Literary Analysis: The Basics Red Wheel/Weiser

This systematic introduction to the concept of point of view in language explores the ways in which point of view intersects with and is shaped by ideology. It specifically focuses on the way in which speakers and writers linguistically encode their beliefs, interests and biases in a wide range of media. The book draws on an extensive array of linguistic theories and frameworks and each chapter includes a self-contained introduction to a particular topic in linguistics, allowing easy reference. The author uses examples from a variety of literary and non-literary text types such as, narrative fiction, advertisements and newspaper reports.

A Treasure of Short Stories for English Language Learners John Benjamins Publishing

Short Story Theories

Reading at Risk Taylor & Francis

The Gift of the Magi is a treasured short story written by O. Henry. A young and very much in love couple can barely afford their one-room apartment, let alone the extra expense of getting Christmas presents for one another. But each is determined to show their love for the other in this traditional time of giving; each sells a thing they hold most dear in order to afford a present, with poignant and touching results that capture their love for one another.

Language Through Literature Cornell University Press

Analysing Qualitative Data in Psychology is a clear, step-by-step guide linking theory with practice, that offers a unique combination of perspectives on five qualitative approaches: grounded theory, interpretative phenomenological analysis, discourse analysis, narrative analysis and thematic analysis that can be applied to a common data set. This text provides practical advice and guidance from experts as well as a comparison of the different methods, which will help students decide the approach that's right for them and their research project. The second edition of this text: Introduces a fifth, additional qualitative approach, Thematic Analysis Explores the ethical challenges of qualitative work Takes a look at mixed methods and pluralist research Includes worked-out examples of qualitative analyses and brand new tools for learning, including 'road maps' for qualitative analysis
Analysing Qualitative Data in Psychology, Second Edition is the perfect text for psychology students engaged in qualitative research or studying research methods, at either undergraduate or postgraduate level.

 Unlock the more straightforward side of The Crucible with this concise and insightful summary and analysis! This engaging

summary presents an analysis of The Crucible by Arthur Miller, a vivid allegory of the mass hysteria that swept through the town of Salem during the Salem Witch Trials. In spite of its historical subject matter, the play was chillingly topical at the time it was written: the 1950s were marked by McCarthyism, where accusations of Communism were rife and many Americans (including Miller himself) were hauled before the House Un-American Activities Committee to answer for their behaviour. Arthur Miller is considered one of the most influential dramatists of the 20th century, and The Crucible was one of his best-known plays. It remains popular today, and new productions of the play are frequently performed. Find out everything you need to know about The Crucible in a fraction of the time! This in-depth and informative reading guide brings you: • A complete plot summary • Character studies • Key themes and symbols • Questions for further reflection Why choose BrightSummaries.com? Available in print and digital format, our publications are designed to accompany you on your reading journey. The clear and concise style makes for easy understanding, providing the perfect opportunity to improve your literary knowledge in no time. See the very best of literature in a whole new light with BrightSummaries.com!

The Gift of the Magi Writer's Digest Books

Inspired by Poe's own tragic life, the short story clearly presages Freud's method of psychoanalysis. In a very Fight-club-like plot and situations, "William Wilson" is a journey within the mind. Some sixty years prior to Freud's clinical work and theoretical developments, Poe's story is an example of the rise of the psychological genre in literature. A fruitful, and at the same time paranoid, the theme of the doppelganger runs strong in Edgar Allan Poe's fiction. From "The Fall of the House of Usher" to "Morella" and "Ligeia", Poe's characters are constantly harassed by conscious entities that mirror the chaos within the protagonists' unconscious. The influence of "William Wilson" can be felt in the proliferation of contemporary movies exploring the idea of the double, such as Hitchcock's "Vertigo" (1958), Basil Dearden's "The Man Who Haunted Himself" (1970) or Darren Aronofsky's "Black Swan" (2010). Edgar Allan Poe (1809-1849) was an American poet, author, and literary critic. Most famous for his poetry, short stories, and tales of the supernatural, mysterious, and macabre, he is also regarded as the inventor of the detective genre and a contributor to the emergence of science fiction, dark romanticism, and weird fiction. His most famous works include "The Raven" (1945), "The Black Cat" (1943), and "The Gold-Bug" (1843).

