We all aspire to live a long and healthy life and know that staying active is critical to achieving this goal. Usually, we think that we physically peak at around the age of 20. That is what most physical trainers, athletes but mainly the media are going to tell you and they are not wrong. It is just what they are used to seeing. Most gymnasts or Olympic athletes that we see usually reach their prime in their late teens or early twenties. Taking Usain Bolt as an example; he had been earning gold medals in several world championships ever since he was 15 but it was in the 2008 Beijing Olympics that he lit up the world stage when he broke the world record for the 100-meter sprint. Since then he has progressed on to break his own record and earn consecutive gold medals in the 2012 and 2016 Olympics, up until he was 30, after which he retired.

Hundreds of medical studies have shown the spectacular health benefits of meditation. Now Tiffany Cruikshank, founder of Yoga Medicine, puts that scientific research to good, practical use by incorporating easy-to-use, targeted meditations into a unique weight-loss programme. This 21-day plan optimizes health as well as body image by tapping the hidden strength of the mind. We learn a whole new way to lose weight and it takes just a few relaxing and energizing minutes a day. Learn: • How to get started: advice for new meditators (no weird positions or chants required) • 3, 5, 7 and 10 minute meditations that bust cravings, break self-defeating habits, stress-proof the body and reboot the brain • What to eat - and the top 5 foods to consider avoiding • How to continue your success after your 21-day retreat • Bonus: 10 stress-relieving, cardio-revving yoga exercises to complement the plan Each day of the plan in *Meditate Your Weight* helps you explore and release what's weighing you down physically, emotionally and mentally - the mental blocks, thoughts, habits and behaviours that stand in your way - to make it easier to think more clearly, make better choices and maximize metabolism. As you lighten up on the inside, you'll lighten up on the outside!

The ketogenic diet has gained in popularity, but that has led to some bad information being shared.

You can do keto right, and you can do keto wrong. This book is all about how to do keto the right way! Despite what health science has beaten into us over the last fifty or so years, humans thrive on high-fat, low-carb diets. Millions of people around the world have discovered that a ketogenic lifestyle is the key to weight loss, disease prevention and intervention, and a more vibrant life. Gone are the days of constant hunger and low energy. This book leads you on a path to better health, a slimmer waistline, elimination of cravings, and endless energy. Craig and Maria Emmerich have partnered to write a book that digs deep into the science of ketogenic dieting, explaining how dozens of diseases can be cured or controlled through keto and how ketogenic diets are fueling a new breed of athlete—all in an easy-to-understand way that breaks down the complicated science for you. Keto is the definitive resource to the ketogenic lifestyle. Inside, you'll learn • How you can beat cancer, obesity, metabolic syndrome, coronary artery disease, high cholesterol, Alzheimer's, dementia, ADHD, anxiety, and depression into submission by making some simple yet impactful changes to your diet • How cholesterol and diabetes medications could very well be making you sicker rather than better • How generations of bad advice—designed to sell sugar, not health—has killed millions who blindly trusted the medical community and, worse still, the government to tell them the truth • How overconsumption of carbohydrates is bad for your health and could be at the root of what ails you • How changing your inputs—the foods you eat—can change your outputs, meaning your quality of life • How our bodies work, including oxidative priority, fat flux, and lipolysis, explained in such a way that everyone can understand how our bodies really process what we put into them • How inflammation is at the root of many diseases and how modern diets that are rife with sugar, carbs, and omega-6 oils are sending us to early graves • How hormones control mood swings, sex drive, blood sugar levels, muscle tone, fat-burning ability, metabolism, the immune system, and much more—and how adopting a ketogenic lifestyle can change your waistline and your life • How to stock your pantry with the right foods and make meal plans that are delicious and easy to follow and, most importantly, are the pathway to a longer, healthier life • How you can build muscle and perform at your best on a low-carb, high-fat diet (No, we're not making that up!) • Which foods are the most nutrient dense to feed our cells the vitamins and minerals they need • How to sort through the confusion and conflicting information about what a ketogenic diet is This book clears it all up, dispelling the myths of ketogenic diets. So, enjoy those healthy animal proteins. Gnaw on that rib bone. And say no to that plate of "heart-healthy" pasta. New York Times bestselling author Maria Emmerich and her husband, Craig, are going to take you on a journey to a new life—one that helps you lose weight, build muscle, and live the life nature intended you to live!

