National Geographic Science 1-2 (Earth Science: Sun, Moon and Stars) National Geographic Books

Discover secrets and science behind medieval machines, jet packs, movie magic, and everything in between.

**The Sciencebook** National Geographic Learning

A stunning visual reference book for little geologists who love to find fascinating rocks all around them. Identify colorful

gemstones, sparkly crystals, the toughest rocks, and ancient fossils. Packed with fun facts, information, and extensive photos all about the rocks and minerals that make up the world around us. Interactive learning that engages young scholarly minds. Learn about 64 different types of rocks and minerals, how to tell the difference between them and where to find them. Dig into all the interesting geological materials from deep space to the deepest caves. You'll even discover glow in the dark minerals and living gems! Find out about the stuff our world is made of, and how rocks and minerals form over

time. This captivating book introduces children to hands-on science with fun activities like starting your own impressive rock collection and how to stay safe on your rock finding missions. Written for kids aged 6 to 9 with bite-sized information and explanations. The easy-to-understand language gives them a rock-solid foundation for science subjects. The geology book includes the phonetic pronunciation of the rock and mineral names so your little one will sound like a rock expert in no time. Rockin' It With Stones And Minerals - Stunning high-quality photographs. - Inspiring activities

for little Earth scientists. - Over 64 types of rocks, their properties, and how they are formed.

**National Geographic Science 1-2 (Life Science: Life Cycles)** National Geographic Books

Offers an illustrated encyclopedia of general science, with informative and fun facts on a broad array of scientific topics.

**National Geographic Science 1-2 (Life Science: Life Cycles)** National Geographic Learning

A comprehensive visual reference offering facts from all major fields of science is organized into six sections--the universe, planet Earth, biology, chemistry, physics, and mathematics--and includes timelines, sidebars, and cross-references.

**National Geographic Science 1-2 (Life Science: Habitats)** National Geographic Learning

Ever wanted to take apart the microwave to see how it works? Crack open your computer and peek inside? Intrigued by how things work? So are we! That's why we're dissecting all kinds of things from rubber erasers to tractor beams! Read along as National Geographic Kids unplugs, unravels, and reveals how things

do what they do. Complete with "Tales from the Lab," true stories, biographies of real scientists and engineers, exciting diagrams and illustrations, accessible explanations, trivia, and fun features, this cool book explains it all!

*Become Expert at the Market* National Geographic Learning

Build kinetic sculptures with LEGO! Make up to 10 LEGO models and games using elements included in the book and papercraft pieces around themes like a swimming shark, hungry praying mantis and robo game show. STEM content throughout the book shows how the models relate to topics from gear ratio to biomimicry in robotics design.

*Science Encyclopedia* National Geographic Books

Natural phenomena, revolutionary inventions, scientific facts, and the most up-to-date questions are all explained in detailed text that is complemented by visually arresting graphics. Six major sections are further broken down into subsections that encompass everything from microscopic life to nuclear power.

*National Geographic Science 4* National Geographic Learning

Though the Earth's outermost shell is comprised of tectonic plates that are constantly shifting underneath our feet, the ground is usually quiet and still. But sometimes, an earthquake violently rocks the ground or an explosive volcanic blast causes destruction to surrounding areas. Yet despite the potential devastating effects, earthquakes and volcanoes also help create the land people live on. *Earthquakes and Volcanoes* explains what triggers earthquakes and volcanic eruptions, where on Earth they are most likely to occur, how they happen, and how examining disasters of the past can make people safer in the future during these events.

*National Geographic Science 1-2 (Physical Science: Properties)* National Geographic Learning

"This book explains the science behind all the machines, gadgets, systems, and processes we take for granted. The perfect book for techies--young or old, male or female--who read *Popular Science* and *Wired* or watch "How It Works" and "How It's Made."

*National Geographic Science 1-2 (Physical Science: Pushes and Pulls)* National

Geographic Learning

"Experiments for young children to conduct to learn about science"--

**National Geographic Science 1-2 (Physical Science: Pushes and Pulls)**

National Geographic Learning

This lively introduction to the fascinating world of science explores the different kinds of science, what scientists do, and the amazing things that scientists study: animals and plants; oceans and space; earthquakes and volcanoes; sound and light; inventions and more! Make sure kids' first experience of the wonders of science is a thrilling eye-opener with this

fun reference book. Fun activities, games, and simple experiments encourage interactive learning, showing kids that anyone can use scientific observation and experimentation to be a scientist and discover new things. With bright images and age-appropriate text, this book inspires kids to be curious, ask questions, and explore the world around them and maybe even grow up to be a scientist one day, too! Topics include astronomy, botany, paleontology, malacology (that's the science of clams, snails, and other animals with shells!), zoology, and more. *Mega Science* Penguin
