How can managers discover, develop and implement successful business strategies for China and our global economy? Drawing on in-depth research with top executives of successful Chinese and Western companies, this book provides a road map for profitable business strategies in our interconnected economy. In the process, the authors describe and examine both Chinese and Western strategic management, their weaknesses and strengths. Starting with an analysis of the historical, cultural and legal antecedents of Chinese strategy, the authors identify potential for synergy and dominance between companies from Western, industrialized economies and Chinese companies. The book closes with recommendations on how the managements of non-Chinese companies, now pouring into China, can most effectively compete and interact with Chinese businesspersons and governments. The Chinese Tao of Business offers guidance to compete successfully against local companies and in foreign markets through: Unique insights into Chinese business strategy, including its origins and influencing factors; Insightful perspectives on the evolution of China's market and business environments; Incisive analysis of Eastern and Western strategic decision-making styles and how they differ; Cogent identification of hidden and overt threats, pitfalls and opportunities that Western companies face in China and how to plan for them; Effective direction through an Adaptive-Action Road Map (ARM) for successful business strategies in China and the global economy.

Today, digital-based economies are developing rapidly, both in the world and in Indonesia. This development raises important issues, such as online versus motorcycle taxi disputes, online retail versus offline retail issues, on-demand services, and personal data security. This book describes in detail the development of digital-based economies in Indonesia, ranging from e-commerce, financial technology, to on-demand services. To provide a more complete picture of what is happening at the global level, this book also discusses the development of digital transformation in other countries, such as Australia, the United States, the United Arab Emirates, the People's Republic of China, and India. In addition, this book also discusses the direction of digital-based technological and economic development, including projections of the types of jobs in the future. This book contributes constructive thinking in an effort to build a progressive Indonesia in the digital age, as well as being a reference material for all parties who wish to study digital-based economic transformation in Indonesia.

The SSBCI provides funding to states, territories, and eligible municipalities to expand existing or to create new state small business investment programs, including state capital access programs, collateral support programs, loan participation programs, loan guarantee programs, and venture capital programs. This book examines the SSBCI and its implementation, including Treasury's response to initial program audits conducted by the U.S. Government Accountability Office and Treasury's Office of Inspector General. These audits suggested that SSBCI participants were generally complying with the statute's requirements, but that some compliance problems existed, in that, the Treasury's oversight of the program could be improved; and performance measures were

needed to assess the program's efficacy.
