End of Oblivion: The Great Deceit and Why We Need to Reclaim Our Spiritual Evolution is an informal overview of the current state of humanity and the world, and delves into how our perceptions of reality have been drastically distorted to the point where the majority of the population cannot perceive distortion any longer. Deceit is present in every area of our lives, but beneath these secular manifestations, deeper metaphysical undercurrents are interlacing with our spiritual, evolutionary direction. Armed with a wealth of factual evidence as well as personal observations, the author puts forth a compelling explanation as to who is really behind this great deceit and offers choices on how to break free for those curious enough to ponder. It is time to remove our blindfolds, to consciously choose our path, and to reclaim the true purpose of our being - our spiritual evolution. The book reflects on the Law of One material.

The first half of 'Religion and the Natural Sciences' is an introduction to the discussion of science and religion. Here the reader learns why there is any debate at all and what resources exist for responding to it. The second half deals with specific issues that arise in the individual sciences, from astronomy and physics to biology and ecology. Any project hoping to connect science and religion must supply the categories of connection, which

are found primarily, although not exclusively, in philosophy. The simplicity of the arrangement and the nature of the selections are intended to make 'Religion and the Natural Sciences' available to as wide an audience as possible, including students from the sciences and technology, the professions, the humanities and liberal studies, and theology.

Each person is living in a world of his own making, and he should speak only such words and think only such thoughts as he wishes to see manifested in his life. We must not hear, think, speak, read, or listen to limitation of any kind. There is no way under heaven whereby we can think two kinds of thoughts and get only one result; it is impossible, and the sooner we realize it the sooner we shall arrive. -from "How to Attain Strength" New Thought proponents at the turn of the 20th century sought to use mysticism to unleash the forces of the universe in themselves. In this classic Dodd, Mead & Company; New York work, the preeminent metaphysicist of the day-Ernest Holmes, founder of the Institute of Religious Science-shares his spiritual philosophy of positive thinking and his "Law of Mind in Action," which, when used to their full extent, cannot help but bring success and happiness. From his advice on "how to attract friends" to his cautionary explanation of why so many fail, Holmes takes us on what he deems "a delightful spiritual adventure."

The #1 bestselling inspirational classic from the internationally known spiritual leader; a source of solace and hope for over 4 million readers. Since its original publication in 1981, When Bad Things Happen to Good People has brought solace and hope to millions. In the preface to this edition, Rabbi Kushner relates the heartwarming responses he has received over the years from people who have found inspiration and comfort within these pages. When Harold Kushner's three-year-old son was diagnosed with a degenerative disease that meant the boy would only live until his early teens, he was faced with one of life's most difficult questions: Why, God? Years later, Rabbi Kushner wrote this straightforward, elegant contemplation of the doubts and fears that arise when tragedy strikes. In these pages, Kushner shares his wisdom as a rabbi, a parent, a reader, and a human being. Often imitated but never superseded, When Bad Things Happen to Good People is a classic that offers clear thinking and consolation in times of sorrow.

In innumerable ways, the United States of America is the political and social descendant of the Roman Republic, and the influences of Rome reverberate throughout our world. Yet while America reflects the heights of Roman structures, ideas, and principles, we also now face a host of problems similar to those that the Romans faced—immigration and citizenship, the consequences of slavery, the growing divide between classes, the conflict between conservatives and progressives, and the challenges of being a superpower. In Rome and America: The Great Republics, author Walter Signorelli chronicles and compares these two greatest and enduring republics of history, explaining how they formed, grew, and prospered. He evaluates their strengths and weaknesses, the environments from which they emerged, and the values and practices they had in common. Signorelli also explores parallels between American and Roman military history, similarities between their constitutional governments, and the legacy of Roman law in America. Last, he questions whether our democratic-republican government will disintegrate as the Roman Republic disintegrated, whether it will grow stronger despite its similarities to the Roman experience, or whether it will transform itself into another form of government akin to Rome's imperial dictatorship. More than an historical narrative or a collection of biographies, Rome and America: The Great Republics examines the political, social, economic, and moral factors that affected both nations, considering the successes and mistakes of the Romans and their implications for American society today.

