### **The Case for Marriage** Simon and Schuster

Early in his campaign, Donald Trump boasted that 'I know words. I have the best words', yet despite these assurances his speech style has sown conflict even as it has powered his meteoric rise. If the Trump era feels like a political crisis to many, it is also a linguistic one. Trump has repeatedly alarmed people around the world, while

exciting his fan-base with his unprecedented rhetorical style, shock-tweeting, and weaponized words. Using many detailed examples, this fascinating and highly topical book reveals how Trump's rallying cries, boasts, accusations, and mockery enlist many of his supporters into his alternate reality. From Trump's relationship to the truth, to his use of gesture, to the anti-immigrant tenor of his language, it illuminates the less obvious mechanisms by which language in the Trump era has widened divisions along lines of class, gender, race, international relations, and

even the sense of truth itself.

A Conspiratorial Life Simon and Schuster

"Topical, engaging, personable, and above all, reassuring." -Dr. Jordan B. Peterson, author of 12 Rules for Life  
From host of The Rubin Report, the most-watched talk show about free speech and big ideas on YouTube right now, a roadmap for free thinking in an increasingly censored world. The left is no longer liberal. Once on the side of free speech and tolerance, progressives now ban speakers from college campuses, "cancel" people who aren't up to date on the latest genders, and force religious people to violate their conscience. They have abandoned the battle of ideas and have begun fighting a battle of feelings. This uncomfortable truth has turned moderates and true

liberals into the politically homeless class. Dave Rubin launched his political talk show The Rubin Report in 2015 as a meeting ground for free thinkers who realize that partisan politics is a dead end. He hosts people he both agrees and disagrees with--including those who have been dismissed, deplatformed, and despised--taking on the most controversial issues of our day. As a result, he's become a voice of reason in a time of madness. Now, Rubin gives you the tools you need to think for yourself in an age when tribal outrage is the only available alternative. Based on his own story as well as his experiences from the front lines of the free speech wars, this book will empower you to make up your own mind about what you believe on any issue and teach you the fine art of:

Checking your facts, not your privilege, when it comes to today's most pervasive myths, from the wage gap and gun violence to climate change and hate crimes. Standing up to the mob against today's absurd PC culture, when differences of opinion can bring relationships, professional or personal, to a sudden end. Defending classically liberal principles such as individual rights and limited government, because freedom is impossible without them. The Progressive Woke Machine is waging war against the last free thinkers in the world. Don't Burn This Book is the definitive account of our current political upheaval and your guide to surviving it. *Ohio* Henry Holt and Company  
'A breakthrough book. Wonderfully applicable to everything in life, and

funny as hell.' Nassim Nicholas Taleb  
Why is Red Bull so popular – even though everyone hates the taste? Why do countdown boards on platforms take away the pain of train delays? And why do we prefer stripy toothpaste? Discover the alchemy behind original thinking, as TED Talk superstar and Ogilvy advertising legend Rory Sutherland reveals why abandoning logic and casting aside rationality is the best way to solve any problem. In his first book he blends cutting-edge behavioural science, jaw-dropping stories and a touch of branding magic on his mission to turn us all into idea alchemists. He shows how economists, businesses and governments have got it all wrong: we are not rational creatures who make logical decisions based on evidence.

Instead, the big problems we face every day, whether as an individual or in society, could very well be solved by thinking less logically. To be brilliant, you have to be irrational.

#1 NEW YORK TIMES BESTSELLER It was never supposed to be this close. And of course she was supposed to win. How Hillary Clinton lost the 2016 election to Donald Trump is the riveting story of a sure thing gone off the rails. For every Comey revelation or hindsight acknowledgment about the electorate, no explanation of defeat can begin with anything other than the core problem of Hillary's campaign--the candidate herself. Through deep access to insiders from the top to the bottom of the campaign, political writers Jonathan

Allen and Amie Parnes have reconstructed the key decisions and unseized opportunities, the well-intentioned misfires and the hidden thorns that turned a winnable contest into a devastating loss. Drawing on the authors' deep knowledge of Hillary from their previous book, the acclaimed biography *HRC*, *Shattered* offers an object lesson in how Hillary herself made victory an uphill battle, how her difficulty articulating a vision irreparably hobbled her impact with voters, and how the campaign failed to internalize the lessons of populist fury from the hard-fought primary against Bernie Sanders. Moving blow-by-blow from the campaign's difficult birth through the bewildering terror of election night, *Shattered* tells an unforgettable story

with urgent lessons both political and personal, filled with revelations that will change the way readers understand just what happened to America on November 8, 2016.

