DoD Digital Modernization Strategy Military Bookshop

This publication is about winning in combat. Winning requires many things: excellence in techniques, an appreciation of the enemy, exemplary leadership, battlefield judgment, and focused combat power. Yet these factors by themselves do not ensure success in battle. Many armies, both winners and losers, have possessed many or all of these attributes. When we examine closely the differences between victor and vanquished, we draw one conclusion. Success went to the armies whose leaders, senior and junior, could best focus their efforts-their skills and their resources-toward a decisive end. Their success arose not merely from excellence in techniques, procedures, and material but from their leaders' abilities to uniquely and effectively combine them. Winning in combat depends upon tactical leaders who can think creatively and act decisively.

Navy Irregular Warfare and Counterterrorism Operations Naval Institute Press

The Commandant's Planning Guidance (CPG) provides the 38th Commandant's strategic direction for the Marine Corps and mirrors the function of the Secretary of Defense's Defense Planning Guidance (DPG). It serves as the authoritative document for Service-level planning and provides a common direction to the Marine Corps Total Force. It also serves as a road map describing where the Marine Corps is going and why; what the Marine Corps force development priorities are and are not; and, in some instances, how and when prescribed actions will be implemented. This CPG serves as my

Commandant's Intent for the next four years. As Commandant Neller observed, "The Marine Corps is not organized, trained, equipped, or postured to meet the demands of the rapidly evolving future operating environment." I concur with his diagnosis. Significant change is required to ensure we are aligned with the 2018 National Defense Strategy (NDS) and DPG, and further, prepared to meet the demands of the Naval Fleet in executing current and emerging operational naval concepts. Effecting that change will be my top priority as your 38th Commandant. This CPG outlines my five priority focus areas: force design, warfighting, education and training, core values, and command and leadership. I will use these focal areas as logical lines of effort to frame my thinking, planning, and decision-making at Headquarters Marine Corps (HQMC), as well as to communicate to our civilian leadership. This document explains how we will translate those focus areas into action with measurable outcomes. The institutional changes that follow this CPG will be based on a long-term view and singular focus on where we want the Marine Corps to be in the next 5-15 years, well beyond the tenure of any one Commandant, Presidential administration, or Congress. We cannot afford to retain outdated policies, doctrine, organizations, or force development strategies. The coming decade will be characterized by conflict, crisis, and rapid change - just as every decade preceding it. And despite our best efforts, history demonstrates that we will fail to accurately predict every conflict; will be surprised by an unforeseen crisis; and may be late to fully grasp the implications of rapid change around us. The Arab Spring, West African Ebola Outbreak, Scarborough Shoal standoff, Russian invasion of eastern Ukraine, and weaponization of social media are but a few recent examples illustrating the point. While we must accept an environment characterized by uncertainty, we cannot ignore strong signals of change nor be complacent when it comes to designing and preparing the force for the future. What is abundantly clear is that the future operating environment will place heavy demands on our Nation's Naval Services.

Context and direction is clearly articulated in the NDS and DPG as well as testimony from our uniformed and civilian leadership. No further guidance is required; we are moving forward. The Marine Corps will be trained and equipped as a naval expeditionary force-in-readiness and prepared to operate inside actively contested maritime spaces in support of fleet operations. In crisis prevention and crisis response, the Fleet Marine Force - acting as an extension of the Fleet - will be first on the scene, first to help, first to contain a brewing crisis, and first to fight if required to do so. The Marine Corps will be the "force of choice" for the President, Secretary, and Combatant Commander - "a certain force for an uncertain world" as noted by Commandant Krulak. No matter what the crisis, our civilian leaders should always have one shared thought - Send in the Marines.

Marine Corps Personnel Assignment Policy Createspace Independent Publishing Platform

Discusses the U.S. Navy's proposed FY 2010 budget requests funding for eight new Navy ships. This total includes two relatively expensive, high-capability combatant ships (a Virginia-class attack submarine and a DDG-51 class Aegis destroyer) and six relatively inexpensive ships (three Littoral Combat Ships [LCSs], two TAKE-1 auxiliary dry cargo ships, and one Joint High Speed Vessel [JHSV]). Concerns about the Navy's prospective ability to afford its long-range shipbuilding plan, combined with year-to-year changes in Navy shipbuilding plans and significant cost growth and other problems in building certain new Navy ships, have led to concerns about the status of Navy shipbuilding and the potential future size and capabilities of the fleet. Illus.

