When the United States Army Air Corps, responding to pressure, opened its ranks to blacks in July 1941, it formed four fighter squadrons exclusively composed of black men. Known as the Tuskegee Airmen, these squadrons represented the total number of blacks who saw action in United States combat aviation in the Second World War. Compiling the operational and combat history of the Tuskegee Airmen, Stanley Sandler examines the history of these pioneer black units--from their early training at Tuskegee, Alabama, to aerial combat in the European theater. He reveals how the squadrons and the fighter group, disadvantaged by inexperience and intense national scrutiny, succeeded in compiling impressive combat records. Ultimately, Sandler states, the Tuskegee Airmen would lead the United States Air Force toward racial parity in the post-war era, years ahead of American society itself. Sandler draws on oral interviews, the units' official records as well as those of the Army and the Army Air Forces, and the federal government archives. He describes blacks' early noncombatant roles in the Army Air Corps--grave registration, housecleaning, supply, and transport. He details the eventual inclusion of black men in combat aviation, beginning with the 99th Pursuit Squadron, whose members were the first blacks to enter American military aviation, as well as the 332nd Fighter Group.

Bestselling author Rick Riordan presents the second book in the New York Times best-selling and award-winning Tristan Strong trilogy by Kwame Mbalia. Tristan Strong, just back from a victorious but exhausting adventure in Alke, the land of African American folk heroes and African gods, is suffering from PTSD.

But there's no rest for the weary when his grandmother is abducted by a mysterious villain out for revenge. Tristan must return to Alke--and reunite with his loud-mouthed sidekick, Gum Baby--in order to rescue Nana and stop the culprit from creating further devastation. Anansi, now a ""web developer"" in Tristan's phone, is close at hand to offer advice, and several new folk heroes will aid Tristan in his quest, but he will only succeed if he can figure out a way to sew broken souls back together.

Baseball, basketball, football — no matter the game, Jackie Robinson excelled. His talents would have easily landed another man a career in pro sports, but in America in the 1930s and '40s, such opportunities were closed to athletes like Jackie for one reason: his skin was the wrong color. Settling for playing baseball in the Negro Leagues, Jackie chafed at the inability to prove himself where it mattered most: the major leagues. Then in 1946, Branch Rickey, manager of the Brooklyn Dodgers, decided he was going to break the “rules” of segregation: he recruited Jackie Robinson. Fiercely determined, Jackie faced cruel and sometimes violent hatred and discrimination, but he proved himself again and again, exhibiting courage, restraint, and a phenomenal ability to play the game. In this compelling biography, award-winning author Doreen Rappaport chronicles the extraordinary life of Jackie Robinson and how his achievements won over — and changed — a segregated nation.

"Readers who choose the book for the attraction of Navajo code talking and the heat of battle will come away with more than they ever expected to find."—Booklist, starred review Throughout World War II, in the conflict fought against Japan, Navajo code talkers were a crucial part of the U.S. effort, sending messages back and forth in an unbreakable code that used their native language. They braved some of the heaviest fighting of the war, and with their code, they saved countless American lives. Yet their story remained classified for more than twenty years. But now Joseph Bruchac brings their stories to life for young adults through the riveting fictional tale of Ned Begay, a sixteen-year-old Navajo boy who becomes a code talker. His grueling journey is eye-opening and inspiring. This deeply affecting novel honors all of those young men, like Ned, who dared to serve, and it honors the culture and language of the Navajo Indians. An ALA Best Book for Young Adults "Nonsensational and accurate, Bruchac's tale is quietly inspiring..."—School Library Journal

Examining Tuskegee Penguin

Through veteran interviews, this illustrated history explores the contributions, experiences, and legacy of the Tuskegee Airmen from 1941–1946. What became known as the Tuskegee Experience began in 1931 with a letter from the head of the National Association for the Advancement of Colored People to the War Department asking that blacks be allowed to join the military. The efforts of early African American aviators, the struggle of organizations and individuals against the military's segregation policies, and the hard work of thousands of young men and women, military and civilian, black and white, all combined to make the Tuskegee Airmen an important but often overlooked part of America's military history. Through fascinating interviews with veterans and historical photographs, *Black Knights* tells the story of the men and women who served in the training program at Tuskegee Army Air Field from 1941 to 1946. The pilots' stories are here, but so are the experiences of the mechanics, band members, armorers, staff officers, nurses, and more who proved that they had courage and perseverance, not only in war, but in peacetime as well.

