Solid Waste Management (SWM) is a matter of great concern in the urban areas of developing countries. The municipal authorities who are responsible for managing municipal solid waste are unable to discharge their obligations effectively because they lack the in-house capacity to handle the complexities of the process. It is heartening to see that the World Bank has prepared this book covering all important aspects of municipal SWM in great depth. The book covers very lucidly the present scenario of SWM in urban areas, the system deficiencies that exist, and the steps that need to be taken to correct SWM practices in compliance with Municipal Solid Waste (Management and Handling) Rules 2000 ratified by the Government of India. The book shares examples of best practices adopted in various parts of the country and abroad, and very appropriately covers the institutional, financial, social, and legal aspects of solid waste

management, which are essential for sustainability of the system. It provides a good insight on how to involve the community, nongovernmental organizations, and the private sector to help improve the efficiency and cost effectiveness of the service, and shows how contracting mechanisms can be used to involve the private sector in SWM services. This book will be a very useful tool for city managers and various stakeholders who deal with municipal solid waste management in the design and execution of appropriate and cost-effective systems. Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new way... It started with the Sh*t I Do List. Tired of being the “shefault” parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is *Fair Play*: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family

actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, Fair Play helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. "Winning" this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in.

Upper Township (after being known as the Upper Precinct of Cape May County since 1723) was founded in 1798 by John Townsend, but actually, the area was first inhabited by the Lenni Lenape Indians, who lived there and hunted in the rivers and woods for food for hundreds of years. The area grew as people from New York, northern New

Jersey, and other outlying areas came to the region for its rich land and natural resources. Whaling, shipbuilding, and farming became the principal jobs. They brought their cultures and religions with them (Quakers, Baptists, Methodists, and Presbyterians), and gradually, an area of just a few villages developed into a larger township with 10 different villages. The 2010 census listed the population at 12,373 over an area of nearly 69 square miles. Residents and visitors can avail themselves of a variety of historic sites such as the Tuckahoe Train Station (1894), the Gandy Farmhouse (1815), and the restored Friendship School (1830s). In addition, there are many activities available both on land and on the Tuckahoe River, as well as the pristine beaches of Strathmere.

This regulation encompasses garrison, field, and subsistence supply operations. Specifically, this regulation comprises Army Staff and major Army command responsibilities and includes responsibilities for the Installation Management Command and subordinate regions. It also establishes policy for the adoption of an à la carte dining facility and for watercraft to provide subsistence when underway or in dock. Additionally, the regulation identifies DOD 7000.14-R as the source of meal rates for reimbursement purposes; delegates the approval authority for catered meals and host nation meals from Headquarters, Department of the Army to the Army commands; and authorizes the use of the Government purchase card for subsistence purchases when in the best interest of the Government. This regulation allows prime vendors as the source of garrison supply and pricing and provides garrison menu standards

in accordance with The Surgeon General's nutrition standards for feeding military personnel. Also, included is guidance for the implementation of the U.S. Department of Agriculture Food Recovery Program.

Dude Nailed It! Penguin
From Gemma Hartley, the journalist who ignited a national conversation on emotional labor, comes *Fed Up*, a bold dive into the unpaid, invisible work women have shouldered for too long—and an impassioned vision for creating a better future for us all. Day in, day out, women anticipate and manage the needs of others. In relationships, we initiate the hard conversations. At home, we shoulder the mental load required to keep our households running. At work, we moderate our tone, explaining patiently and speaking softly. In the world, we step gingerly to keep ourselves safe. We do this largely invisible, draining work whether we want to or not—and we never clock out. No wonder women everywhere are overtaxed, exhausted,

and simply fed up. In her ultra-viral article “Women Aren’t Nags—We’re Just Fed Up,” shared by millions of readers, Gemma Hartley gave much-needed voice to the frustration and anger experienced by countless women. Now, in *Fed Up*, Hartley expands outward from the everyday frustrations of performing thankless emotional labor to illuminate how the expectation to do this work in all arenas—private and public—fuels gender inequality, limits our opportunities, steals our time, and adversely affects the quality of our lives. More than just name the problem, though, Hartley teases apart the cultural messaging that has led us here and asks how we can shift the load. Rejecting easy solutions that don’t ultimately move the needle, Hartley offers a nuanced, insightful guide to striking real balance, for true partnership in every aspect of our lives. Reframing emotional labor not as a problem to be overcome, but as a genderless virtue men and women can all learn to channel in our quest to make a better, more egalitarian world, *Fed Up* is surprising, intelligent,

and empathetic essential reading for every woman who has had enough with feeling fed up.

