This guidebook describes the Way of St Francis a 550km month-long pilgrimage trail from Florence through Assisi to

Rome. Split into 28 day stages, the walk begins in Florence and finishes in the Vatican City. Stages range from 8km to 30km with plenty to see, including ancient ruins, picturesque towns, national treasures, and stunning churches. This comprehensive guidebook fits in a jacket pocket or rucksack, and contains information on everything from accommodation and transport in Italy, to securing your credential (pilgrim identity card), budgeting, what to take, and where to do laundry. Stories of Francis of Assisi's life are also included. Although the route includes climbs and descents of up to 1200m, no special equipment is required - although your hiking boots and socks definitely need to get along. Following the steps of heroes, conquerors and

saints on this pilgrim trail is manageable all year round, but is best done from April to June and mid-August to October. Route maps are given for every stage, and basic Italian phrases are included in the guidebook.

This book approaches the tourism and hospitality industry from a regional science perspective. By analyzing the spatial context of tourist travels, the hospitality sector, and the regional impacts of tourist activities, it demonstrates the value of the regional science paradigm for understanding the dynamics and effects of tourism and hospitality-related phenomena. Written by leading regional science scholars from various countries as well as professionals from organizations such as OECD and AirBnB, the contributions address topics such as migration, new types of accommodation, segmentation of tourism demand, and the potential use of tracking technologies in tourism

research. The content is divided into five parts, the first of which analyzes spatial effects on the development of firms in the tourism industry, while the second approaches temporal and spatial variability in tourism through analytical regional science tools. The broader economic and social impacts of tourism are addressed in part three. Part four assesses specific tourism segments and tourist behaviors, while part five discusses environmental aspects and tourism destination policies. The book will appeal to scholars of regional and spatial science and tourism, as well as tourism specialists and policymakers interested in developing science and evidence-based tourism policies.
