark Dery coined the word "afrofuturism" in 1993, Alondra Nelson as a member of an online forum, along with other participants, began to explore the initial terrain and intellectual underpinnings of the concept noting that "Afrofuturism has emerged as a term of convenience to describe analysis, criticism and cultural production that addresses the intersections between race and technology." Afrofuturism 2.0: The Rise of Astroblackness represents a transition from previous ideas related to afrofuturism that were formed in the late 20th century around issues of the digital divide, music and literature. Afrofuturism 2.0 expands and broadens the discussion around the concept to include religion, architecture, communications, visual art, philosophy and reflects its

current growth as an emerging global Pan African creative phenomenon. Planning guide for maintaining school facilities

In an anticipated book on business management for our time, Jack Welch surveys the landscape of his career running General Electric, one of the world's largest and most successful corporations. Here he reveals his philosophy and management style.

Space Is the Place Routledge

Considered by many to be a founder of Afrofuturism, Sun Ra—aka Herman Blount—was a composer, keyboardist, bandleader, philosopher, entrepreneur, poet, and self-proclaimed extraterrestrial from Saturn. He recorded over 200 albums with his Arkestra, which, dressed in Egypto-space costumes, played

everything from boogie-woogie and swing to fusion and free jazz. John Szwed's *Space is the Place* is the definitive biography of this musical polymath, who was one of the twentieth century's greatest avant-garde artists and intellectuals. Charting the whole of Sun Ra's life and career, Szwed outlines how after years in Chicago as a blues and swing band pianist, Sun Ra set out in the 1950s to impart his views about the galaxy, black people, and spiritual matters by performing music with the Arkestra that was as vital and innovative as it was mercurial and confounding. Szwed's readers—whether they are just discovering Sun Ra or are among the legion of poets, artists, intellectuals, and musicians who consider him a spiritual godfather—will find that, indeed, space

is the place.

The Onion Book of Known Knowledge Lexington Books

"O'Boyle has researched and written a monumental book that should be mandatory reading for all CEOs and anyone concerned with business ethics." --The Philadelphia Inquirer "Superb . . . a spirited study of General Electric, and of its sometimes brilliant, sometimes bungling, but always ruthless boss, Jack Welch." --Chicago Sun-Times With convincing passion and meticulous research, Thomas F. O'Boyle explores the forces behind General Electric's rise to the top of Wall Street, questioning if GE, with chief executive officer Jack Welch at the helm, is still "bringing good things to life." Welch--explosive, profit-hungry, and pragmatic--catapulted GE's

stocks to the top, up 1,155 percent from 1982 to 1997. O'Boyle argues that these astounding results have come only with the heavy price of employees' lives, blighted under the tyranny of "Neutron Jack" Welch, so named for his bomb-like ability to eliminate staff without disturbing surrounding operations. During Welch's reign, hard-nosed success tactics--unblinking downsizing, ruthless acquisition negotiations, and the virtual abandonment of manufacturing in favor of the more glamorous entertainment and financial services industries--coexist with scandals like price-fixing, pollution, and defense contract fraud. Sure to spark controversy, this gripping, comprehensive account begs the greater question: Is Jack Welch's GE a model

company for business in the next century, or is it time to change the way the world does business? "Smoothly written and thoroughly researched." -- USA Today "This book makes a valuable contribution to our understanding of corporate America. . . . Thomas F. O'Boyle persuades you that GE--Jack Welch's GE--brings bad things to life. In abundance." --Washington Monthly *Two Centuries of US Military Operations in Liberia* John Wiley & Sons As a collection of essays that explore innovations to encourage reduction in homeowner energy use, this volume reflects a confluence of ideas and initiatives rather than a narrow look at what a single, particular line of academic literature suggests might be possible to shape homeowner behavior. Not only do

the contributors represent a wide array of institutions and backgrounds, but the very intellectual infrastructure that encouraged and allowed the summit that inspired this book itself represents a conscious effort to facilitate multidisciplinary and interdisciplinary collaboration for the purpose of addressing salient societal concerns. With this volume, we hope to provide a source of ideas for behavior change that will appeal to a range of people charged with curbing residential energy use through communication-based intervention.

Beyond the Core Career Examination HR Professional's guide to creating a strategically sustainable organization Employees are central to creating sustainable organizations, yet they are left on the sidelines in most sustainability initiatives along with the HR professionals who should be helping to engage and energize them. This book shows business leaders and HR professionals how to: motivate employees to create economic, environmental and social value; facilitate necessary culture, strategic and organizational change; embed sustainability into the employee lifecycle; and strengthen existing capabilities and develop new

ones necessary to support the transformation to sustainability. Talent, Transformation, and the Triple Bottom Line also demonstrates how leading companies are using sustainability to strengthen core HR functions: to win the war for talent, to motivate and empower employees, to increase productivity, and to enliven traditional HR-related efforts such as diversity, health and wellness, community involvement and volunteerism. In combination, these powerful benefits can help drive business growth, performance, and results. The book offers strategies, policies, tools and specific action steps that business leaders and HR professionals can use to get into the sustainability game or enhance their efforts dramatically.

Andrew Savitz is an expert in sustainability and has worked extensively with many organizations on sustainability strategy and implementation; he and Karl Weber wrote *The Triple Bottom Line*, one of the most successful books in the field. Published in partnership with SHRM and with the cooperation of the World Business Council for Sustainable Development, *Forward* by Edward Lawler III. This book fills a gaping hole in both the HR and sustainability literature by educating HR professionals about sustainability, sustainability professionals about HR, and business leaders about how to marry the two to accelerate progress on both fronts.

This book reviews the history of the United States-Liberia relations from the early 1820s to 2015, with particular attention paid to the role of the US armed forces. Contrary to most literature on the genesis and development of Liberia, this book demonstrates how US military power has been the primary influence shaping Liberia's history. This

includes the role played by the US military in the founding of Liberia, the protection of the country during the European formal colonial era, multiple covert operations in securing US-friendly administrations in Liberia, and direct military interventions when necessary to secure American interests in the region.
