The story that I thought was my life didn't start on the day I was born Amal Shahid has always been an artist and a poet. But even in a diverse art school, because of a biased system he's seen as disruptive and unmotivated. Then, one fateful night, an altercation in a gentrifying neighborhood escalates into tragedy. "Boys just being boys" turns out to be true only when those boys are white. The story that I think will be my life starts today Suddenly, at just sixteen years old, Amal is convicted of a crime he didn't commit and sent to prison. Despair and rage almost sink him until he turns to the refuge of his words, his art. This never should have been his story. But can he change it? With spellbinding lyricism, award-winning author Ibi Zoboi and prison reform activist Yusef Salaam tell a moving and deeply profound story about how one boy is able to maintain his humanity and fight for the truth in a system designed to strip him of both.

Now a major film, starring George Clooney, Ewan McGregor, and Jeff Bridges, this New York Times bestseller is a disturbing and often hilarious look at the U.S. military's long flirtation with the paranormal—and the psy-op soldiers that are still fighting the battle. Bizarre military history: In 1979, a crack commando unit was established by the most gifted minds within the U.S. Army. Defying all known laws of physics and accepted military practice, they believed that a soldier could adopt the cloak of invisibility, pass cleanly through walls, and—perhaps most chillingly—kill goats just by staring at them. They were the First Earth Battalion, entrusted with defending America from all known adversaries. And they really weren't joking. What's more, they're back—and they're fighting the War on Terror. An uproarious exploration of American military paranoia: With investigations ranging from the mysterious "Goat Lab," to Uri Geller's covert psychic work with the CIA, to the increasingly bizarre role played by a succession of U.S. presidents, this might just be the funniest, most unsettling book you will ever read—if only because it is all true and is still happening today.

From The New Yorker's fiercely original, Pulitzer Prize-winning culture critic, a provocative collection of new and previously published essays arguing that we are what we watch. "Emily Nussbaum is the perfect critic—smart, engaging, funny, generous, and insightful."—David Grann, author of *Killers of the Flower Moon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR • Chicago Tribune • Esquire • Library Journal • Kirkus Reviews From her creation of the "Approval Matrix" in *New York* magazine in 2004 to her Pulitzer Prize-winning columns for *The New Yorker*, Emily Nussbaum has argued for a new way of looking at TV. In this collection, including two never-before-published essays, Nussbaum writes about her passion for television, beginning with *Buffy the Vampire Slayer*, the show that set her on a fresh intellectual path. She explores the rise of the female screw-up, how fans warp the

shows they love, the messy power of sexual violence on TV, and the year that jokes helped elect a reality-television president. There are three big profiles of television showrunners—Kenya Barris, Jenji Kohan, and Ryan Murphy—as well as examinations of the legacies of Norman Lear and Joan Rivers. The book also includes a major new essay written during the year of MeToo, wrestling with the question of what to do when the artist you love is a monster. More than a collection of reviews, the book makes a case for toppling the status anxiety that has long haunted the "idiot box," even as it transformed. Through it all, Nussbaum recounts her fervent search, over fifteen years, for a new kind of criticism, one that resists the false hierarchy that elevates one kind of culture (violent, dramatic, gritty) over another (joyful, funny, stylized). *I Like to Watch* traces her own struggle to punch through stifling notions of "prestige television," searching for a more expansive, more embracing vision of artistic ambition—one that acknowledges many types of beauty and complexity and opens to more varied voices. It's a book that celebrates television as television, even as each year warps the definition of just what that might mean. FINALIST FOR THE PEN/DIAMONSTEIN-SPIELVOGEL AWARD FOR THE ART OF THE ESSAY "This collection, including some powerful new work, proves once and for all that there's no better American critic of anything than Emily Nussbaum. But *I Like to Watch* turns out to be even greater than the sum of its brilliant parts—it's the most incisive, intimate, entertaining, authoritative guide to the shows of this golden television age."—Kurt Andersen, author of *Fantasyland* "Reading Emily Nussbaum makes us smarter not just about what we watch, but about how we live, what we love, and who we are. *I Like to Watch* is a joy."—Rebecca Traister

Hard-hitting divorce lawyer James J. Sexton shares his insights and wisdom to help you reverse-engineer a healthy, fulfilling romantic relationship with *How to Stay in Love*. With two decades on the front lines of divorce Sexton has seen what makes formerly happy couples fall out of love and "lose the plot" of the story they were writing together. Now he reveals all of the "what-not-to-dos" for couples who want to build—and consistently work to preserve—a lasting, loving relationship. Sexton tells the unvarnished truth about love and marriage, diving straight into the most common issues that often arise from simple communication problems and relationships that develop by "default" instead of design. Though he deals constantly with the heartbreak of others, he still believes in romance and the transformative power of love. This book is his opportunity to use what he has learned from the mistakes of his clients to help individuals and couples find and preserve lasting connection. Previously published as *If You're In My Office, It's Already Too Late*.

Instant New York Times Bestseller MSNBC legal commentator Elie Mystal thinks that Republicans are wrong about the law almost all of the time. Now, instead of talking about this on cable news, Mystal explains why in his first book. "After reading *Allow Me to Retort*, I want Elie Mystal to explain everything I don't understand—quantum astrophysics, the infield fly rule, why people think Bob Dylan is a good singer . . ." —Michael Harriot, *The Root* *Allow Me to Retort* is an easily digestible argument about what rights we have, what rights Republicans are trying to take away, and how to stop them. Mystal explains how to protect the rights of women and people of color instead of cowering to the absolutism of gun owners and bigots. He explains the legal way to stop everything from police brutality to political gerrymandering, just by changing a few judges and justices. He strips out all of the fancy jargon conservatives like to hide behind and lays bare the truth of their project to keep America forever tethered to its slaveholding past. Mystal brings his trademark humor, expertise, and rhetorical flair to explain concepts like substantive due process and the right

for the LGBTQ community to buy a cake, and to arm readers with the knowledge to defend themselves against conservatives who want everybody to live under the yoke of eighteenth-century white men. The same tactics Mystal uses to defend the idea of a fair and equal society on MSNBC and CNN are in this book, for anybody who wants to deploy them on social media. You don't need to be a legal scholar to understand your own rights. You don't need to accept the "whites only" theory of equality pushed by conservative judges. You can read this book to understand that the Constitution is trash, but doesn't have to be.

This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan—and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption—2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005 "U.S. Dietary Guidelines for Americans." The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat—about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, *Hacking Chinese*, where I write regularly about how to learn Mandarin.
