In *Will They Escape?*, Daniel Huiet reveals the teamwork lessons he has decoded from behind the scenes of his escape room business. Covering

observations ranging from the classic differences such as age and gender, all the way down to the small words people use that create a big impact. But it is not only how the teams functioned as a whole, but how the individual affected the group with their attitude: the superstars who went unnoticed, know-it-alls, an interesting first date, and even a ghost! Huiet analyzed thousands of people and the methods they used to work through his escape rooms and noticed the behaviors of teams that succeeded and the patterns of teams that collapsed. How people used words or what actions they took could either uplift a group to success or tear the group down. Under pressure, even the most trained among us can burst like a frozen pipe and the people you least expect can rise to the occasion and win in record-breaking fashion. Light-hearted tales interspersed with lessons, this unique perspective on human interaction and cooperation is an insight into how each individual action leads to escape...or failure.

The prom has been a fixture in the life of American teenagers for as long as high schools have existed. Both encapsulating and magnifying the drama of adolescence, proms have been transformed from modest tea dances to costly extravaganzas supporting apparel and cosmetic makers, limousine services, hotels, magazine publishers, and hair salons. Focusing on social and economic trends, this volume examines the evolution of the prom, the development of the billion-dollar prom industry, and the event's place in popular culture, including its portrayal in film, television, and literature. Using the prom as a lens through which to view many aspects of American culture--money, sex, fashion, dance, music, television, transportation, communication, and even war--this work offers a fresh perspective on the history of American youth. Do you really need a ten-step skincare regimen? Is that \$100 eye cream worth it? And what the heck are "actives" anyway? In this book two professional chemists and beauty industry insiders tell all. Depending on who you listen to, the secret to beautiful skin is microbiomes. Or Korean rice water. Or maybe a dermaplaning tool. It feels like you need a degree in chemistry to even understand what these products are, and if they live up to the hype. Luckily, Victoria Fu and Gloria Lu, professional skincare chemists have done that work so you don't have to. The science may seem complicated, but this book will show you how simple it can be, giving you what you need to make informed decisions about your skin (and your wallet). Skincare Actives? Technically, cat sneezes could count. SPF? Yep, super important. Caffeine serums? The science is still out. CBD additives? Not enough studies yet, so the jury's still out. The authors are the creators behind the popular Chemist Confessions Instagram, and this book brings the sass, humor, and solid information they're known for. Additional chapters address the best ingredients for every skin type, and reveal the only four products you really need.