Crown

The first full-scale biography of Robert Welch, who founded the John Birch Society and planted some of modern conservatism's most insidious seeds. Though you may not know his name, Robert Welch (1899-1985)—founder of the John Birch Society—is easily one of the most significant architects of our current political moment. In *A Conspiratorial Life*, the first full-scale biography of Welch, Edward H. Miller delves deep into the life of an overlooked figure whose ideas nevertheless reshaped the American right. A child prodigy who entered

college at age 12, Welch became an unlikely candy magnate, founding the company that created Sugar Daddies, Junior Mints, and other famed confections. In 1958, he funneled his wealth into establishing the organization that would define his legacy and change the face of American politics: the John Birch Society. Though the group's paranoiac right-wing nativism was dismissed by conservative thinkers like William F. Buckley, its ideas gradually moved from the far-right fringe into the mainstream. By exploring the development of Welch's political worldview, *A Conspiratorial Life* shows how the John Birch Society's rabid libertarianism—and its highly effective grassroots networking—became a profound, yet often ignored or derided

influence on the modern Republican Party. Miller convincingly connects the accusatory conservatism of the midcentury John Birch Society to the inflammatory rhetoric of the Tea Party, the Trump administration, Q, and more. As this book makes clear, whether or not you know his name or what he accomplished, it's hard to deny that we're living in Robert Welch's America.

**#1 NEW YORK TIMES BESTSELLER!** At one of the most chaotic periods in American history, in a time of national distrust and despair, one tanned TV host holds the key to the future. In *How I Saved the World*, Jesse Watters takes readers on a tour of his life from basement-dwelling Fox minion to pampered champion of right-thinking Americans. He has divined great truths

about the nature of our country while stumbling across beaches asking oblivious college students basic political questions and while stumbling out of Air Force One with the President.

Interspersed are his thoughtful suggestions for overcoming left-wing radicalism, maintaining American democracy, moving beyond aging hippies (like his long-suffering, loving parents), saving the world from social justice warriors and the deep state—all while smirking his way through life in only the nicest way. Watters outlines the stark choice ahead of us between all-American hamburgers and leftist Green New Deal breadlines (okay, maybe that one is a no-brainer) and shows the way for order and fairness to be restored. A manifesto and a call-to-arms from a man

for all seasons, *How I Saved the World* is a hilarious, enlightening, entertaining book with a reasonable chance of winning a Nobel Prize in every category, even chemistry.

#### Irons in the Fire HarperCollins

A provocative exploration of the tension between our evolutionary history and our modern woes—and what we can do about it. We are living through the most prosperous age in all of human history, yet we are listless, divided, and miserable. Wealth and comfort are unparalleled, but our political landscape is unmoored, and rates of suicide, loneliness, and chronic illness continue to skyrocket. How do we explain the gap between these truths? And how should we respond? For evolutionary biologists Heather Heying and Bret Weinstein, the

cause of our troubles is clear: the accelerating rate of change in the modern world has outstripped the capacity of our brains and bodies to adapt. We evolved to live in clans, but today many people don't even know their neighbors' names. In our haste to discard outdated gender roles, we increasingly deny the flesh-and-blood realities of sex—and its ancient roots. The cognitive dissonance spawned by trying to live in a society we are not built for is killing us. In this book, Heying and Weinstein draw on decades of their work teaching in college classrooms and exploring Earth's most biodiverse ecosystems to confront today's pressing social ills—from widespread sleep deprivation and dangerous diets to damaging parenting styles and back-

ward education practices. Asking the questions many modern people are afraid to ask, *A Hunter-Gatherer's Guide to the 21st Century* outlines a science-based worldview that will empower you to live a better, wiser life.

From decorated Green Beret sniper, UFC headliner, and all around badass, Tim Kennedy, a rollicking, inspirational memoir offering lessons in how to embrace failure and weather storms, in order to unlock the strongest version of yourself. Tim Kennedy has a problem; he only feels alive right before he's about to die. Kennedy, a Green Beret, decorated Army sniper, and UFC headliner, has tackled a bull with his bare hands,

jumped out of airplanes, dove to the depths of the ocean, and traveled the world hunting poachers, human traffickers, and the Taliban. But he's also the same man who got kicked out of the police department, fire department, and as an EMT, before getting two women pregnant four days apart, and finally, been beaten up by his Special Forces colleagues for, quite simply, "being a selfish asshole." In *Scars and Stripes*, Kennedy describes how these failures shaped him into the successful businessman and devoted husband and father he is today. Through unbelievably vivid, wild anecdotes Kennedy reveals all the dumb, violent, embarrassing, and undeniably heroic things he's done in his life, including multiple combat missions in Afghanistan, building a school in

Texas for elementary kids, and creating two-multimillion-dollar businesses. You will learn that failure isn't the end—rather it's the first step towards unearthing the best version of yourself and finding success, no matter how overwhelming the setbacks may feel.

