My name is Lucky the dog the stuffed animal who once lived in London Physical Therapy Clinic for many years and has not had another friend to spend time with me. Those who find new places to live have more new friends. By Denise Pinch Pg 14 to Pg 20 Book One

Animal-Assisted Therapy in Counseling
HarperCollins

It is a story of an unusual dog who started off life as an ugly, unwanted mutt in Western Canada, discarded by persons unknown but won the hearts of everyone he came into contact with. One animal shelter attendant drove him across Canada, perhaps she was going that way, and brought him to a no-kill shelter in Ontario in the hopes he would find a forever home. It is told, first of all, from the dog's point of view, then by his mom who needs to tell the world about this gentleman dog, hoping perhaps that people generally will understand that dogs do think and feel.

Madeline Finn and the Therapy Dog
Penguin

A delightfully warm, encouraging story of a young girl and the special library dog who helps her develop patience, acceptance, and confidence as she learns to read, from award-winning author-illustrator Lisa Papp. Madeline Finn does NOT like to read. But she DOES want a gold star from her teacher. Except stars are for good readers, for understanding words, and for saying them out loud—things that Madeline Finn doesn't believe she can do. Fortunately, Madeline Finn finds a little help when she meets Bonnie, a library dog. Reading out loud to Bonnie isn't so bad, and when Madeline Finn gets stuck, Bonnie doesn't mind. As it turns out, it's

fun to read when you're not afraid of making mistakes. Bonnie teaches Madeline Finn that it's okay to go slow—and, most importantly, to keep trying. Lisa Papp offers an inspiring and comforting story, perfect for new readers who just need a little confidence to overcome their fears.

The Lucky Story Jason Aronson, Incorporated

A lonely giraffe teams up with the nine playful monkeys.

Dogs & Human Health Academic Press
Toby, a pet therapy dog, and Miss Charmaine visit Mrs. Johnson's class, where Miss Charmaine tells the children how Toby dealt with a dog who bullied him, teaching them about the importance of kindness, respect, acceptance, and being considerate of others.

Wayward Angels Balboa Press
An honest and deeply moving debut memoir about a young woman's battle with depression and how her dog saved her life A New York Times Bestseller "Dog Medicine simply has to be your next must-read." —Cheryl Strayed At twenty-two, Julie Barton collapsed on her kitchen floor in Manhattan. She was one year out of college and severely depressed. Summoned by Julie's incoherent phone call, her mother raced from Ohio to New York and took her home. Haunted by troubling childhood memories, Julie continued to sink into suicidal depression. Psychiatrists, therapists, and family tried to intervene, but nothing reached her until the day she decided to do one hopeful thing: adopt a Golden Retriever puppy she named Bunker. Dog Medicine captures the anguish of depression, the slow path to recovery, the beauty of forgiveness, and the astonishing ways animals can help heal even the most broken hearts

and minds.

Lucky Big Adventure Holiday House

What if you could significantly improve your physical and mental health by taking a simple step that's easy, rewarding, and fun? Dr. Milena Penkowa says you can do that and more by owning a dog and yet people continue to invest time and money in costly treatments before even considering a furry friend. Dogs can stave off diseases and certain cancers, erase pain, and ease anxiety, depression, allergies, diabetes, and cardiovascular disorders. Over the long term, they can also reduce the burden of dementia, epilepsy, stroke, Parkinson's disease, schizophrenia and autism. This guidebook explains the scientifically proven benefits of dogs, and you'll learn how dogs: change the human brain so it reacts and thinks differently; improve the immune system to make you more resilient than dog-deprived individuals; boost and invigorate the human spirit and secure happiness; promote a life of longevity and healthiness. Stop looking for fancy remedies to physical and mental problems, and start looking for a dog wagging its tail. Tap into a natural method to survive and thrive by learning about the fascinating connections between Dogs & Human Health.

Good Dog Taylor & Francis

Archer Douglas Jones is a real dog. He is a five-year-old golden retriever who likes to eat, play, and sleep upside down. Archer is a Therapy Dog and is trained to provide comfort and support to people in hospitals, schools, retirement homes, and disasters. Archer has earned his AKC certificates for Canine Good Citizen, and Tricks certificates from Novice to Performer. He can shake hands, high five, roll over, spin in circles, and go get his favorite stuffed animal. Archer is the

inspiration for this book. Archer's Hats is a story about what he would do if he wore some of his favorite hats. We hope you enjoy this book, use your imagination and play along with Archer.

ASPCA kids: Pet Rescue Club: Too Big to Run Gallery Books

Madeline Finn finds a new way to help more dogs and read more stories, in this latest book from award-winning author-illustrator Lisa Papp. After Madeline Finn meets library dog Bonnie, she asks her mother for a puppy of her own every single day. Finally, Mom says yes, and Madeline Finn chooses Star, one of Bonnie's puppies. Then Bonnie's owner, Mrs. Dimple, tells Madeline Finn about animal shelters—places many other pets come from. A visit to their local shelter leads Madeline Finn to ask some questions. Does anyone play with the shelter dogs, or snuggle with them, or read to them? Questions lead to answers, and ideas, and soon Madeline Finn and her human and animal community discover there are lots of ways for small people to make a big difference. Award-winning author-illustrator Lisa Papp offers a kind, empathetic exploration of life in an animal shelter in this perfect story for dog lovers, pet adoption and rescue advocates, and young readers learning how to make a difference through community service.