Warfighting Pen and Sword Military

Full color publication with photographs. A first of its kind, this book-of, by, and for the noncommissioned officer and petty officer-is a comprehensive explanation of the enlisted leader across the U.S. Armed Services. It complements The Armed Forces Officer, the latest edition of which was published by NDU Press in 2007, as well as the Services' NCO/PO manuals and handbooks. Written by a team of Active, Reserve, and retired senior enlisted leaders from all Service branches, this book defines and describes how NCOs/POs fit into an organization, centers them in the Profession of Arms, explains their dual roles of complementing the officer and enabling the force, and exposes their international engagement. As Chairman of the Joint Chiefs of Staff General Martin E. Dempsey writes in his foreword to the book, "We know noncommissioned officers and petty officers to have exceptional competence, professional character, and soldierly grit-they are exemplars of our Profession of Arms." Aspirational and fulfilling, this book helps prepare young men and women who strive to become NCOs/POs, re-inspires serving enlisted leaders, and stimulates reflection by those who have retired from or left active service. It also gives those who have never worn the uniform a better understanding of who these exceptional men and women are, and why they are properly known as the "Backbone of the Armed Forces."

U.S. Army Recruiting Command is faced with the challenge of ensuring that the flow of qualified volunteers is adequate to meet future active-duty accession requirements. This report documents research methods, findings, and policy conclusions from a project analyzing human resource management options for improving recruiting production. It details research designed to develop new insights to help guide future recruiter management policies.

Air Force Handbook 1 Vigeo Press

Volume 5, Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

Forgotten Warriors DIANE Publishing

In the years the years following the terrorist attacks of September 11, 2001, the Navy has carried out a variety of irregular warfare (IW) and counterterrorism (CT) activities. Among the most readily visible of these were operations carried out by Navy sailors serving ashore in the Middle East and Afghanistan, and the May 1-2, 2011, U.S. military operation in Abbottabad, Pakistan, that killed Osama bin Laden. During these years, the Navy took certain actions intended to improve its IW capabilities. For example, the Navy established the Navy Expeditionary Combat Command (NECC) informally in October 2005 and formally in January 2006. NECC consolidated and facilitated the expansion of a number of Navy organizations that have a role in IW operations. The Navy also established the Navy Irregular Warfare Office in July 2008, and published a vision statement for irregular warfare in January 2010. The Navy during these years also reestablished its riverine force and initiated The Global Maritime Partnership, which was a U.S. Navy initiative to achieve an enhanced degree of cooperation between the U.S. Navy and foreign navies, coast guards, and maritime police forces, for the purpose of ensuring global maritime security against common threats. In addition, the Southern Partnership Station (SPS) and the Africa Partnership Station (APS) were Navy ships, such as amphibious ships or high-speed sealift ships, that deployed to the Caribbean and to waters off Africa, respectively, to support U.S. Navy engagement with countries in those regions, particularly for purposes of building security partnerships with those countries and for increasing the capabilities of those countries for performing maritime-security operations.

Naval Aviation Vision Rand Corporation

With an executive order from President Franklin Roosevelt in 1941, the United States Marine Corps--the last all-white branch of the U.S. military--was forced to begin recruiting and enlisting African Americans. The first black recruits received basic training at the segregated Camp Montford Point, adjacent to Camp Lejeune, near Jacksonville, North Carolina. Between 1942 and 1949 (when the base was closed as a result of President Truman's 1948 order fully desegregating all military forces) more than 20,000 men trained at Montford Point, most of them going on to serve in the Pacific Theatre in World War II as members of support units. This book, in conjunction with the documentary film of the same name, tells the story of these Marines for the first time. Drawing from interviews with 60 veterans, *The Marines of Montford Point* relates the experiences of these pioneers in their own words. From their stories, we learn about their reasons for enlisting; their arrival at Montford Point and the training they received there; their lives in a segregated military and in the Jim Crow South; their experiences of combat and service in World War II, Korea, and Vietnam; and their legacy. The Marines speak with flashes of anger and humor, sometimes with sorrow, sometimes with great wisdom, and always with a pride fostered

by incredible accomplishment in the face of adversity. This book serves to recognize and to honor the men who desegregated the Marine Corps and loyally served their country in three major wars.

This United States Marine Corps USMC manual, Marine Corps Doctrinal Publication MCDP 1-4 Competing December 2020, is designed to be read from cover to cover. This publication does not contain specific techniques or procedures we should adopt. Rather, it provides broad guidance in the form of concepts, with illustrations intended to stimulate thinking and encourage additional learning. It requires judgment in application.

