MCKAYLA SAUL

The Lorax The Curious Kid's Science Book
“A companion to *Mechanica*, this work continues the fractured Cinderella, steampunk, and faerie mash-up” from the New York Times bestselling author (School Library Journal). The young

inventor Nicolette Lampton is living her own fairy-tale happy ending. She’s free of her horrible stepfamily, running a successful business, and is uninterested in marrying the handsome prince, Fin. Instead, she, Fin, and their friend Caro venture to the lush land of Faerie, where they seek to put an end to the bloody war

their kingdom is waging. Mechanical armies and dark magic await them as they uncover devastating secrets about the past and fight for a real, lasting happily-ever-after for two troubled countries—and for themselves. Smart and unconventional, this novel will appeal to readers of romance and adventure alike. “As clever as the heroine’s invented boot polishers and sewing machines, as appealing as the dresses designed by her coal-powered automaton horse.”—Kirkus Reviews (starred review) “Fans of the first book will enjoy the more deeply developed characters in this book, and new readers can begin here easily as there is sufficient

backstory provided. Steampunk fans will find much to love here, particularly the regal metal flying horse named Jules that gives the book its most heartbreakingly reflective moment.”—VOYA

D-Day: The World War II Invasion That Changed History
Page Street Publishing
Using simple, everyday items found around the house, Play These Games will inspire kids and the young at heart with a spectrum of ingenious games to make and play so they’ll never be bored again!

- Gather family photos to create a personalized set of Go Fish cards
- Grab loose buttons for button golf, shuffle button, and button hockey
- Unleash your inner pinball wizard with a

clothespin and cardboard box version of the arcade classic

- Get out the hula hoops and brooms for a backyard jousting tournament
- Try one of fifteen variations of the classic game of Tag

Whether it's competitive or cooperative, for large groups or duos, the games in this clever guide are fun to create and a blast to play.

The Roll-Away

Pumpkin Pikachu Press

For fans of the How to Babysit... series by Jean Reagan, a perfect guide for children with parents who just won't sleep! No one likes going to bed.

Especially when you're not even tired. You want to stay up and have all sorts of fun adventures! But take a look at your parents.

They're really tired. They're exhausted. But they just won't go to bed! Help them put down the cell phones, turn off the TV, stop cleaning the dishes, and go to bed! You might be small, but you can handle this task. Follow the instructions in this book and you'll have them snoring in no time. Mylisa Larsen teams up with Babette Cole, author-illustrator of Princess Smartypants and Dr. Dog, to present a bedtime story like you've never seen before! Larsen's tongue-in-cheek bedtime story about a role reversal between parents and a child pairs perfectly with Cole's hilarious and bright watercolor illustrations.

Rubber Band Loom

Crafts RH Childrens Books

When his beloved jack-o'-lantern starts to decompose, Tim puts it outside and watches it transform from pumpkin—to seed—to pumpkin again. The first pumpkin Tim ever carved was fierce and funny, and he named it Jack. When Halloween was over and the pumpkin was beginning to rot, Tim set it out in the garden and throughout the weeks he watched it change. By spring, a plant began to grow! Will Hubbell's gentle story and beautifully detailed illustrations give an intimate look at the cycle of life.

The Glass Castle

Simon and Schuster Build 11 machines, includes all the LEGO bricks you need. From the 'practical' (a

mechanical hand to pick things up for you) to the intriguing (a machine that makes crinkled paper) to the flat-out ridiculous (astronaut training for your mini-figures!), these projects encourage kids to explore the possibilities hidden in their LEGO collection. Inspires open-ended creativity to not just build the models in this book, but also to experiment with their own modifications to be faster, more accurate, or more complex.

Mechanica (bk 1)

Barefoot Books

Welcome to the world's smallest circus—starring the Tender Tiny Peas—in this charming, one-of-a-kind fantasy that reveals there can be much more to a child's dinnertime than meets

the adult eye. This is the perfect book for every parent who has ever tried to get a toddler to eat and every toddler who has refused.

Mama Panya's Pancakes

The Innovation Press

A triumphant tale of a young woman and her difficult childhood, *The Glass Castle* is a remarkable memoir of resilience, redemption, and a revelatory look into a family at once deeply dysfunctional and wonderfully vibrant. Jeannette Walls was the second of four children raised by anti-institutional parents in a household of extremes.

Break the Siege Page Street Publishing

When Jake can't sleep his parents allow him to climb into bed with them. Now they can't

sleep. Something must be done.