Interest in the field of human-animal interactions is burgeoning, and researchers and educators are keen to understand the science undergirding research that helps us understand interactions between people and animals. Recently, exciting and innovative research is focusing on how people's virtual interactions with animals

can enhance their learning, social interactions, and well-being. This research aims to answer questions such as, "What types of interactions do people have with animals in a virtual context? How do people access and experience their virtual interactions with animals? Do virtual interactions with animals hold potential to enhance people's well-being and learning in the same way that in-person interactions with animals have been documented? What educational strategies could be employed to enhance people's virtual interactions with animals? How can we respect animals as research participants within a virtual context?" Drawing from seminal and cutting-edge research in the field of human-animal interactions, these questions and others are answered in *Virtual Human-Animal Interactions*. Research-informed and grounded in critical discussions of theory and practice, this book challenges readers to reconceptualize their understanding of research and practice exploring the complexities inherent in, and arising from, people's virtual interactions with animals. Further, with an eye to the future, this book illuminates readers' thinking around the empirical and practical implications of facilitating interactions between people and animals within virtual contexts. Researchers and educators from across disciplines will find *Virtual Human-Animal Interactions* both scientifically savvy and practical.

The third edition of *Animal-Assisted Therapy in Counseling* is the most comprehensive book available dedicated to training mental health practitioners in the performance of animal assisted therapy in counseling (AAT-C). New to this edition is discussion of the human-animal relational theory, a new theory

dedicated to the practice of AAT-C. This edition also has added applications for supervision and includes the most recent research and practice. Consistent with previous editions, a variety of animal-assisted interventions are described with case examples provided in a variety of settings with different types of animals. This unique resource is an indispensable guide for any counselor or psychotherapist looking to develop and implement AAT techniques in practice.

Madeline Finn is training her dog Star to become a therapy dog. Will they pass the test? A beautiful story of empathy, perseverance, and community from Lisa Papp. Madeline Finn and Star are off to Walker Oaks, a retirement community where Star will take his tests to become a therapy dog. Accompanied by Mom, Mrs. Dimple, and Bonnie the library dog, Madeline and Star make their way through a variety of challenges and meet several new friends. But Madeline Finn can't stop thinking about an elderly man in a wheelchair who never smiles. Is there something she and Star can do to help? Author-illustrator Lisa Papp's empathetic, feel-good story explores the therapy dog training process and provides a realistic and appealing example of a young person making a difference. Paired with warm, gentle illustrations, this book is ideal for social emotional learning and discussions about self-esteem, volunteering, community, and—of course—therapy animals.

Toby, the Pet Therapy Dog, Says Be a Buddy Not a Bully Simon and Schuster

Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post

An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover:

- How you can get your dog to come when called by acting less like a primate and more like a dog
- Why the advice to “get dominance” over your dog can cause problems
- Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief
- How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!”

Fascinating,

insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

This book provides an overview of Animal-Assisted Activities (AAA) and Animal-Assisted Therapy (AAT) and demonstrates how they can be incorporated into solution-focused treatment programs. Pichot, focusing on the use of therapy dogs, starts with a discussion of the basics of AAA/T and solution-focused therapy, as well as what every practitioner should know about dogs before partnering with them. Successfully combining all of this into an effective treatment program is considered next. Pichot draws upon her own experience developing an AAA/T program in the substance abuse counseling program at a county public health agency to illustrate the effective implementation of such a program and the struggles and lessons learned in doing so. Using AAA/T with special populations, cultural considerations, and the impact a therapy dog can have on the handler. New in this edition are client scenarios that demonstrate the therapist’s thought process when making clinical decisions about when and how to use a therapy dog. Sample forms and treatment plans are also provided that professionals can use to modify or structure in their work with clients. The concepts and information provided in this valuable guide will be helpful for any therapist regardless of whether he or she is in private practice or working in an agency setting.

Comet’s Tale Houghton Mifflin Harcourt

A National INDIE Excellence Awards winner for Children’s Non-Fiction Books

All the proceeds from this book go

directly to Joey's PAW, a 501(c)3 nonprofit that raises money to provide rescue organizations and shelters with wheelchairs and prosthetics to make it easier for dogs to be adopted. Joey's PAW then assists the individual dog owner in getting their dogs up and moving again. (www.JoeyPaw.org) This true story is about one of those dogs, Boone, a young beagle who lost his hind legs because of abuse. He is rescued from a shelter by a generous family who gives him mobility by fitting him with a wheelchair. Boone thrives in his new loving home and is thrilled to be trained as a therapy dog, helping people overcome anxiety and bringing happiness to many. The story is geared toward children to learn about overcoming adversity but teaches valuable lessons for all ages.

The Other End of the Leash LP Media Inc

The Waltham Book of Human-Animal Interaction: Benefits and Responsibilities of Pet Ownership discusses the scientific study of the relationship between man and animals, focusing on the behavior of companion animals, and how humans and animals affect each other's behavior. This first half of this book discusses research on benefits that have been found to accumulate from associations with animals, and the role of animals in care and therapy program. The responsibilities toward the animals kept, and how to enhance their care and welfare are considered in the next chapters. The human response to pet loss is also elaborated. This publication is beneficial to veterinary students and individuals concerned with the study of human-animal interactions.