Read Diane McEachern's posts on the Penguin Blog. Protecting our environment is one of the biggest issues facing our planet today. But how do we solve a problem that can seem overwhelming—even hopeless? As Diane MacEachern argues in *Big Green Purse*, the best way to fight the industries that pollute the planet, thereby changing the marketplace forever, is to mobilize the most powerful consumer force in the world—women. MacEachern's message is simple but revolutionary. If women harness the "power of their purse" and intentionally shift their spending money to commodities that have the greatest environmental benefit, they can create a cleaner, greener world. Spirited and informative, this book: - targets twenty commodities—cars, cosmetics, coffee, food, paper products, appliances, cleansers, and more—where women's dollars can make a dramatic difference; - provides easy-to-follow guidelines and lists so

women can choose the greenest option regardless of what they're buying, along with recommended companies they should support; - encourages women to spend wisely by explaining what's worth the premium price some green products cost, what's not, and when they shouldn't spend money at all; and - differentiates between products that are actually "green" and those that are simply marketed as "ecofriendly." Whether readers want to start with small changes or are ready to devote the majority of their budget to green products, MacEachern offers concrete and immediate ways that women can take action and make a difference. Empowering and enlightening, *Big Green Purse* will become the "green shopping bible" for women everywhere who are asking, "What can I do?" *Clean Water is Everybody's Business, Everybody's Need* The Floating Press

Source separation of waste and subsequent recycling processes are promising solutions on the road to a circular economy. They reduce waste disposal and the

need for resource deployment, while also producing secondary raw materials; as such, they have a significant effect on climate protection. This book presents source separation technologies and related aspects that form the basis for efficient recycling and a modern approach to waste management. It examines legislative drivers and policy aspects of adequate waste collection schemes, as well as segregation technologies and the success factors for their implementation. Summarizing the outcomes of a Sino-German workshop, the focus of this volume is mainly on the current situation in China and Germany. However, the findings are applicable to a broad range of situations and regions around the world. In addition, the book demonstrates the relevance of source separation for climate protection and describes alternative separation technologies. Given the breadth and depth of its coverage, the volume will appeal to environmental scientists, engineers, economists, waste managers and policymakers alike.

Electronic Waste Management Gareth Stevens Publishing LLLP Safe and effective management of solid waste generated by the community and governmental as well as commercial institutions is the need of the hour. This compact book describes how to avoid, minimize and manage solid waste and discusses models which, if implemented, can solve many of the current solid waste problems. The text discusses the various sources of waste generation, composition of solid waste and the need for designing a strategic plan for solid waste management. It explains the importance of public involvement, and public awareness in managing solid waste besides giving an account of solid waste management hierarchy. In addition, the text describes in detail factors to be considered while

developing a waste management programme, techniques for the recovery, reuse or recycling of solid waste, techniques of composting, and how to manage special wastes such as bio-medical waste, plastic, and e-waste. Case Studies of selected municipal corporations lend a practical flavour to the book. The book is intended as a text for B.Tech. (Civil/Chemical Engineering) and M.Tech. (Civil/Environment Engineering, Environmental Science). Besides, it will be quite handy for consultants in solid waste management, environmental engineers, and municipal corporations.

The Ascomycetes of Peninsular India is a compilation of descriptions of ascomycetous fungi collected from Peninsular India. The references to such fungi or their original publications are not available to many Indian students. This compilation bridges the gap and provides access to the descriptions. Ascomycetes form one of the large groups among fungi and show wide variations in habit, habitat, morphology, dimensions, lifecycle patterns etc. Where ever known, their anamorphs are mentioned. A total of 1410 species belonging to 403 genera distributed under 114 families are included in the compilation. The arrangement of taxa is according to the classification system in the ninth edition of *Dictionary of Fungi* (CAB, UK, 2001).

Taxonomic keys are provided. Figures are given at the end in 50 plates. Also there is an index to fungal names and glossary of mycological terms. The

present compilation includes descriptions of maximum number of such fungi from the selected area. Also it introduces techniques used for collection, preservation, preparation of common staining reagents, examination and identification. There is a separate chapter pointing out their significance as direct or indirect uses in agriculture, medicines or food, apart from their value as of academic interest. The book is useful to new comers in the field, researchers, teachers, agriculture students, and others interested in sac fungi-ascomycetes.

What if Adam and Eve Had a Diary? "He talks very little. Perhaps it is because he is not bright and is sensitive about it and wishes to conceal it. It is such a pity that he should feel so, for brightness is nothing. It is in the heart that the values lie. I wish I could

make him understand that a loving good heart is riches, and riches is enough, and that without it intellect is poverty." - Mark Twain, Eve's Diary

Mark Twain's short stories aren't about his religious beliefs. In fact, the Diaries of Adam and Eve should be taken with a grain of salt as they are humorous and witty and describe in a unique way the relationship between two human beings, man and woman who eventually end up falling in love with each other.
