 There are so many different types of families, and THE FAMILY BOOK celebrates them all in a funny, silly, and reassuring way. Todd Parr includes adopted families, step-families, one-parent families, and families with two parents of the same sex, as well as the traditional nuclear family. His quirky humor and bright, childlike illustrations will make children feel good about their families. Parents and teachers can use this book to encourage children to talk about their families and the different kinds of families that exist.

This practical book provides pre- and inservice teachers with an understanding of how math can be learned through play. The author helps teachers to recognize the mathematical learning that occurs during play, to develop strategies for mathematizing that play, and to design formal lessons that make connections between mathematics and play. Common Core State Standards are addressed throughout the text to demonstrate the ways in which play is critical to standards-based mathematics teaching, and to help teachers become more familiar with these standards. Classroom examples illustrate that, unlike most formal tasks, play offers children opportunities to solve nonroutine problems and to demonstrate a variety of mathematical ways of thinking—such as perseverance and attention to precision. This book will help put play back into the early childhood classroom where it belongs. Book Features: Makes explicit connections to play and the Common Core State Standards in Mathematics. Offers many examples of free play activities in which mathematics can be highlighted, as well as formal lessons that are inspired by play. Provides strategies for making assessments more playful, helping teachers meet increasing demands for assessment data while also reducing child stress. Includes highlight boxes with recommended resources, questions for reflection, key research findings, vocabulary, lesson plan templates, and more. “This is one of those books that I wish I had written. It is smart, readable, relevant, and authentically focused on children.” —From the Foreword by Elizabeth Graue, Sorenson Professor of Early Childhood Education, University of Wisconsin “In this deceptively easy-to-read book, Amy Parks explains two things that could make a world of difference in early childhood and elementary classrooms: Mathematics isn’t something in a workbook—it’s a fascinating part of the real world; And playing in school isn’t a luxury—it’s an essential context for learning about all sorts of things, including mathematics. Through vignettes of children learning mathematics as they play, Parks helps teachers

recognize their ‘answerability to the moment,’ eschewing someone else’s determination of ‘best practice’ in favor of what works with actual children eager to learn mathematics.” —Rebecca New, School of Education, University of North Carolina at Chapel Hill

“Perfect for reading aloud, this counting book not only contains bright bold illustrations but also has lots of . . . sound effects that children will love to replicate.” -- BOOKLIST Down by the marsh, by the sleepy, slimy marsh, one duck gets stuck in the muck . . . Can two fish, tails going swish, help? What about three moose, munching on spruce? Bright, spirited illustrations by Jane Chapman enhance this one-of-a-kind counting tale by Phyllis Root - a feast of sounds and numbers that will have listeners scrambling to join in the slippy, sloppy fun.

Catering to the first time teacher, the authors provide day to day challenges of what it means to teach young children in the classroom, while fostering a mentoring environment for pre-service teachers entering the field. Chapter 4 addresses children with special needs and commonly used modifications for each of the disabilities. A unique chapter on teaching fourth graders (chapter 10) has been included that may be covered or skipped, depending upon state requirements. Lesson planning is emphasized throughout and sample lesson plans and mini-lessons have been included for every grade level and subject area.
