### **FCC Record**

Oxford  
University  
Press  
The traditional  
documentary  
programming  
of network  
television's  
bygone era  
has given way  
to the recent

explosion of  
ratings-driven,  
personality-  
based news  
magazine  
programming.

While  
ostensibly  
conforming to  
a high  
standard of  
public service,  
these  
magazines, as  
even some of  
their  
producers  
admit, must

succumb to  
the forces of  
public  
appetite and  
profit  
maximization  
in order to be  
competitive.  
This study  
examines this  
phenomenon  
of the  
electronic  
magazine and  
shows how the  
soft news  
programs  
affect the

public's view of American politics and culture. Maintaining the distinction between the syndicated, tabloid-style programming (whose survival depends almost entirely on rating success) and the more responsibly conceived network magazine programming, Spragens provides a thorough content analysis of 60 Minutes, Dateline NBC, 20/20, and similar

network series. His study traces the development of the television magazine genre from the original 60 Minutes through the current crop of news programs; it tracks the soft/hard or sensational/serious content dichotomy and its relation to ratings; and it draws conclusions about the trends in soft news programming and their impact on the American

public. **Public Television** Praeger Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. **Popular Science** Rowman & Littlefield