On the Pacific front during World War II, strange messages were picked up by American and Japanese forces on land and at sea. The messages were totally unintelligible to everyone except a small select group within the Marine Corps: the Navajo code talkers—a group of Navajos communicating in a code based on the Navajo language. This code, the first unbreakable one in U.S. history, was a key reason that the Allies were able to win in the Pacific. *Navajo Code Talkers* tells the story of the special group, who proved themselves to be among the bravest, most valuable, and most loyal of American soldiers during World War II.

Women run wind tunnel experiments, direct air traffic, and fabricate airplanes. American women have been involved with flight from the beginning, but until 1940, most people believed women could not fly, that Amelia Earhart was an exception to the rule. World War II changed everything. "It is on the record that women can fly as well as men," stated General Henry H. Arnold, commanding general of the Army Air Forces. The question became "Should women fly?" Deborah G. Douglas tells the story of this ongoing debate and its impact on American history. From Jackie Cochran, whose perseverance led to the formation of the Women's Army Service Pilots (WASP) during World War II to the recent achievements of Jeannie Flynn, the Air Force's first woman

fighter pilot and Eileen Collins, NASA's first woman shuttle commander, Douglas introduces a host of determined women who overcame prejudice and became military fliers, airline pilots, and air and space engineers. Not forgotten are stories of flight attendants, air traffic controllers, and mechanics. *American Women and Flight since 1940* is a revised and expanded edition of a Smithsonian National Air and Space Museum reference work. Long considered the single best reference work in the field, this new edition contains extensive new illustrations and a comprehensive bibliography.

In 1932, the U.S. Public Health Service recruited 623 African American men from Macon County, Alabama, for a study of "the effects of untreated syphilis in the Negro male." For the next 40 years -- even after the development of penicillin, the cure for syphilis -- these men were denied medical care for this potentially fatal disease. The Tuskegee Syphilis Study was exposed in 1972, and in 1975 the government settled a lawsuit but stopped short of admitting wrongdoing. In 1997, President Bill Clinton welcomed

five of the Study survivors to the White House and, on behalf of the nation, officially apologized for an experiment he described as wrongful and racist. In this book, the attorney for the men, Fred D. Gray, describes the background of the Study, the investigation and the lawsuit, the events leading up to the Presidential apology, and the ongoing efforts to see that out of this painful and tragic episode of American history comes lasting good.

Based on the New York Times bestselling book and the Academy Award-nominated movie, author Margot Lee Shetterly and Coretta Scott King Illustrator Honor Award winner Laura Freeman bring the incredibly inspiring true story of four black women who helped NASA launch men into space to picture book readers! Dorothy Vaughan, Mary Jackson, Katherine Johnson, and Christine Darden were good at math...really good. They participated in some of NASA's greatest successes, like providing the calculations for America's first journeys into space. And they did so during a time when being black and a woman limited what they could do. But they worked hard. They persisted. And they used their genius minds to change the world. In this beautifully illustrated picture book edition, we explore the story of four female African

American mathematicians at NASA, known as "colored computers," and how they overcame gender and racial barriers to succeed in a highly challenging STEM-based career. "Finally, the extraordinary lives of four African American women who helped NASA put the first men in space is available for picture book readers," proclaims Brightly in their article "18 Must-Read Picture Books of 2018." "Will inspire girls and boys alike to love math, believe in themselves, and reach for the stars."