Commandant's Planning Guidance Univ of North Carolina Press

The purpose of this order is to implement DoD policy and provide definitive guidance on the assignment and permanent change of station (PCS) of Marines.

Weapon Systems Handbook Createspace Independent Publishing Platform

This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than its predecessor volume, U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era.

Navy Force Structure and Shipbuilding Plans Createspace Independent Publishing Platform

The global threat landscape is constantly evolving and remaining competitive and modernizing our digital environment for great power competition is imperative for the Department of Defense. We must act now to secure our future. This Digital Modernization Strategy is the cornerstone for advancing our digital environment to afford the Joint Force a competitive advantage in the modern battlespace. Our approach is simple. We will increase technological capabilities across the Department and strengthen overall adoption of enterprise systems to expand the competitive space in the digital arena. We will achieve this through four strategic initiatives: innovation for advantage, optimization, resilient cybersecurity, and cultivation of talent. The Digital Modernization Strategy provides a roadmap to support implementation of the National Defense Strategy lines of effort through the lens of cloud, artificial intelligence, command, control and communications and cybersecurity. This approach will enable increased lethality for the Joint warfighter, empower new partnerships that will drive mission success, and implement new reforms enacted to improve capabilities across the information enterprise. The strategy also highlights two important elements that will create an enduring and outcome driven strategy. First, it articulates an enterprise view of the future where more common foundational technology is delivered across the DoD Components. Secondly, the strategy calls for a Management System that drives outcomes through a metric driven approach, tied to new DoD CIO authorities granted by Congress for both technology budgets and standards. As we modernize our digital environment across the Department, we must recognize now more than ever the importance of collaboration with our industry and academic partners. I expect the senior leaders of our Department, the Services, and the Joint Warfighting community to take the intent and guidance in this strategy and drive implementation to achieve results in support of our mission to Defend the Nation.

Mcdp 1-3 Tactics U.S. Government Printing Office

July 2019 Printed in BLACK AND WHITE The Army's Weapon Systems Handbook was updated in July 2019, but is still titled "Weapon Systems Handbook 2018." We are printing this in black and white to keep the price low. It presents many of the acquisition programs currently fielded or in development. The U.S. Army Acquisition Corps, with its 36,000 professionals, bears a unique responsibility for the oversight and systems management of the Army's acquisition lifecycle. With responsibility for hundreds of acquisition programs, civilian and military professionals collectively oversee research, development and acquisition activities totaling more than \$20 billion in Fiscal Year 2016 alone. Why buy a book you can download for free? We print this so you don't have to. We at 4th Watch Publishing are former government employees, so we know how government employees actually use the standards. When a new standard is released, somebody has to print it, punch holes and put it in a 3-ring binder. While this is not a big deal for a 5 or 10-page document, many DoD documents are over 400 pages and printing a large document is a time-consuming effort. So, a person that's paid \$25 an hour is spending hours simply printing out the tools needed to do the job. That's time that could be better spent doing mission. We publish these documents so you can focus on what you are there for. It's much more cost-effective to just order the latest version from Amazon.com. SDVOSB If there is a standard you would like published, let us know. Our web site is usgovpub.com

Small Wars Manual Naval Institute Press

"Prepared for the Office of the Secretary of Defense"--Title page.

When the Tempest Gathers Hachette UK

#1 NEW YORK TIMES BESTSELLER • A clear-eyed account of learning how to lead in a chaotic world, by General Jim Mattis—the former Secretary of Defense and one of the most formidable strategic thinkers of our time—and Bing West, a former assistant secretary of defense and combat Marine. “A four-star general’s five-star memoir.”—The Wall Street Journal Call Sign Chaos is the account of Jim Mattis’s storied career, from wide-ranging leadership roles in three wars to ultimately commanding a quarter of a million troops across the Middle East. Along the way, Mattis recounts his foundational experiences as a leader, extracting the lessons he has learned about the nature of warfighting and peacemaking, the importance of allies, and the strategic dilemmas—and short-sighted thinking—now facing our nation. He makes it clear why America must return to a strategic footing so as not to continue winning battles but fighting inconclusive wars. Mattis divides his book into three parts: Direct Leadership, Executive Leadership, and Strategic Leadership. In the first part, Mattis recalls his early experiences leading Marines into battle, when he knew his troops as well as his own brothers. In the second part, he explores what it means to command thousands of troops and how to adapt your leadership style to ensure

your intent is understood by your most junior troops so that they can own their mission. In the third part, Mattis describes the challenges and techniques of leadership at the strategic level, where military leaders reconcile war's grim realities with political leaders' human aspirations, where complexity reigns and the consequences of imprudence are severe, even catastrophic. Call Sign Chaos is a memoir of a life of warfighting and lifelong learning, following along as Mattis rises from Marine recruit to four-star general. It is a journey about learning to lead and a story about how he, through constant study and action, developed a unique leadership philosophy, one relevant to us all.