How to Put Your Parents to Bed Random House Books for Young Readers

Calling all pumpkin chuckers, wannabe marauders, and tinkerers of all ages! Flinging things and playing at defending your own castle has never been more fun. Whether playing at defending their own castle or simply chucking pumpkins over a fence, wannabe marauders and tinkerers will become fast acquainted with Ludgar the War Wolf, III Neighbor, Cabulus, and the Wild Donkey—ancient artillery devices known commonly as catapults. Updated and improved instructions and diagrams illustrate how to build 10

authentic working model catapults, including an early Greek ballista, a Roman onager, and the apex of catapult technology, the English trebuchet. Additional projects include learning how to lash and make rope and how to construct and use a hand sling and a staff sling. Building these simple yet sophisticated machines introduces fundamentals of math and physics using levers, force, torsion, tension, and traction. The colorful history of siege warfare is explored through the stories of Alexander the Great and his battle of Tyre; Saladin, Richard the Lionheart, and the Third Crusade; pirate-turned-soldier Jon Crabbe and his ship-mounted

catapults; and Edward I of England and his battle against the Scots at Stirling Castle. For the legions of Tolkien fans, budding backyard warriors, and engineering wizards, this book is a must-have.

The Big Book of Makerspace Projects: Inspiring Makers to Experiment, Create, and Learn Leisure Arts

When a family on a sailing outing gets stuck in a surprise storm, there's only one boat tough enough to handle the rocking waves and howling winds: Blue Boat! Completing the primary-colored series of books that have won fans across the country, the team behind RED TRUCK and YELLOW COPTER present their third rhyming book about a

vehicle who saves the day.

Awareness Chicago Review Press Celebrate Earth Day with Dr. Seuss and the Lorax in this classic picture book about sustainability and protecting the environment! I am the Lorax. I speak for the trees. Dr. Seuss's beloved story teaches kids to treat the planet with kindness and stand up and speak up for others. Experience the beauty of the Truffula Trees and the danger of taking our earth for granted in a story that is timely, playful, and hopeful. The book's final pages teach us that just one

small seed, or one small child, can make a difference. Printed on recycled paper, this book is the perfect gift for Earth Day and for any child—or child at heart—who is interested in recycling, advocacy, and the environment, or just loves nature and playing outside. Unless someone like you cares a whole awful lot, nothing is going to get better. It's not.

Start-to-finish, fun projects for makers of all types, ages, and skill levels! This easy-to-follow guide features dozens of DIY, low-cost projects that will arm you with the skills necessary to dream up and build your own creations.
The Big Book of Makerspace Projects: Inspiring Makers to Experiment, Create, and Learn offers practical tips for beginners and open-

ended challenges for advanced makers. Each project features non-technical, step-by-step instructions with photos and illustrations to ensure success and expand your imagination. You will learn recyclables hacks, smartphone tweaks, paper circuits, e-textiles, musical instruments, coding and programming, 3-D printing, and much, much more! Discover how to create:

- Brushbot warriors, scribble machines, and balloon hovercrafts
- Smartphone illusions, holograms, and projections
- Paper circuits, origami, greeting cards, and pop-ups
- Dodgeball, mazes, and other interesting Scratch games
- Organs, guitars, and percussion instruments
- Sewed

LED bracelets, art cuffs, and Arduino stuffie

- Makey Makey and littleBits gadgets
- Programs for plug-and-play and Bluetooth-enabled robots
- 3D design and printing projects and enhancements

The Art of the Catapult
Albert Whitman & Company

Packed with spectacular superlatives, shocking stats, fantastic facts and fun figures, *Science and Stuff* celebrates the simple joy in finding things out. What can cats teach us about the laws of physics? Why was cabbage banned on the International Space Station? (Can you fart in space?) And would a penny dropped from the Empire State Building really kill someone? (Short

answer: No!)But it's not all facts and stats. The feature chapter just for Makers, introduced by our very own mad professor Burnaby Q. Orbax, challenges you to attempt record-breaking science experiments at home, from the fastest Mentos & Soda rocket car to the most slime thrown and caught in a minute!Join us as we rise from the deepest depths of the ocean, where weird glowing fish hunt in the darkness, to the mountaintop observatories where scientists unravel the secrets of the universe.

The Train to Impossible Places: A Cursed Delivery

Chicago Review Press
A collection of craft ideas for kids that create a minimum of mess.

Guinness World Records: Science and Stuff

Hungry Tomato ®

What happens if you water plants with juice? Where can you find bacteria in your house? Is slug slime as strong as a glue stick? How would your child find the answers to these questions? In The Curious Kid's Science Book, your child will learn to design his or her own science investigations to determine the answers! Children will learn to ask their own scientific questions, discover value in failed experiments, and — most importantly — have a blast with science. The 100+ hands-on activities in the book use household items to playfully teach important science,

technology, engineering, and math skills. Each creative activity includes age-appropriate explanations and (when possible) real life applications of the concepts covered. Adding science to your at-home schedule will make a positive impact

on your child's learning. Just one experiment a week will help build children's confidence and excitement about the sciences, boost success in the classroom, and give them the tools to design and execute their own science fair projects.