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to

meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

Escape the Dieting Trap and Transform Your Life Have you been spinning your wheels, trying diet after diet, only to lose and regain the same 10, 20, or 30 pounds over and over again? Author Ari Whitten's here to tell you that it's not your fault The common weight loss strategy of "burn more calories than you take in" will fail 95% of you in the long term, simply because this goes against your body's natural wisdom. So it's time to stop fighting against your biology and start working with your biology. "Forever Fat Loss" will show you how. Eat What You Crave and Get Leaner By the Day Sick of suffering through diets where you need to restrict fat, carbs, or calories? There is a better way. Satisfy your cravings for sweet, salty, and fatty foods, and still reach your fat loss goals effortlessly. "Forever Fat Loss" sheds light on a whole new way of eating that will keep your taste buds happy without increasing your pants size. Be inspired by the included meal plans, and stay on track with the printable daily habit checklists. Eliminate the Hidden Triggers That Are Keeping You Fat Did you know that one hour of watching television shaves more minutes off your life than one cigarette? How is your sleep affecting your waistline? Why is it that 500 calories of broccoli affects your body differently than 500 calories of processed food? The answers to these questions may hold the secret to why you can't lose weight, even if you've struggled with diet and exercise for years. "Forever Fat Loss" takes you step by step through scientifically proven methods for increasing health and shedding excess fat. Uncover the Secrets of the Fat Loss Industry Discover the real causes of the obesity epidemic that the fat loss industry never told you...because they aren't even aware of these causes themselves. Learn why people actually lose weight on low-carb diets. (Hint: it's not from restricting carbs) Find out what kind of exercise actually works and how much of it you should be doing. From magnesium and metabolism to insulin and leptin, it's all covered in this comprehensive plan that will have you working with your biology rather than against it. There's no excuse--Ari makes this plan accessible to everyone, whether you're eating the standard American diet from your couch or dashing off to a meeting as the CEO of a Fortune 500 company. Order this book today and break free from the diet trap FOREVER

Mercury is one of the world's most poisonous substances, and yet dentists routinely use it in amalgams to fill our teeth. Forty years ago, Dr. Hal Huggins questioned this practice, and now legions of dentists, researchers, and citizens are adding their voices of concern. It's All in Your Head looks at past research on mercury toxicity and dental amalgams as well as current scientific findings that can no longer be ignored. It describes the possible effects of mercury toxicity, including multiple sclerosis, Alzheimer's disease, Hodgkin's disease, Chronic Fatigue Syndrome, and virtually all autoimmune disorders. Written in easy-to-understand language, It's All in Your Head explodes the claim that mercury amalgams are safe. If you think your worries are all in your head, you may be right.

A deep dive into the underlying cellular cause of chronic fatigue, burnout, and brain fog, with a framework for restoring cognitive function, alertness, and an abundance of energy. Chronic fatigue, burnout, brain fog—no matter what we call it, our constant feeling of being drained affects all that we hold dear. There are very real culprits of our fatigue, and they don't lie in our preconceived notions of caffeine intake or adrenal fatigue, nor does the replenishment of our energy lie in overhauling our lifestyle in time-consuming and unrealistic ways. Instead, the core underlying cause lies in our cells, specifically our mitochondrial deficiency, and the solution can be found in simple, straightforward, nutritional strategies that address our body's biology. Ari Whitten, functional health practitioner and creator of The Energy Blueprint program, takes you on a deep dive of our cellular energy centers, illuminating the clear nutritional methodologies and specific foods, supplements, and compounds you can use to:

- Get better sleep
- Lower your blood pressure
- Help stabilize your blood sugar levels
- Lose excess weight
- Improve memory and concentration
- Increase mental well-

being Get your body out of defense mode and into a state of optimal performance to live at the peak of your energy, brain function, mood, and health.

If there were a pill that was scientifically proven to help you look 10 years younger, lose fat, improve hormonal health, fight pain and inflammation, increase strength/endurance, heal faster, improve your brain health and increase your energy levels, it would be a billion-dollar blockbuster drug. Hundreds of millions of people would be told to start taking it by their doctors every day. And doctors all over the world would call it a "miracle drug." Here's the crazy part: That "drug" exists. But it's not a pill. It's red light therapy! Did you know that light has the power to heal your body and optimize your health? Of course, everyone knows about the importance of vitamin D from sunlight (from UV light). But few are aware that there is another type of light that may be just as vital to our health - red and near-infrared light. Think it's all just hype? Think again! Believe it or not, there are