Publisher Description

Corpus Stylistics Waveland Press

Traditional policy analysis approaches are characterized by a

focus on system modeling and choosing among policy alternatives. While successful in many cases, this approach has been increasingly criticized for being technocratic and ignoring the behavioral and political dimensions of most policy processes. In recent decades, increased awareness of the multi-actor, multiple perspective, and poly-centric character of many policy processes has led to the development of a variety of different perspectives on the styles and roles of policy analysis, and to new analytical tools and approaches – for example, argumentative approaches, participative policy analysis, and negotiation support. As a result, the field has become multi-faceted and somewhat fragmented. Public Policy Analysis: New Developments acknowledges the variety of approaches and provides a synthesis of the traditional and new approaches to policy analysis. It provides an overview and typology of different types of policy analytic activities, characterizing them according to differences in character and leading values, and linking them to a variety of theoretical notions on policymaking. Thereby, it provides assistance to both end users and analysts in choosing an appropriate approach given a specific policy situation. By broadening the traditional approach and methods to include the analysis of actors and actor networks related to the policy issue at hand, it deepens the state of the art in certain areas. While the main focus of the book is on the cognitive dimensions of policy analysis, it also links the policy analysis process to the policymaking process, showing how to identify and involve all relevant stakeholders in the process, and how to create favorable conditions for use of the results of policy analytic efforts by the policy actors. The book has as its major objective to describe the state-of-the-art and the latest developments in ex-ante policy analysis. It is divided into two parts. Part I explores and structures policy analysis developments, the development and description of approaches to diagnose policy situations, design policy analytic efforts, and policy process conditions. Part II focuses on recent developments regarding models and modeling for policy analysis, placing modeling approaches in the context of the variety of conditions and approaches elaborated in Part I.

Fiction as Research Practice Beacon Press

"The Man of the Crowd" is a story that deals with the influence of the big city upon the ordinary person. Obsessed with categorization, the protagonist feels baffled by his inability to piece together the situation in front of him. Moving from a state of contemplation and categorization, to a heightened state of mental pressure and desire to prove even further, Poe's protagonist embarks on a journey through London darkest streets and godforsaken slums. The story is a perfect example of what happens when our rational thoughts are replaced by the delirious and altered perceptions of the world that lies beyond the ordinary one. Edgar Allan Poe (1809-1849) was an American poet, author,

and literary critic. Most famous for his poetry, short stories, and tales of the supernatural, mysterious, and macabre, he is also regarded as the inventor of the detective genre and a contributor to the emergence of science fiction, dark romanticism, and weird fiction. His most famous works include "The Raven" (1945), "The Black Cat" (1943), and "The Gold-Bug" (1843).

Paul's Case BRILL

Short Story Theories: A Twenty-First-Century Perspective problematizes different aspects of the renewal and development of the short story. The aim of this collection is to explore the most recent theoretical issues raised by the short story as a genre and to offer theoretical and practical perspectives on the form. Centering as it does on specific authors and on the wider implications of short story poetics, this collection presents a new series of essays that both reinterpret canonical writers of the genre and advance new critical insights on the most recent trends and contemporary authors. Theorizations about genre reflect on different aspects of the short story from a multiplicity of perspectives and take the form of historical and aesthetic considerations, gender-centered accounts, and examinations that attend to reader-response theory, cognitive patterns, sociolinguistics, discourse analysis, postcolonial studies, postmodern techniques, and contemporary uses of minimalist forms. Looking ahead, this collection traces the evolution of the short story from Chaucer through the Romantic writings of Poe to the postmodern developments and into the twenty-first century. This volume will prove of interest to scholars and graduate students working in the fields of the short story and of literature in general. In addition, the readability and analytical transparency of these essays make them accessible to a more general readership interested in fiction.

The Setting Sun and the Rolling World SAGE

This book constitutes selected revised papers of the 14th International Conference, NooJ 2020, held Zagreb, Croatia, in June 2020. Due to the COVID-19 pandemic the conference was held online. NooJ is a linguistic development environment that allows linguists to formalize several levels of linguistic phenomena. NooJ provides linguists with tools to develop dictionaries, regular grammars, context-free grammars, context-sensitive grammars and unrestricted grammars as well as their graphical equivalent to formalize each linguistic phenomenon. The 20 full papers presented were carefully reviewed and selected from 68 submissions. The papers are organized in the following topics: Linguistic Formalization; Digital Humanities and Teaching with NooJ; Natural Language Processing Applications.

Language and Literary Structure Routledge

Introducing Comparative Literature is a comprehensive guide to the field offering clear, concise information alongside useful analysis and examples. It frames the introduction within recent theoretical debates and shifts in the discipline whilst also addressing the history of the field and its practical application. Looking at Comparative Literature within the context of globalization, cosmopolitanism and post or transnationalism, the book also offers engagement and comparison with other visual media such as cinema and e-literature. The first four chapters address the broad theoretical issues within the field such as 'interliterary theory', decoloniality, and world literature, while the next four are more applied, looking at themes, translation, literary history and comparison with other arts. This engaging guide also contains a glossary of terms and concepts as well as a detailed guide to further reading.

Narrative Policy Analysis Routledge

This book combines stylistic analysis with corpus linguistics to

present an innovative account of the phenomenon of speech, writing and thought presentation - commonly referred to as 'speech reporting' or 'discourse presentation'. This new account is based on an extensive analysis of a quarter-of-a-million word electronic collection of written narrative texts, including both fiction and non-fiction. The book includes detailed discussions of: The construction of this corpus of late twentieth-century written British narratives taken from fiction, newspaper news reports and (auto)biographies The development of a manual annotation system for speech, writing and thought presentation and its application to the corpus. The findings of a quantitative and qualitative analysis of the forms and functions of speech, writing and thought presentation in the three genres represented in the corpus. The findings of the analysis of a range of specific phenomena, including hypothetical speech, writing and thought presentation, embedded speech, writing and thought presentation and ambiguities in speech, writing and thought presentation. Two case studies concentrating on specific texts from the corpus. Corpus Stylistics shows how stylistics, and text/discourse analysis more generally, can benefit from the use of a corpus methodology and the authors' innovative approach results in a more reliable and comprehensive categorisation of the forms of speech, writing and thought presentation than have been suggested so far. This book is essential reading for linguists interested in the areas of stylistics and corpus linguistics.

