## GLOVER HALLIE

**BilArid. 12 ways to learn Arabic** Sabarish Muralikrishnan

A fascinating exploration of the historical and cultural development of the French language from the bestselling authors of *Sixty Million Frenchmen Can't Be Wrong*. Imagine a language that is watched over by a group of forty "Immortals," a language with rules so complex that few people ever completely master it, whose status as the world's lingua franca has been declining for two centuries, whose use in global institutions is waning and whose speakers are so insecure they pass laws banning the use of other languages and spend millions of tax-payers' dollars to make sure it gets used in literature, music and film. Now imagine a language that is second only to English for the number of countries where it is spoken officially, surpassing both Spanish or Arabic, a language that is the official tongue of two G-7 countries and three European nations, that is employed alongside English in most international institutions and that is the number-two choice of language students across the planet - a language with two million teachers and 100 million students worldwide, and whose number of speakers has tripled in the last fifty years. This paradox is the backdrop for *The Story of French*, in which bilingual Canadian authors Jean-Benoît Nadeau and Julie Barlow unravel the mysteries of a language that has maintained its global influence in spite of the ascendancy of English. Mixing historical analysis with journalistic observation, and drawing on their experiences living in and travelling to French-speaking countries, they explore how the French language developed over the centuries, how it came to be spoken in the Americas, Africa and Asia, and how it has maintained its global appeal.

*Language Policy and Planning in the Mediterranean World* is a collection of the best papers presented at the MedLPLP conference held at the University of Cyprus in 2009, enriched with invited contributions on the same topic. The book presents a panorama of situations with countries such as France, Germany, Cyprus, Malta, Italy, Spain, Poland, Turkey, Greece, Bulgaria, Albania, Romania and Serbia. It explores various aspects of the weight and ecology of the Mediterranean languages, discusses LPP in the light of international law and the protection of human rights, bilingual education and foreign language acquisition policies. It also addresses the issue of feminization in a broad range of Mediterranean languages comparing French, Italian, Spanish, and, for the first time, Standard and Cypriot Greek. Finally, the book also discusses language revival and renovation policies, language planning in the public space, as well as cases of micro-language management. The volume is an excellent source of information for scholars and students of LPP interested in the synchrony and diachrony of Mediterranean languages, in aspects of LPP activity in various Mediterranean countries and in specific LPP processes involving several languages within the area.

The contributions to this volume cover a broad range of issues in language policy that are hotly debated in every corner of the globe. The articles included investigate the implications of language policies on the notion of language rights as the issues are played out in very specific circumstances □ from the courtroom in Australia to the legislature in California to the educational system in England to the administrative practices of the European Commission. The authors explore conflicts between basic conceptions of fairness in justice, administration and education on the one hand, and political and economic realities on the other. Articles focus on language issues in the United States, Canada, Brazil, England, France, Slovakia, Russia, Sri Lanka, Australia and several African states. Other articles consider the implications of new supernational agreements □ the European Union, NAFTA, GATT, the OAU □ on language issues in the signatory states. In sum the volume offers an extensive presentation of current issues and practices in language policy and linguistic human rights.

In 1664, French Jesuit Louis Nicolas arrived in Quebec. Upon first hearing Ojibwe, Nicolas observed that he had encountered the most barbaric language in the world--but after listening to and studying approximately fifteen Algonquian languages over a ten-year period, he wrote that he had "discovered all of the secrets of the most beautiful languages in the universe." *Unscripted America* is a study of how colonists in North America struggled to understand, translate, and interpret Native American languages, and the significance of these languages for theological and cosmological issues such as the origins of Amerindian populations, their relationship to Eurasian and Biblical peoples, and the origins of language itself. Through a close analysis of previously overlooked texts, *Unscripted America* places American Indian languages within transatlantic intellectual history, while also demonstrating how American letters emerged in the 1810s through 1830s via a complex and hitherto unexplored engagement with the legacies and aesthetic possibilities of indigenous words. *Unscripted America* contends that what scholars have more traditionally understood through the Romantic ideology of the noble savage, a vessel of antiquity among dying populations, was in fact a palimpsest of still-living indigenous populations whose presence in American literature remains traceable through words. By examining the foundation of the literary nation through language, writing, and literacy, *Unscripted America* revisits common conceptions regarding "early america" and its origins to demonstrate how the understanding of America developed out of a steadfast connection to American Indians, both past and present.