now over 3,000 peer-reviewed scientific studies showing incredible health and anti-aging benefits of red and near-infrared light therapy. But it gets even better... While you used to have to spend \$100 or more to get treatments done in a medical or anti-aging clinic (where this technology has been used for decades), new breakthroughs have allowed us to harness these benefits in the comfort of our own home, without the need to spend thousands on an expensive laser device or \$100 per treatment at a health/anti-aging clinic. We can now do red light therapy at home, as much as we want, at a tiny fraction of the cost. In this book, Ari Whitten - bestselling author, health expert and founder of The Energy Blueprint - cuts through all the confusion, myths and pseudoscience around this complex topic, and takes you on a deep dive into the science of how to use red/near-infrared light therapy to improve your health, your body and your life in dozens of ways. Inside this book, you'll learn how to use red/near-infrared light therapy to: - Fight skin aging, wrinkles, and cellulite and look 10 years younger - Lose fat (nearly twice as with diet and exercise alone) - Rid your body of chronic inflammation - Fight the oxidative damage that drives aging - Increase strength, endurance, and muscle mass - Decrease pain - Combat hair loss - Build resilience to stress at the cellular level - Speed up wound/injury healing - Combat some autoimmune conditions and improve hormonal health - Optimize your brain function and mood - Overcome fatigue and improve energy levels You'll also get critical information to get the best results, including: - Specific dosing guidelines for every type of treatment (and how to avoid common mistakes) - The 5 "bioactive" types of light that affect human cell function and human health - Which health issues respond best to red/near-infrared light therapy - The big mistakes people make when giving themselves red light treatments (and exactly how to do treatments to get the best results) - The best light devices to get (and why most devices on the market are a waste of money) - Exact protocols for how to use red/near-infrared light therapy for everything from fat loss, to brain optimization, to skin anti-aging Optimal light exposure habits are as essential to good health as good nutrition habits. But the big problem is that, just as many people eat diets of processed junk food and fast food, most people are eating "light diets" of "junk light" and end up with chronic "mal-illumination." This book will show you how to fix that. Red and near-infrared light therapy is one of the biggest health breakthroughs in the last half century. If you're serious about your health and improving your body, it's time to start using this powerful tool in your life. Buy this book NOW to become the healthier, happier, leaner, stronger, youthful person you've always known you could be. You deserve it! "Gilda, a twenty-something, atheist, animal-loving lesbian, cannot stop ruminating about death. Desperate for relief from her panicky mind and alienated from her repressive family, she responds to

a flyer for free therapy at a local Catholic church, and finds herself being greeted by Father Jeff, who assumes she's there for a job interview. Too embarrassed to correct him, Gilda is abruptly hired to replace the recently deceased receptionist Grace. In between trying to memorize the lines to Catholic mass, hiding the fact that she has a new girlfriend, and erecting a dirty dish tower in her crumbling apartment, Gilda strikes up an email correspondence with Grace's old friend. She can't bear to ignore the kindly old woman, who has been trying to reach her friend through the church inbox, but she also can't bring herself to break the bad news. Desperate, she begins impersonating Grace via email. But when the police discover suspicious circumstances surrounding Grace's death, Gilda may have to finally reveal the truth of her mortifying existence."--Amazon.

The Bulletproof Diet Houghton Mifflin Harcourt

Free Radicals in Biology and Medicine has become a classic text in the field of free radical and antioxidant research. Now in its fifth edition, the book has been comprehensively rewritten and updated whilst maintaining the clarity of its predecessors. Two new chapters discuss 'in vivo' and 'dietary' antioxidants, the first emphasising the role of peroxiredoxins and integrated defence mechanisms which allow useful roles for ROS, and the second containing new information on the role of fruits, vegetables, and vitamins in health and disease. This new edition also contains expanded coverage of the mechanisms of oxidative damage to lipids, DNA, and proteins (and the repair of such damage), and the roles played by reactive species in signal transduction, cell survival, death, human reproduction, defence mechanisms of animals and plants against pathogens, and other important biological events. The methodologies available to measure reactive species and oxidative damage (and their potential pitfalls) have been fully updated, as have the topics of phagocyte ROS production, NADPH oxidase enzymes, and toxicology. There is a detailed and critical evaluation of the role of free radicals and other reactive species in human diseases, especially cancer, cardiovascular, chronic inflammatory and neurodegenerative diseases. New aspects of ageing are discussed in the context of the free radical theory of ageing. This book is recommended as a comprehensive introduction to the field for students, educators, clinicians, and researchers. It will also be an invaluable companion to all those interested in the role of free radicals in the life and biomedical sciences.