Scars and Stripes Simon and Schuster

Do you trust the liberal media? While the tabloid and right-wing press - the Sun, The Times, the Mail and the Express - are constantly criticised for dangerous bias, outlets like the BBC and the Guardian are trusted by their readers to report in the interests of the public. However, the reality is that all corporate media is systematically filtered by the powerful interests that own, manage and fund it. Propaganda Blitz shows that the corporate media does not just 'spin' the news - it fundamentally distorts everything it touches, hiding the real issues from public view, and often completely reversing the truth. This book uncovers a storm of top-down campaigns behind war reporting from

Iraq, Syria and Palestine, as well as the destruction of the credibility of figures on the left, including Jeremy Corbyn, Russell Brand and Hugo Chavez.

Exposing propagandists at the top levels of the BBC, as well as their reporting on the Scottish independence referendum, the dismantling of the NHS and looming climate chaos, Propaganda Blitz explains the real meaning of 'objective' journalism, exposes the fake news about 'fake news' and outlines a model for anti-business media activism.

Here is the antidote to the left's sinister push to use a worldwide crisis to infuse our lives with the values of colossal statism and dystopian self-hatred, all accelerated by the duplicitous manipulation of the recent pandemic. From the nationally best-selling author of

The Politically Incorrect Guide to Climate Change. Welcome to 2030. I own nothing, have no privacy, and life has never been better. This is the vision of the Great Reset, according to globalist leaders. While proponents of the Great Reset push slogans like “Build Back Better,” “The Fourth Industrial Revolution,” and “A New Normal,” the Reset is nothing short of a rebranded Soviet system, threatening to strip away property rights, restrict freedom of movement and association, and radically reshape our diets and way of life. In *The Great Reset: Global Elites and the Permanent Lockdown*, bestselling author and ClimateDepot.com publisher, Marc Morano, unveils the origins of the Great Reset, who is behind it, how it is being implemented, and how COVID-19 and

the alleged “climate emergency” accelerated its imposition on the United States. Packed with telling statistics and damning quotes, *The Great Reset* is the essential handbook for the public, the media, and activists on how to critically analyze and expose the tyrannical policies silently strangling our liberties today.

This is a print on demand edition of a hard to find publication. Hurricane Katrina, in Aug. 2005, was the costliest hurricane as well as one of the five deadliest storms in U.S. history. It caused extensive destruction along the Gulf coast from central Florida to Texas. Some 22,000 Active-Duty Army personnel assisted with relief-and-

recovery operations in Mississippi and Louisiana. At the same time, all 50 states sent approx. 50,000 National Guard personnel to deal with the storm's aftermath. Because the media coverage of this disaster tended toward the sensational more than the analytical, many important stories remain to be told in a dispassionate manner. This study offers a dispassionate analysis of the Army's response to the natural disaster by providing a detailed account of the operations in Louisiana and Mississippi.

From the host of Tucker Carlson Tonight on Fox News and the New York Times bestselling author of Ship of Fools, a

collection of nostalgic writings that underscore America's long slide from innocence to orthodoxy. Thirty years ago, Tucker Carlson got his first job out of college fact checking for a quarterly magazine, and he went on to write for many other publications before becoming the primetime Fox News host he is today. In *The Long Slide*, Tucker delivers a few of his favorite pieces—annotated with new commentary and insight—to memorialize the tolerance and diversity of thought that the media used to celebrate instead of punish. In snapshots spanning the 1990s to today, he'll take you on a visit to Africa with Al Sharpton and members of the Nation of Islam to stop the civil war in Liberia in 2003, inside the (not-so-) secret armies of Operation Iraqi

Freedom, and on the campaign trail with Donald Trump in 2016. In case you missed it the first time around, you'll also learn about the aesthetic merits of British colonialism, the second shift at a baked bean factory, the unexpected charm of James Carville, and the simple

beauty of rural western Maine. With his signature wit and 20/20 hindsight, Tucker investigates in this patriotic and memorable collection a question on all of our minds: Has America really changed that much in recent decades? The answer is, unequivocally, yes.