A FINALIST FOR THE PULITZER PRIZE NAMED A BEST BOOK OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW, SMITHSONIAN, AND WALL STREET JOURNAL A major reimagining of how evolutionary forces work, revealing how mating preferences—what Darwin termed "the taste for the beautiful"—create the extraordinary range of ornament in the animal world. In the great halls of science, dogma holds that Darwin's theory of natural selection explains every branch on the tree of life: which species thrive, which wither away to extinction, and what features each evolves. But can adaptation by natural selection really account for everything we see in nature? Yale University ornithologist Richard Prum—reviving Darwin's own views—thinks not. Deep in tropical jungles around the world are birds with a dizzying array of appearances and mating displays: Club-winged Manakins who sing with their wings, Great Argus Pheasants who dazzle prospective mates with a

four-foot-wide cone of feathers covered in golden 3D spheres, Red-capped Manakins who moonwalk. In thirty years of fieldwork, Prum has seen numerous display traits that seem disconnected from, if not outright contrary to, selection for individual survival. To explain this, he dusts off Darwin's long-neglected theory of sexual selection in which the act of choosing a mate for purely aesthetic reasons—for the mere pleasure of it—is an independent engine of evolutionary change. Mate choice can drive ornamental traits from the constraints of adaptive evolution, allowing them to grow ever more elaborate. It also sets the stakes for sexual conflict, in which the sexual autonomy of the female evolves in response to male sexual control. Most crucially, this framework provides important insights into the evolution of human sexuality, particularly the ways in which female preferences have changed male bodies, and even maleness itself, through evolutionary time. *The Evolution of Beauty* presents a unique scientific vision for how nature's splendor contributes to a more complete understanding of evolution and of ourselves.

A masterpiece of linguistics scholarship, at once erudite and entertaining, confronts the thorny question of how—and whether—culture shapes language and language, culture. Linguistics has long shied away from claiming any link between a language and the culture of its speakers: too much simplistic (even bigoted) chatter about the romance of Italian and the goose-stepping orderliness of German has made serious thinkers wary of the entire subject. But now, acclaimed linguist Guy Deutscher has dared to reopen the issue. Can culture influence language—and vice versa? Can different languages lead their speakers to different thoughts? Could our experience of the world depend on whether our language has a word for "blue"? Challenging the consensus that the fundamentals of language are hard-wired in our genes and thus universal, Deutscher argues that the answer to all these questions is—yes. In thrilling fashion, he takes us from Homer to Darwin, from Yale to the Amazon, from how to name the rainbow to why Russian water—a "she"—becomes a "he" once you dip a tea bag into her, demonstrating that language does in fact reflect culture in ways that are anything but trivial. Audacious, delightful, and field-changing, *Through the Language Glass* is a classic of intellectual discovery.

67 texts, including hymns, manifestos, articles or extracts from lengthy studies exemplify the relation between Romanticism and the national movements in the cultural space ranging from Poland to the Ottoman Empire. Each text is accompanied by a presentation of the author, and by an analysis of the context in which the respective work was born. The end of the 18th century and first decades of the 19th were in many respects a watershed period in European history. The ideas of the Enlightenment and the dramatic convulsions of the French Revolution had shattered the old bonds and cast doubt upon the established moral and social norms of the old corporate society. In culture a new trend, Romanticism, was successfully asserting itself against Classicism and provided a new key for a growing number of activists to 're-imagine' their national community, reaching beyond the traditional frameworks of identification (such as the 'political nation', regional patriotism, or Christian universalism). The collection focuses on the interplay of Romantic cultural discourses and the shaping of national ideology throughout the 19th century, tracing the patterns of cultural transfer with Western Europe as well as the mimetic competition of national ideologies within the region.
