The Key to Yellow Workbook gives clear, thoroughly-explained answers to all exercises in the Yellow Workbook, one of four non-sequential workbooks in the Grammar for the Well-Trained Mind series, providing detailed, well-designed exercises in the correct use of English grammar for middle-school and high-school level students, as well as grammar aficionados of any age. The Key to Yellow Workbook gives clear, thoroughly-explained answers to all exercises in the Yellow Workbook, one of four non-sequential books in the Grammar for the Well-Trained Mind series, providing detailed, well-designed exercises in the correct use of English grammar. The Key, along with the accompanying Yellow Workbook and the Core Instructor Text, make up Grammar for the Well-Trained Mind: a complete course that takes students from basic definitions ("A noun is the name of a person, place, thing, or idea") through advanced sentence structure and analysis, all the grammar skills needed to write and speak with eloquence and confidence. This innovative program combines the three essential elements of language learning: understanding and memorizing rules (prescriptive teaching), repeated exposure to examples of how those rules are used (descriptive instruction), and practice using those rules in exercises and in writing (practical experience). Each year, parents and teachers go through the dialogue, rules, and examples in the Core Instructor Text; students follow along in the Workbook. This repetition solidifies the concepts, definitions, and examples in the student's mind. There are four Workbooks, one for each year. Each Workbook contains the same rules and examples, but four completely different sets of exercises and assignments, allowing students to develop a wide-ranging knowledge of how the rules and examples are put to use in writing. Each Key to the Workbooks provides not only answers, but also explanations for the parent/instructor, and guidance as to when the answers might be ambiguous (as, in English, they often are). All of the rules covered, along with the repeated examples for each, are assembled for ongoing reference in The Grammar Guidebook. Every step of the sentence diagramming process is gathered for reference, along with illustrations, in The Diagramming Dictionary. These will become the student's indispensable guide to writing through high school, into college and beyond. Step-by-step instruction takes students from the most basic concepts through advanced grammatical concepts such as modal and hortative verbs and multiple functions of noun clauses. Extensive diagramming exercises reinforce the rules and help technical and visual learners to understand and use the English language effectively. Each step of the diagramming process is illustrated and thoroughly explained to the student. Text for examples and exercises are drawn from great works of literature, as well as from well-written nonfiction texts in science, mathematics, and the social sciences. Regular review is built into each year of work. The Key accompanies one of four non-sequential workbooks, each containing new exercises that allow students to practice and apply the grammar principles under study.

Writing Anchors demonstrates how to create a supportive classroom, model writing experiences, and create enthusiasm for writing among students. The practical lessons explore the major elements of writing, with explicit strategies for teaching the major forms of writing: Informational writing detailed descriptions of ways to take and organize notes, use text features, and create reports that have voice; Poetry and personal writing language choice, imagery, using the senses, and finding the personal pulse of the writer; Narrative extends writing skills with lessons on story sequence, problem solving, and character development. The lessons form "metacognitive anchors" that build an understanding of the elements of powerful writing. Each lesson comes with an anchor cue card that prompts students to apply their growing understandings independently in writing workshops and in assessing their own writing. In addition, the book provides more than thirty effective tools that are ready to copy and use in the classroom writing checklists, rubrics for assessment, graphic organizers, note-taking grids, semantic maps, story maps, tips for proofing, and student examples collected from grade 27 classrooms.