Story and Discourse Psychology Press

Moving and provocative short stories that explore the strained relations between parent and child, husband and wife, brothers, and friends, as traditional values of rural Africa clash with ambitions of urban life.

There Will Come Soft Rains Routledge

The turn to fiction as a social research practice is a natural extension of what many researchers and writers have long been doing. Patricia Leavy, a widely published qualitative researcher and a novelist, explores the overlaps and intersections between these two ways of understanding and describing human experience. She demonstrates the validity of literary experimentation to the qualitative researcher and how to incorporate these practices into research projects. Five short stories and excerpts from novellas and novels show these methods in action. This book is an essential methodological introduction for those interested in studying or practicing arts-based research.

The Mark on the Wall Lindhardt og Ringhof

Narrative Policy Analysis presents a powerful and original application of contemporary literary theory and policy analysis to many of today's most urgent public policy issues. Emery Roe demonstrates across a wide array of case studies that structuralist and poststructuralist theories of narrative are exceptionally useful in evaluating difficult policy problems, understanding their implications, and in making effective policy recommendations. Assuming no prior knowledge of literary theory, Roe introduces the theoretical concepts and terminology from literary analysis through an examination of the budget crises of national governments. With a focus on several particularly intractable issues in the areas of the environment, science, and technology, he then develops the methodology of narrative policy analysis by showing how conflicting policy "stories" often tell a more policy-relevant meta-narrative. He shows the advantage of this approach to reading and analyzing stories by examining the ways in which the views of participants unfold and are told in representative case studies involving the California Medfly crisis, toxic irrigation in the San Joaquin Valley, global warming, animal rights, the controversy over the burial remains of Native

Americans, and Third World development strategies. Presenting a bold innovation in the interdisciplinary methodology of the policy sciences, *Narrative Policy Analysis* brings the social sciences and humanities together to better address real-world problems of public policy—particularly those issues characterized by extreme uncertainty, complexity, and polarization—which, if not more effectively managed now, will plague us well into the next century.

Language, Ideology and Point of View Duke University Press

An introduction to the English language through the medium of English literature. Through the use of examples from poetry, prose and drama, this work offers a guide to the concepts and techniques in English language study. Each chapter: develops a particular topic through a series of practical tasks; provides points for further discussion; includes project work for use individually, or as part of a group; and contains a glossary of technical terms and suggestions for follow-up activities. By developing practical activities designed for the study of English language, this work goes way beyond pure linguistic description, and should be a useful aid for the beginner student of the English language. This book also contains a teacher's appendix which offers advice on the design and implementation of workshop activities on language.

The Man of the Crowd SAGE

This book represents the state of the art in cognitive stylistics a rapidly expanding field at the interface between linguistics, literary studies and cognitive science. The twelve chapters combine linguistic analysis with insights from cognitive psychology and cognitive linguistics in order to arrive at innovative accounts of a range of literary and textual phenomena. The chapters cover a variety of literary texts, periods, and genres, including poetry, fictional and non-fictional narratives, and plays. Some of the chapters provide new approaches to phenomena that have a long tradition in literary and linguistic studies (such as humour, characterisation, figurative language, and metre), others focus on phenomena that have not yet received adequate attention (such as split-selves phenomena, mind style, and spatial language). This book is relevant to students and scholars in a wide range of areas within linguistics, literary studies and cognitive science.

Literary into Cultural Studies Lindhardt og Ringhof

This is a comprehensive introduction to literary stylistics offering an accessible overview of stylistic, with activities, study questions, sample analyses, commentaries and key readings - all in the same volume.

So Long a Letter Psychology Press

"Perhaps it was the middle of January in the present that I first looked up and saw the mark on the wall." Yes, 'The Mark on the Wall' is about a woman sitting in her chair, staring at a mark on the wall, but if you think that is all it is you are in for a surprise. In a series of stream of consciousness, which Virginia Woolf mastered so well, the narrator contemplates the cause of this unknown mark, and in doing so, reveals much about both herself and the society she is a part of. Woolf's first published story, 'The Mark on the Wall' is often taught as an example of "introspective writing" and is included in several anthologies. Adeline Virginia Woolf (1882-1941) was an English writer who, despite growing up in a progressive household, was not allowed an education. When she and her sister moved in with their brothers in a rough London neighborhood, they joined the infamous The Bloomsbury Group, which debated philosophy, art and politics. Woolf's most famous novels include 'Mrs Dalloway' (1925) and 'To the Lighthouse' (1927).
