 "The Breakaway" is a must have resource for any parent or provider looking for a concrete and realistic approach for guiding their neurodiverse teen into young adulthood. Inspired by the many families with whom the author has worked, the title refers to these, teens/developing young adults, as they face the challenge of taking greater initiative and responsibility for themselves. This practical and relatable guide is designed to help parents develop a plan and strategy appropriate for their specific circumstance. Through the use of real-world case studies and practical suggestions parents will learn to personalize their approach to include well-timed and purposeful nudges forward - promoting progress, not power struggles. Setting goals, creating game plans; staying engaged, but flexible; winning their Breakaway's trust and cooperation; maintaining a strong

relationship even when the inevitable conflicts arise. How do you inspire your Breakaway? How high should goals be set? When should you reassess the plan? How do you provide helpful feedback? When should you intervene and when should you resist the impulse to panic? These are all things that are discussed. The book has been broken down into the major components of a winning strategy. Parents will learn to evaluate their Breakaway's Readiness For Change, the importance of setting the correct Expectations and giving good Feedback, dealing with the awkwardness of Identity Development, creating a culture of Accountability, allowing for the Resilience factor, projecting Commitment, as well as their own learning curve as parent, and the Human Experience. At the end of each chapter there are questions so the reader can apply the issues raised to gain insight into their Breakaway, and their development. By writing down answers and keeping a journal/notebook it is possible to work through and return to observations, thoughts and feelings at each stage of the process. This is essential to the creation and maintenance of an effective plan and strategy. At the end of the book there is a sample of such a journal, with an expanded case study. This added resource provides an additional point of reference, and is a great example of what another family implemented when faced with similar challenges.

If a Christian wants to share his life with a younger believer, where does he begin? It is my aim to give an answer to this question in this manual. Specifically, I have a burden for the young Christian men in college. They are out from under the watchful eye of the parents, perhaps for the first time in their lives. They will be given ample opportunities to see if their faith is real. Often they will listen to a stranger if he shows genuine interest in their spiritual wellbeing

Over the past decade prominent fundamentalist psychologists and ministers have advised parents to return to authoritarian discipline techniques of parenting that include hitting and spanking. These practices have been challenged in *Your Kids, Their Lives: A Parent's Guide to Raising Happy, Competent, Caring Children*, by Malinda Jo Muzi. This author proposes that most of the information parents are getting about parenting is inaccurate or silly, and often downright harmful. In relying on the work of the most distinguished researchers in child development over the past 40 years, she directs parents toward techniques that have proven to be most advantageous to parents and children. This "how-to" book helps parents build a solid foundation of trust and respect between themselves and

their children. It gives them the information they need to raise contented children who are creative and productive, and concerned about the welfare of others. A special feature of the book includes parenting experiences from the lives of prominent people, including Bill Clinton, Carly Simon, Douglas MacArthur, and Stephen Spielberg.