For Australia the First World War remains the most costly conflict in terms of deaths and casualties. From a population of fewer than five million, 416,809 men enlisted, of which over 60,000 were killed and 156,000 wounded, gassed, or taken prisoner. In general terms with Australian unit histories the quality of authorship is very good, most of them share the common strength of making plentiful mention of the individual officers and men who served, fought, died, was wounded, or taken prisoner, or who came safely home at the end of it all. They are a prime source for genealogists and military historians.

In my experience thus far in life, I have learned that if doubt leads to questions and questions lead to answers and if answers are accepted, then doubt has been beneficial. Knowledge can guide you . . . but experience is our best teacher. Parents/guardians are the ones that teach us life from birth. No one really wants their child to be a failure in life; they only hope to love their child the best way possible. Does anyone really hope for their offspring to be lost in life? It happens in the blink of an eye, without a moment's notice, as life passes us by. I awoke one day to a very hard knock on the glass sliding door and had my life forever altered. Wait one minute there; I awoke five minutes late for work! What could possibly be the reason these people are knocking at my side door? This is a unique and fascinating book that could forever alter your life, as mine has been altered. David Deynes is uniquely qualified to help you, along with your loved ones, and all others you may come across. He will help you cope with the revolving episodes in life, bringing all of us to the state of mind required to live, and conquer almost anything we have endured or are currently battling! Taking us through some of the events in his own life, while using the experiences of that of many others, David helps us understand how determination, persistence, confirmations, and love help us in the bad times and in the good times! David states, "For the past twenty-five years and counting, I have witnessed both good and evil, in general, and have had the opportunity to choose between the good of this age or the bad. Over the last several years, I have made my choice and you will be amazed as to the reasons and experiences behind that final choice. The reasoning behind my choice, I strongly believe, contains most of the answers to all the questions about the lessons to live by in what we all call LIFE!"

The first three books of this epic sci-fi adventure series (Lands of Dust, City of Delusions, The Maker of Entropy) are now available in one volume! Millions of years from now, the planet is dying. The oceans have dried into plains of ash. Strange, lethal creatures ravage the land. The surviving pockets of humanity eke out a brutal existence. But some humans have also evolved—into Magi, men who can move objects with a mere thought, and Strigas, women who can control others' minds. In this strange and exotic setting, a powerful telepathic protector must accompany a mysterious boy to bring hope to a dying planet. Explore Dying World, a new dystopian science fiction series in the tradition of Jack Vance's The Dying Earth, Gene Wolfe's Book of the New Sun, Frank Herbert's Dune, Edgar Rice Burroughs's John Carter of Mars, and Star Wars—as only John Triptych could tell it!

In this unique book, Peter J. Stanlis, the leading Burke scholar in America, has collected all the most important works and speeches of Edmund Burke (1729-1797), British statesman, political philosopher, and founder of modern conservative thought and, with due care to preserve the beauty of Burke's prose, edited them down to their essentials. "The main purpose of these selections," Stanlis explains, "is to present extensive and in the main unbroken samples of Burke's most representative thought in his most characteristic style, on a great variety of subjects." In this major effort you can find--to name only a few topics covered--Burke's defense of ordered liberty, his advocacy of secure property rights, his love of Christianity and Europe's moral tradition, and his impassioned jeremiad against the orgy of destruction that the French Revolution became. Stanlis's general introduction gives important insight into Burke's early life, education, professional training, literary and political career, prose style, political philosophy, and more. In addition, each selection is preceded by a headnote that clarifies the selections in their historical context and includes a brief analytical interpretation. A chronology highlights important dates in Burke's life and career. In its compactness and comprehensiveness, this volume is the quintessential Burke reader. It will be of interest to historians, political scientists, and students of literature and intellectual history.

This book explores the truth behind our beliefs in God and the propensity of human beings to be religious. In an honest attempt to seek the answers to life's deepest questions, the author probes into how life began. It then progresses to investigate the nature of religions and writes that, because we refuse to accept our mortality, we delude ourselves and we coerce others, with the tyranny of our own beliefs.
