For student research, this reference highlights the importance of Asian Americans in U.S. history, the impact of specific individuals, and this ethnic group as a whole across time; documenting evolving policies, issues, and feelings concerning this particular American population. *Asian American History Day by Day: A Reference Guide to Events* provides a uniquely interesting way to learn about events in Asian American history that span several hundred years (and the contributions of Asian Americans to U.S. culture in that time). The book is organized in the form of a calendar, with each day of the year corresponding with an entry about an important event, person, or innovation that span several hundred years of Asian American history and references to books and websites that can provide more information about that event. Readers will also have access to primary source document excerpts that accompany the daily entries and serve as additional resources that help bring history to life. With this guide in hand, teachers will be able to

more easily incorporate Asian American history into their classes, and students will find the book an easy-to-use guide to the Asian American past and an ideal "jumping-off point" for more targeted research.

The New York Yankees were the strongest team in the majors from 1948 through 1960, capturing the American League Pennant 10 times and winning seven World Championships. The average fan, when asked who made the team so dominant, will mention Joe DiMaggio, Yogi Berra, Whitey Ford or Mickey Mantle. Some will insist manager Casey Stengel was the key. But pundits at the time, and respected historians today, consider the shy, often taciturn George Martin Weiss the real genius behind the Yankees' success. Weiss loved baseball but lacked the ability to play. He made up for it with the savvy to run a team better than his competitors. He spent more than 50 years in the game, including nearly 30 with the Yankees. Before becoming their general manager, he created their superlative farm system that supplied the club with talented players. When the Yankees retired him at 67, the newly franchised New York Mets immediately hired him to build their team. This book is the first definitive biography of Weiss, a Hall of Famer hailed for

contributing "as much to baseball as any man the game could ever know."

**Historical Sketches** Encyclopaedia Britannica This eleventh edition was developed during the encyclopaedia's transition from a British to an American publication. Some of its articles were written by the best-known scholars of the time and it is considered to be a landmark encyclopaedia for scholarship and literary style. **Asian American History Day by Day** Sh!t happens. Every day. Mae West was sent to jail for “corrupting the morals of youth” with her first Broadway play. When participation in the Hitler Youth became mandatory in Germany, groups of teen “pirates” rebelled. Muhammad Ali refused to “drop bombs and bullets on brown people” in Vietnam. A dog sled relay carried life-saving medicine 674 miles through -50 temperatures to rescue children dying from diphtheria. The Dionne Quintuplets were stolen by the Canadian government and displayed like zoo animals for profit. Indian princess Noor Inayat Khan was one of the most successful spies against the Nazis in World War II. A children's television show called *Caillou* tortured parents for more than a decade . . . Sh!t goes down every single day of the year, year after year. Sometimes it's a battle that changes the course of history, other times it's a life-saving medical advancement. Bravery is counter-balanced with cowardice. There is slavery and there is self-sacrifice. History is replete with deeds both noble and despicable. Some were motivated by greed, others generosity. Many dedicated themselves to the art of killing, while others focused their efforts on curing. There have been grave mistakes and moments of greatness. Confrontation and cooperation. Early in the twentieth century Spanish philosopher George Santayana wrote, “Those who cannot remember the past are condemned to repeat it.” But history serves not just as a warning; it also offers encouragement. Humanity is not endless suck. There is inspiration to be found amidst the atrocities. On *This Day in History Sh!t Went Down* will significantly expand your knowledge of world history in the most hilarious and profane way possible.

A revealing biography of Lady Bird Johnson exposes startling insights into her marriage to Lyndon Baines Johnson—and her unexpectedly strong impact on his presidency. Long obscured by her husband's shadow, Claudia “Lady Bird” Johnson emerges in this first comprehensive biography as a figure of surprising influence and the centering force for LBJ, a man who suffered from extreme mood swings and desperately needed someone to help control his darker impulses. Expertly researched and written, *Lady Bird* draws from rare conversations with the former First Lady and from interviews with key members of Johnson's inner circle of friends, family, and advisers. With chapters such as “Motherless Child,” “A Ten-Week Affair,” and “LBJ's Midlife Crisis,” *Lady Bird* sheds light on Mrs. Johnson's childhood, on her amazing acumen as a businesswoman, and on the central role she played in her husband's life and political career. A vital link to the Kennedys during LBJ's uneasy tenure as vice president and a voice of conscience on civil rights, Jan Jarboe Russell reveals *Lady Bird* as a political force. In this intimate portrait, Russell shows us the private *Lady Bird*—not only a passionate conservationist but a remarkable woman who greatly influenced her husband, his administration, and the country.

