Recipient of the 2017 BRONZE Winner for Education Award from Foreword Indies. Get the educational services and support your child deserves. Federal law guarantees every child a free appropriate education, and the goal of the Individualized Education Program (IEP) is to assure that every child with special needs receives what the law promises. But you know that your family must make sure the school follows through. This powerful book covers: • eligibility rules and assessments • working with outside experts • developing your child's ideal educational program • preparing for and attending IEP meetings, and • resolving disputes with school districts. The 11th edition explains the law and provides key forms, sample letters, and resources you need at every stage of the IEP process. With it, you can ensure your child gets a good education—the education your child deserves.

This book shows how schools can--and must--develop expertise in "learning variation" (understanding how different kinds of minds learn) and apply this knowledge to classroom instruction in order to address the chronic learning challenges and achievement gap faced by millions of students. Barringer shows how using what we know about learning variation with a focus on discovering learning strengths, not just deficits, can help schools create plans for success for those students who often find it elusive. The book specifically addresses how school leaders can incorporate this knowledge into instructional practice and school-level policy through various professional development strategies. Schools for All Kinds of Minds: Provides a readable synthesis of the latest research from neuroscience, cognitive science, and child and adolescent development as it relates to understanding learning and its many variations. Links this information to strategies for understanding struggling learners and adapting school practices to accommodate a wider array of learning differences in a classroom. Demonstrates how this understanding of learning variation can change the way teachers and others help students succeed in various academic and content areas and acquire necessary 21st century skills. Includes discussion questions and facilitator guidelines for staff developers and teacher education programs; downloadable forms that

accompany exercises from within the book; an action plan for schools to implement the ideas found in the book; and more.

Fans of First Day Jitters will love spending the last day of school in Mrs. Hartwell classroom. What do teachers do for summer vacation? Mrs. Hartwell's students worry that their teacher will miss them while they are gone for the summer. The class comes up with a way to make sure Mrs. Hartwell won't be too sad. But Mrs. Hartwell and the other teachers have some plans of their own. Once again Julie Danneberg and Judy Love bring to life the crazy antics of Mrs. Hartwell and her class and show that teachers and students are more alike than we sometimes think.

The Handbook of Accessible Achievement Tests for All Students: Bridging the Gaps Between Research, Practice, and Policy presents a wealth of evidence-based solutions designed to move the

assessment field beyond “universal” standards and policies toward practices that enhance learning and testing outcomes. Drawing on an extensive research and theoretical base as well as emerging areas of interest, the volume focuses on major policy concerns, instructional considerations, and test design issues, including: The IEP team’s role in sound assessment. The relationships among opportunity to learn, assessment, and learning outcomes. Innovations in computerized testing and the “6D” framework for standard setting. Legal issues in the assessment of special populations. Guidelines for linguistically accessible assessments. Evidence-based methods for making item modifications that increase the validity of inferences from test scores. Strategies for writing clearer test items. Methods for including student input in assessment design. Suggestions for better measurement and tests that are more inclusive. This Handbook is an essential reference for researchers, practitioners, and graduate students in education and allied disciplines, including child and school psychology, social work, special education, learning and measurement, and education policy.

The Common Core State Standards, which have been adopted in most states in the country, delineate the skills and knowledge that students are expected to possess at each grade level (K-12) in order to be college and career ready (CCR) by the time they graduate high school. They are designed to ensure that ALL American students—including students with disabilities-- receive a high quality education that positions them for lifelong success. In IEPs & CCSS: Specially Designed Instructional Strategies, author Toby Karten presents a variety of specially designed instructional strategies and interventions that teachers and IEP team members can use to connect the individualized education programs (IEPs) of students with disabilities to the Common Core State Standards (CCSS). This six-page (tri-fold) laminated guide offers a side-by-side outline of the required components of an IEP and the criteria for instruction according to the CCSS. Karten explains that when developing a student's IEP, the IEP team should include both individualized goals (the behaviors/skills/tasks the student is expected to learn) and the grade level standards of the CCSS. The guide offers examples of accommodations and instructional supports to include in a student's IEP to help him/her meet IEP goals as well as math and literacy standards. Specially designed instruction may include (among other things) \* the involvement of additional service providers \* instructional strategies based on universal design for learning (UDL) principles \* assistive technology devices and services \* incorporating the students interests and strengths Five scenarios are provided to demonstrate a variety of ways instruction can be individualized for students with specific classifications, strengths and interests. The guide also outlines a step-by-step approach for helping students with IEPs achieve the standards. Additional online and print resources are also included, making this guide a valuable quick reference tool for IEP team members.

Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due, in part, to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners—those who work directly with children and their families in shaping the policies that affect the education of young children.

800+ Measurable IEP Goals and Objectives for use in K - 12 and in Home School Settings consists of a collection of more than 800 SMART Goals that can be used in Home Schooling settings, General Education settings, or Special Education settings to address learning needs in the following areas of development: Academic. Personal and Social well-being. Communication. Independence. Problem Solving. Work Habits. Safety. Transition. Sensory. Motor Skills. Physical Health. Medical Care. Personal Care. All of these SMART Goals have been approved and have been used in actual teaching situations in general and special education. These SMART Goals can be used as is, but better is it to revise the selected SMART Goals to accurately fit with the Current level of Performance of the student. Most of the SMART Goals are written using the formula below. In some cases, a slightly different format was used. " Time - Student - Support - Skill - Accuracy and Measurement, Documentation." (Example) By June 2015, Student X will independently choose a SMART Goal from this database 100% of time, as documented in the trial logs. This collection of SMART Goals will help educators and home schools jump-start the creation of an Individual Education Plan or a Personal Program Plan. For students receiving Tier 2 interventions in a Response to Intervention Model, these goals can be used as Short-Term Objectives to guide educational programming.
