This book provides the most detailed and comprehensive examination to date of the impact of environmentalism upon contemporary political thought. It sets out to disentangle the various strands of Green political thought and explain their relationship to the major Western political traditions. Environmentalism and Political Theory represents the consolidation of a new field of political inquiry that is destined to become an increasingly important component of political studies and political reporting worldwide. An interdisciplinary study that builds bridges between environmental philosophy, ecological thought, and political inquiry, this book employs a range of new insights from environmental philosophy to outline a particular Green political perspective.

Ethics Cambridge University Press

This is the story of how an ordinary bloke from the bush became the key figure in a movement that would change the shape of our cities and bring about lasting political and legal reform. This is the

story of the house that Jack Munday built. Without the green bans movement of the 1970s, Sydney and many other cities would look very different. Pulling together an unlikely alliance of environmentalists and union players earned Jack Munday a reputation as both the 'best-known unionist and best-known conservationist in Australia'. Under his leadership, the movement fought against the slash-and-burn philosophy that almost saw The Rocks fitted out with high-rise buildings, a highway through the centre of Glebe and total development of Centennial Park. In this long-awaited book James Colman reflects on Jack's remarkable life and his ongoing legacy. Munday overturned the bulldozer mentality of the 1960s and 1970s and helped to persuade Australians everywhere to cherish and protect the heritage of special buildings, places and sites.

Secularism Open Court

America has recently re-awakened to the idea that real change is possible. Yet this present moment is just a point on a journey that extends over a century of activism and struggle - one that has been kept alive by a powerful American tradition of inspiring radical alternatives to the status quo. Protest Nation is a guide through the speeches, letters, broadsides, essays, and manifestos that form the backbone of this tradition-a much more accessible trade edition of The Radical

Reader, which was published for the academy. Here are the words - from socialists, feminists, union organizers, civil-rights workers, gay and lesbian activists, and environmentalists - that have served as beacons for millions. Their radical arguments and ideas are links in a chain reaching from the present back through decades of radical thinking and movement-building. Brief introductory essays by the editors provide a rich biographical and historical context for each selection included. Protest Nation presents the most significant and brilliant examples of radical writing, in a concise volume geared for anyone interested in reconnecting with the deep currents of American radical thinking. These range from a fiery speech by Eugene Debs, the great socialist orator; to the original Black Panther Party Platform; to Peter Singer's astonishing treatise on animal liberation, among many others.

Rethinking Peter Singer Open Road Media

Not so long ago hardly anything was said of the Lesbian Liberation Movement and the Gay Liberation Movement, indeed, the terms gay and lesbian were not even used if some other expression could be found. Today, by contrast, hardly a day passes when something important does not occur, and is carried by the major media and disseminated on more personal levels

through blogs and the social media. If anything, there is perhaps too much “news” and not enough “information.” Obviously, a book like this cannot keep up with the news, but it can do something equally important when it comes to information, by reminding us of the past and what has been going and just how fast events are moving. The Historical Dictionary of the Lesbian and Gay Liberation Movements covers the history of this movement through a cross-referenced dictionary with over 1000 entries on specific countries and regions, influential historical figures, laws that criminalized same-sex sexuality, various historical terms that have been used to refer to aspects of same-sex love, and contemporary events and legal decisions. Including a comprehensive chronology and bibliography, this book is an excellent access point for students, researchers, and anyone interested in learning more about the struggle for equality.

The Greens Princeton University Press

Using case studies from around the world, this book develops a new theory of federalism, showing that it can enhance deliberative democracy and civil society.

Who is Peter Singer?What does he say about issues like abortion, infanticide, euthanasia and animal rights? What does he say about Christianity? What exactly is his philosophy?"Peter Singer is probably the world's most famous or infamous contemporary philosopher," says Gordon Preece. Recently appointed as professor of bioethics at Princeton University's Center for Human Values, Singer is best known for his book on animal rights, *Animal Liberation*, and for his philosophical text *Practical Ethics*. But underneath his seemingly benign agenda lies perhaps the most radical challenge to Christian ethics proposed in recent times.In *Rethinking Peter Singer* four of Singer's contemporaries, fellow Australian scholars Gordon Preece, Graham Cole, Lindsay Wilson and Andrew Sloane, grapple with Singer's views respectfully but incisively. From a straightforwardly Christian perspective, they critique Singer's thought in four major areas: abortion and infanticide, euthanasia, animal rights, and Christianity.Rethinking Peter Singer is not only for those who want to understand Singer's views but also for all who want to challenge the thinking that more and more informs our society's stance on moral issues.

The Grandest Challenge Tate Publishing

Take a fresh, insightful look at the current policies of one of the nation's major political parties with *Impending Death of the Democratic Party*, and see disaster looming. New author, Ephraim Lindsey, takes the social and tax policies of the Democratic Party to their logical conclusion and finds the extreme will destroy our way of life. The most controversial issues of our day are discussed to show how the Democratic Party will destroy itself within twenty years, and how disastrously short-sighted programs may very well crumble our great nation. *Impending Death* brings new approach to the politics of our day and asks readers to consider the effects of personal politics and positions on abortion, euthanasia, Social Security and other ?hot-button? issues.