BLURB Kenneth Whiting was well-known in the Navy of his day. During his early years after graduating from the Naval Academy, he commanded several early submarines and was known as the first man to escape from a downed submarine. After being trained to fly by Orville Wright, he was the first naval officer to conceptualize a ship that was to become the most important in the US Navy--the aircraft carrier. After submitting his first three unsuccessful proposals to build such a ship, his creativity and aggressiveness were recognized at the start of World War I when he was asked to lead the Navy's First Aeronautical Detachment to France. The FAD was the first American unit to travel to Europe, and within a few months, he negotiated a plan with the French Navy for a system to build naval air stations and train his men in anti-submarine warfare from the air. When the US Navy Department approved the plan, he was transferred to the command of NAS Killingholme on England's North Sea Coast. He built Killingholme into the largest naval air station in Britain. Returning to the US at the end of the war, he found the Navy Department much more willing to talk about building aircraft carriers. Upon the approval of this new ship type, he was placed in charge of converting or building the first six. Along the way, he developed the new systems for the operation of launching and landing aircraft on the new flat flight decks. For his developmental work with the first six carriers and commanding two of them, he is frequently called the Father of the Aircraft Carrier in books and publications about the ship, which was to take the place of the battleship as the king of the seas. Along the way, naval aviation took advantage of his ability to effectively and smoothly advocate for many of the then-fledgling naval aviation's important goals in the public arena. Because he had publicly spearheaded much of those goals, the battleship admirals who ran the Navy of that era were able to take revenge on him and prevent him from being promoted to admiral rank. His tragic death in the middle of World War II became part of the reason his name has been largely forgotten outside the Navy, but naval aviators know him because the field where they are all trained, Whiting Field NAS in Pensacola, is named for him. The military exploits of this American sailor are worth recounting, but the victories of Whiting and his family racing yachts on Long Island Sound make him even more interesting. The goal of this first biography of Kenneth Whiting is to enable those who empower one of today's most important functions--naval aviation--and the Americans who have benefitted from Whiting's work, to remember this hero of naval aviation and submarines.

The contribution of Black men and women throughout the history of California is often overlooked because it doesn't easily fit into the established narrative. In Los Angeles, over half of the original settlers were of African descent. These settlers left New Spain for the northern frontier to escape the oppression of the Spanish caste system, just as the racially oppressive Jim Crow laws propelled a similar migration from the American South 150 years later. Pioneers and politicians, as well as entrepreneurs and educators, left an indelible mark on the region's history. Robert Lee Johnson offers the story of a few of the notable Black men and women who came to Southern California seeking opportunity and a better life for their families.

**First Vision** Amer Folklife Center

This is the biography of a contested memory, how it was born, grew, changed the world, and was changed by it. It's the story of the story of how the Church of Jesus Christ of Latter-day Saints began. Joseph Smith, the church's founder, remembered that his first audible prayer, uttered inspring of 1820 when he was about fourteen, was answered with a vision of heavenly beings. Appearing to the boy in the woods near his parents' home in western New York State, they told Smith that he was forgiven and warned him that Christianity had gone astray. Smith created a rich and controversial historical record by narrating and documenting this event repeatedly. In *First Vision*, Steven Harper shows how Latter-day Saints (beginning with Joseph Smith) and others have remembered this experience and rendered it meaningful. When and why and how did JosephSmith's first vision, as saints know the event, become their seminal story? What challenges did it face along the way? What changes did it undergo as a result? Can it possibly hold its privileged position against the tides of doubt and disbelief, memory studies, and source criticism - all in the information age? Steven Harper tells the story of how Latter-day Saints forgot and then remembered accounts of Smith's experience and how Smith's 1838 account was redacted and canonized. He explores the dissonance many saints experienced after discovering multiple accounts of Smith's experience. Hedescribes how, for many, the dissonance has been resolved by a reshaped collective memory.