From One Leader to Another Open Road + Grove/Atlantic

Tells the story of the unsung heroes of the Korean War--the 1st Provisional Marine Brigade. This remarkable air-ground unit shipped out only six days after its creation and activation--and yet won every one of its engagements and helped secure the Pusan Perimeter.

The Marines of Montford Point US Naval Institute Press

Marine Corps Warfighting Publication MCWP 3-10, MAGTF Ground Operations November 2017 Marine Corps Warfighting Publication (MCWP) 3-10, MAGTF Ground Operations, provides the doctrinal basis for the planning and execution of ground combat operations within the Marine air-ground task force (MAGTF). It establishes a common reference on how the ground combat element (GCE) plans, task-organizes, trains, deploys, and is employed for operations. This publication is the keystone for all ground combat-oriented publications, but it does not provide detailed tactics, techniques, and procedures for specific ground combat organizations. It incorporates validated lessons learned from the last 13 years of conflict and operations and provides the link between the tactics, techniques, and procedures of subordinate publications and Service-level doctrine. This publication is intended for Marine Corps leaders of every military occupational specialty and is recommended for commanders and planners assigned to the joint force. It concentrates primarily on the GCE's warfighting capabilities as the MAGTF's decisive maneuver force in the conduct of ground combat, including maritime expeditionary operations and subsequent sustained combat operations. Its contents are relevant to all elements of the MAGTF. This publication supersedes MCWP 3-10, Ground Combat Operations, dated 4 April 1995.

Political Warfare Prometheus Books

These are the combat experiences of the first Marine to command a special operations task force, recounted against a backdrop of his journey from raw Second Lieutenant to seasoned Colonel and Task Force Commander; from leading Marines through the streets of Mogadishu, Baghdad, Fallujah and Mosul to directing multi-national special operations forces in a dauntingly complex fight against a formidable foe. The journey culminates in the

story's centerpiece: the fight against ISIS, in which the author is able to use the lessons of his harsh apprenticeship to lead the SOF task force under his command to hasten the Caliphate's eventual demise. Milburn has an unusual background for a US Marine, and this is no ordinary war memoir. Very few personal accounts of war cover such a wide breadth of experience, or with so discerning a perspective. As Bing West comments: "His exceptional skill is telling each story of battle and then knitting them into a coherent whole. By the end of the book, the reader understands what happened on the ground in the wars against terrorists over the past twenty years." Milburn tells his extraordinary story with self-effacing candor, describing openly his personal struggles with the isolation of command, post-combat trauma and family tragedy. And with the skill and insight of a natural story teller, he makes the reader experience what it's like to lead those who fight America's wars.

The Last Stand of Fox Company Random House Trade Paperbacks

MCDP 1 WARFIGHTING Since Fleet Marine Force Manual 1, Warfighting, was first published in 1989, it has had a significant impact both inside and outside the Marine Corps. That manual has changed the way Marines think about warfare. It has caused energetic debate and has been translated into several foreign languages, issued by foreign militaries, and published commercially. It has strongly influenced the development of doctrine by our sister Services. Our current naval doctrine is based on the tenets of maneuver warfare as described in that publication. Current and emerging concepts such as operational maneuver from the sea derive their doctrinal foundation from the philosophy contained in Warfighting. Our philosophy of warfighting, as described in the manual, is in consonance with joint doctrine, contributing to our ability to operate harmoniously with the other Services.

First to Fight Government Printing Office

In telling the story of the extraordinary contributions of the U.S. Marines in World War I, this now-classic history examines the Corps' entire experience in France. Now available in paperback, the book is a valuable resource for data, especially details about each unit and how they functioned. Bolstered with information from official documents as well as published and unpublished memoirs, readers follow the Marines from their recruitment, through training and shipment overseas, to the horrors of trench warfare. The famous battle at Belleau Wood is fully examined, along with the lesser known campaigns at Blanc Mont and Meuse River, and the critical engagements at Verdun, Marbache, and St. Mihiel. Readers learn how the 4th Marine Brigade earned the nickname "Devil Dogs" and why their experiences helped forge the Corps' identity. It is a new addition to the Leatherneck Classics series.