How are We to Live? State University of New York Press

George Kateb's writings have been innovatory in exploring the fundamental quandary of how modern democracy—sovereignty vested in the many—might nevertheless protect, respect, promote, even celebrate the singular, albeit ordinary individual. His essays, often leading to unexpected results, have focused on many inter-related topics: rights, representation, constitutionalism, war, evil, extinction, punishment, privacy, patriotism, and more. This book focuses in particular on his thought in three key areas: Dignity These essays exhibit the breadth and complexity of Kateb's notion of dignity and outline some implications for political theory. Rather than a solely moral approach to the theory of human rights, he elaborates a human-dignity rationale for the very worth of the human species Morality Here Kateb challenges the position that moral considerations are often too demanding to have a place in the rough-and-tumble of modern politics and political analysis. Rejecting common justifications for the propriety of punishment, he insists that state-based punishment is a perplexing moral problem that cannot be allayed by repairing to theories of state legitimacy. Individuality These essays gather some of Kateb's rejoinders and correctives to common conceptions and customary critiques of the theory of democratic individuality. He explains that Locke's hesitations and religious backtracking are instructive, perhaps as precursors for the ways in which vestigial beliefs can still cloud moral reasoning.

The Political Economy of Peacebuilding in Post-Dayton Bosnia Routledge

"[Singer's] enthusiasm becomes infectious . . . Wired for War is a book of its time: this is strategy

for the Facebook generation." —Foreign Affairs "An engrossing picture of a new class of weapon that may revolutionize future wars. . ." —Kirkus Reviews P. W. Singer explores the greatest revolution in military affairs since the atom bomb: the dawn of robotic warfare We are on the cusp of a massive shift in military technology that threatens to make real the stuff of I, Robot and The Terminator. Blending historical evidence with interviews of an amazing cast of characters, Singer shows how technology is changing not just how wars are fought, but also the politics, economics, laws, and the ethics that surround war itself. Travelling from the battlefields of Iraq and Afghanistan to modern-day "skunk works" in the midst of suburbia, *Wired for War* will tantalise a wide readership, from military buffs to policy wonks to gearheads.

A penetrating examination of the history and future of the Australian Greens The re-election of a Coalition government, after a lost decade of policy backflips and leadership volatility, has redrawn the political landscape. With a record quarter of voters abandoning the major parties at the last election, what lies ahead for the Greens, the 'third force' in Australian politics? In a nation divided over global warming, rising inequality and national security, can they agitate for forward-thinking policy, or will a refusal to compromise prove a stumbling block? Inside the Greens investigates the personalities, policies and turning points that have formed the party: from the fight to save Lake Pedder to the Stop Adani convoy; from heckling George W. Bush to the fateful decision to vote down the carbon tax; from party of protest to the balance of power in minority governments at state and federal level. It also exposes the Greens as they are today: a divided organisation reckoning with structural and strategic challenges. Beset by factional showdowns and suggestions of internal sabotage, can the party hang together? Has it strayed too far from grassroots activism? Can the Greens do politics differently and still succeed? Journalist Paddy Manning draws on previously unrevealed archival material and interviews with party friends, foes and key figures – including Bob Brown, Christine Milne, Lee Rhiannon, Adam Bandt and Richard Di Natale – to weave a compulsively readable account of where the Greens are heading, and what that means for Australia. 'A monumental effort ... Inside the Greens manages to be not just a fine resource on a single party, but of the times that produced them.' —Crikey

Environmentalism and Political Theory Scarecrow Press

For thirty years, Peter Singer's *Practical Ethics* has been the classic introduction to applied ethics.

For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

Protest Nation Routledge

This volume collects some of the leading essays in contemporary democratic theory published in the past thirty years. The anthology presents the work of a select group of contributors (including Peter Singer, Joshua Cohen, Ronald Dworkin, Richard Arneson, and others) and covers many foundational approaches defended by scholars from a range of different disciplines. The chapters address many issues that are central to philosophical reflections on democracy, such as questions pertaining to deliberative and economic approaches, as well as to such topics as intrinsic fairness, the role of equality in relation to minority groups, and the limits of democracy. Covering representative work in economics, political science, legal theory, and philosophy, this comprehensive volume is suited to courses in political theory and political philosophy.

Pete Seeger in His Own Words Princeton University Press

In a reassessment of the meaning of life and death, a noted philosopher offers a new definition for life that contrasts a world dependent on biological maintenance with one controlled by state-of-the-art medical technology.

