What is the boy crisis? It's a crisis of education. Worldwide, boys are 50 percent less likely than girls to meet basic proficiency in reading, math, and science. It's a crisis of mental health. ADHD is on the rise. And as boys become young men, their suicide rates go from equal to girls to six times that of young women. It's a crisis of fathering. Boys are growing up with less-involved fathers and are more likely to drop out of school, drink, do drugs, become delinquent, and end up in prison. It's a crisis of purpose. Boys' old sense of purpose—being a warrior, a leader, or a sole breadwinner—are fading. Many bright boys are experiencing a "purpose void," feeling alienated, withdrawn, and addicted to immediate gratification. So, what is The Boy Crisis? A comprehensive blueprint for what parents, teachers, and policymakers can do to help our sons become happier, healthier men, and fathers and leaders worthy of our respect.

Ernest Lyght and Johnathan Keaton are

fathers and United Methodist Bishops who have come together to share their firsthand experience of the responsibilities, trials, and joys of fatherhood. With God the Father as their example, Bishops Lyght and Keaton take a look at their own fathers, themselves as fathers, the fathers of the church and the lack of fathers in the homes of African-American families. They lift up examples given to us by Jesus of how fathers can nurture, hold accountable and affirm those around them in the same way God does.

In *The Pursuit of Happiness* Bianca C. Williams traces the experiences of African American women as they travel to Jamaica, where they address the perils and disappointments of American racism by looking for intimacy, happiness, and a connection to their racial identities. Through their encounters with Jamaican online communities and their participation in trips organized by Girlfriend Tours International, the women construct notions of racial, sexual, and emotional belonging by forming relationships with Jamaican men and other "girlfriends." These relationships allow the women to exercise agency and find happiness in ways that resist the damaging intersections of racism and patriarchy in the United States. However, while the women require a spiritual and virtual connection to Jamaica in order to live happily in the United States, their notion of happiness relies on travel, which requires leveraging their national privilege as American citizens. Williams's theorization of "emotional transnationalism" and the construction of affect across diasporic distance attends to the connections between

race, gender, and affect while highlighting how affective relationships mark nationalized and gendered power differentials within the African diaspora.

Manhattan, Thanksgiving eve, 1945. The war is over, and Eric Smythe's party was in full swing. All his clever Greenwich Village friends were there. So too was his sister Sara, an independent, outspoken young woman, starting to make her way in the big city. And then in walked Jack Malone, a U.S. Army journalist just back from a defeated Germany, a man whose world view was vastly different than that of Eric and his friends. This chance meeting between Sara and Jack and the choices they both made in the wake of it would eventually have profound consequences, both for themselves and for those closest to them for decades afterwards. Set amidst the dynamic optimism of postwar New York and the subsequent nightmare of the McCarthy era, *The Pursuit of Happiness* is a great, tragic love story; a tale of divided loyalties, decisive moral choices and the random workings of destiny.

It was a one-in-a-million chance. A bag crammed with cash comes tumbling out of the air and lands right at Damian's

feet. Suddenly the Cunningham brothers are rich. Very rich. They can buy anything they want. There's just one problem -- they have only seventeen days to spend all the money before it becomes worthless. And the crooks who stole the cash in the first place are closing in -- fast. A funny, brilliantly clever and utterly thrilling debut novel that is, quite simply, unforgettable.

In this bold and timely work, law professor Jeffrey Shulman argues that the United States Constitution does not protect a fundamental right to parent. Based on a rigorous reconsideration of the historical record, Shulman challenges the notion, held by academics and the general public alike, that parental rights have a long-standing legal pedigree. What is deeply rooted in our legal tradition and social conscience, Shulman demonstrates, is the idea that the state entrusts parents with custody of the child, and it does so only as long as parents meet their fiduciary duty to serve the developmental needs of the child. Shulman's illuminating account of American legal history is of more than academic interest. If once again we treat parenting as a delegated responsibility—as a sacred trust, not a sacred right—we will not all reach the same legal prescriptions, but we might be more willing to consider how time-honored principles of family law can effectively accommodate the evolving interests of parent, child, and state.

What do we wish most for our children? Next to being healthy, we want them to be happy, of course! Fortunately, a wide array of scientific studies show that happiness is a learned behavior, a

muscle we can help our children build and maintain. Drawing on what psychology, sociology, and neuroscience have proven about confidence, gratefulness, and optimism, and using her own chaotic and often hilarious real-world adventures as a mom to demonstrate do's and don'ts in action, Christine Carter, Ph.D, executive director of UC Berkeley's Greater Good Science Center, boils the process down to 10 simple happiness-inducing steps. With great wit, wisdom, and compassion, Carter covers the day-to-day pressure points of parenting—how best to discipline, get kids to school and activities on time, and get dinner on the table—as well as the more elusive issues of helping children build healthy friendships and develop emotional intelligence. In these 10 key steps, she helps you interact confidently and consistently with your kids to foster the skills, habits, and mindsets that will set the stage for positive emotions now and into their adolescence and beyond. Inside you will discover • the best way avoid raising a brat—changing bad habits into good ones • tips on how to change your kids' attitude into gratitude • the trap of trying to be perfect—and how to stay clear of its pitfalls • the right way to praise kids—and why too much of the wrong kind can be just as bad as not enough • the spirit of kindness—how to raise kind, compassionate, and loving children • strategies for inspiring kids to do boring (but necessary) tasks—and become more self-motivated in the process Complete with a series of “try this” tips, secrets, and strategies, *Raising Happiness* is a one-of-a-kind resource that will help you instill joy in your kids—and, in the process, become more joyful yourself.

People want to be happy. Nothing could be more obvious, and yet this common and evident goal is not as easy to achieve as it is to desire. The Christian tradition has understood happiness to be gained through relationship with God, and it has much to say about what will make us truly happy and what will not. This book examines happiness from a Christian perspective, using John Wesley as the focus of study because he understood happiness with God to be the very goal of Christian life. He also understood that Christian happiness needed to acknowledge the difficulties of life. This book seeks to learn from the wisdom of the past in order to imagine how Christians today might talk about happiness in a way that is faithful to the tradition and engages the world as well.
