Considerable evidence from science and  
business practice suggests that a  
tremendous amount of money and effort  
is spent by organizations on designing  
and delivering training programs so that  
employees adopt and use their newly  
acquired skills and knowledge when they  
return to their jobs. A large percentage  
of that money is often wasted due to

missed opportunities to create a conducive transfer climate for workers expected to change the way they work as an outcome of training. The extensive literature on training transfer supports the existence of work environment factors that influence the application of training. The focus of this study was to explore the training transfer factors that were commonly found to be absent during technical training at credit unions. The qualitative research design, consisting of semi-structured interviews and focus groups conducted with credit union leaders and staff members, provided an in-depth view into the work environment surrounding their training events. The results from rigorous data analysis revealed multiple absent training transfer factors which when

analyzed produced four emergent themes: climate, leadership, support, and financial incentive. The themes represent the groups of factors missing within the work environment that act as enablers of transfer when present; but when missing, these factors may inhibit or dilute the transfer of knowledge. The results also suggest the presence of the overarching theme: leaders are in the most influential position to control the presence or absence of the transfer factors. Therefore, the contribution of this study to academia and practice posits the leader as the primary factor owning the accountability of creating a work environment which promotes training transfer.

This study examines a category of education and training that is not frequently put under the magnifying glass: employers practices and decision-making processes with regard to workplace education and training for lower-wage workers. It is hoped that the results of the study will both inform public policy and be of use to employers interested in enhancing the education and training that they provide to lower-wage workers.

The job market continues to change. Highly skilled and specialized workers are in demand. Traditional education cannot meet all the needs to create specialty skill workers. Certification provides up-to-date training and

development while promoting individual or professional skills and knowledge in a focused manner. Certification as a way of continuing professional education can also be more cost effective.

This is the Second Edition of THE CREDIT UNION WORLD: Theory, Process, Practice--Cases & Application. The First Edition was released just prior to the financial melt-down and the skyrocketing debt of the United States. As a result of the political and financial upheaval, both in the U.S. and abroad, it was imperative that a second edition be published at this time. Fanny Mae and Freddie Mac, federal government backed mortgages, have been a disaster in the mortgage

and housing market, leaving home owners all over America in foreclosure, underwater, or in serious distress. Since the federal government has become so intrusive into the corporate world by taking over entire industries such as automobile factories and meddling directly into the banking industry and Wallstreet in general, these issues do effect the credit union world.

*Yearbook* Human Resource Development  
This is a remarkable book. It is the real life story of a pilot of the famed 91st Bomb Group, the Memphis Belle Group, in World War II, and the missions flown in that Group by the author and his

comrades. It follows him from the time his B-17 was shot down over the German-French border, he was rescued and hidden by villagers in the tiny village of Baslieuse, then escaped through a Europe occupied by Nazi forces desperate to escape pursuing Allied armies. The book chronicles, in fascinating detail, the life and training of those young men who made up the heroic 8th Air Force, and describes the affectionate relationship often maintained by their crews with that most famed heavy bomber of all time, the fabled B-17. It includes some of the most tragic stories as well as some of the wryest humor ever written about combat groups. A heavy bomb group consists of 36 heavy bombers. The 91st lost 207 planes during its WWII combat time 32

during the author's flight tenure. Dr. Anderson uses the words of the extraordinary crews of those planes to describe the training they absorbed, the missions they flew, the results they achieved, the tragedy of watching their planes explode and their friends die, and the heroism that brought so many near fatally damaged planes home with their dead and wounded crews. Dr. James Likens taught economics at Pomona College for forty-six years. For forty-three of those years, he also directed a high-level credit union

training program, Western CUNA Management School. Along the way, Jim taught thousands of up-and-coming credit union employees, undertook credit union research, presented at professional credit union meetings, provided management consulting for struggling credit unions, facilitated strategic planning sessions, served on task forces, testified as an expert witness in legal cases, and even lobbied successfully for credit unions in the US Congress. In his memoir *Head and Heart: My Life in Credit Unions*, Jim Likens offers intriguing historical insights and an inside glimpse of key people and events in the credit-union movement of the past half-century.