The Impending Death of the Democratic Party University of Pittsburgh Press

One of the leading ethical thinkers of the modern age, Peter Singer has repeatedly been embroiled in controversy. Protesters in Germany closed down his lectures, mistakenly thinking he was advocating Nazi views on eugenics. Conservative publisher Steve Forbes withdrew generous

donations to Princeton after Singer was appointed professor of bioethics. His belief that infanticide is sometimes morally justified has appalled people from all walks of life. Peter Singer Under Fire gives a platform to his critics on many contentious issues. Leaders of the disability rights group Not Dead Yet attack Singer's views on disability and euthanasia. Economists criticize the effectiveness of his ideas for solving global poverty. Philosophers expose problems in Singer's theory of utilitarianism and ethicists refute his position on abortion. Singer's engaging "Intellectual Autobiography" explains how he came by his controversial views, while detailed replies to each critic reveal further surprising aspects of his unique outlook.

One World Now Psychology Press

In this ground-breaking book, a renowned bioethicist argues that the political left must radically revise its outdated view of human nature. He shows how the insights of modern evolutionary theory, particularly on the evolution of cooperation, can help the left attain its social and political goals. Singer explains why the left originally rejected Darwinian thought and why these reasons are no longer viable. He discusses how twentieth-century thinking has transformed our understanding of Darwinian evolution, showing that it is compatible with cooperation as well as competition, and that the left can draw on this modern understanding to foster cooperation for socially desirable ends. A Darwinian left, says Singer, would still be on the side of the weak, poor, and oppressed, but it would have a better understanding of what social and economic changes would really work to benefit them. It would also work toward a higher moral status for nonhuman animals and a less anthropocentric view of our dominance over nature.

Historical Dictionary of the Lesbian and Gay Liberation Movements Macmillan

With a voice as disarmingly bold, funny, and unsentimental as its author, this is a thoroughly unconventional memoir that shatters the myth of the tragic disabled life.

Speciesism, Painism and Happiness NewSouth

The central topic for this book is the ethics of treating individuals as though they are members of groups. The book raises many interesting questions, including: Why do we feel so much more strongly about discrimination on certain grounds – e.g. of race and sex – than discrimination on other grounds? Are we right to think that discrimination based on these characteristics is especially invidious? What should we think about 'rational discrimination' – 'discrimination' which is based on sound statistics? To take just one of dozens of examples from the book. Suppose a landlord turns away a prospective tenant, because this prospective tenant is of a particular ethnicity – arguing that statistics show that one in four of this group have been shown in the past to default on their rent. That seems clearly unfair to people of this ethnicity. But we are routinely being judged in this way – not just on the basis of our ethnicity, but assumptions are made about us and decisions taken about us based on our gender, religion, job, post-code, hobbies, blood-group, nationality, etc. Now suppose that another landlord turns away a convicted criminal, arguing that one in four of convicted criminals have been shown to be unreliable rent payers. Is our intuition the same as before? Should it be? This book is suitable for all students of philosophy, especially those with an interest in applied ethics.

George Kateb Oxford University Press, USA

The *Grandest Challenge* begins with a simple premise: that every person's life is of equal value, regardless of where in the world he or she lives. It also begins with an alarming fact: that in this age of spectacular scientific advances, it is still those who live in the developed world—mainly the west—who overwhelmingly benefit from our enormous new power to combat disease and enhance food, while those in the developing world are far more likely to die for lack of basic health care and inexpensive nutrition. As personalized medicine, designer drugs, and high-quality nutrients become more readily available than ever in the richest parts of the world, distinguished doctors Abdallah Daar and Peter Singer urge us to pause and ask these vital questions: Who will have access to the life-enhancing advances of biotechnology? And who are these advances ultimately meant to help? In this challenging, controversial, thought-provoking, and humane book, Daar and Singer inspire us to look more deeply at our new science, and at the revolution that is already changing all of our lives.

Princeton Readings in Political Thought Oxford University Press, USA

Richard Ryder created the term speciesism in early 1970 and shared the idea with Peter Singer, who popularised it in his classic work *Animal Liberation* (1975). A key figure in the modern animal rights revival Ryder appeared on the first-ever televised discussion of animal rights (The Lion's Share, Scottish Television) in December 1970. He further promoted the ideas around speciesism in recorded discussions with Bridget Brophy, for the Open University, and in his contribution to the

seminal philosophical work *Animals, Men and Morals* edited by the Oxford philosophers Stanley and Roslind Godlovitch and John Harris in 1971. From 1969 Ryder organised protests against animal experiments and bloodsports. He continued to promote his ideas about speciesism in leaflets and broadcasts, culminating in the publication of his *Victims of Science* in 1975 - a book that provoked

debates in Parliament and on television and was described by *The Spectator* at the time as "a morally and historically important book". Dr Ryder was elected to the RSPCA Council in 1971, first becoming Chairman in 1977. In 1980 he was founding Chairman of the Liberal Democrat Animal

Protection Group, and later ran for Parliament, was Director of the Political Animal Lobby and then Mellon Professor in the Department of Philosophy at Tulane University. Ryder coined the term *speciesism* to describe his wider moral theory in 1990. He has several times broadcast on the BBC's *Moral Maze*.
