While many veterinarians choose to believe that expertise in medicine necessarily precludes having business sense, nothing could be further from the

truth. In fact, business and medicine are both evidence-based disciplines with much in common. When a patient is sick, we use standard algorithms to determine the most likely causes, and run appropriate diagnostic tests. We do the same thing with a business that is in failing health. We might run an inventory audit instead of a radiograph, or look at financial statements rather than laboratory results, but the problem-solving approach is the same. Once a medical problem is unearthed, we prescribe appropriate treatment. The same holds for businesses. A practice may not need an antibiotic injection, but an infusion of capital might be just what the doctor orders for an outdated facility. Finally, once the problem is corrected, we periodically monitor the patient with

wellness exams, assuring continued health. Businesses are no different. We continue to take their vital signs, benchmark them against established "normals" and make sure that they continue on a healthful trend. What could possibly be a more natural extension of expertise than applying the same care to practice management as patient management?

From one of this country's most thoughtful and committed leaders, this optimistic, pragmatic guide--now revised and updated to reflect the current political climate--offers a timeless practice to inspire hope for our country's future. When *A Mindful Nation* was first published, mindfulness had yet to ingrain itself into our everyday way of

life--from our inner well-being to home to work to friends to family. Yet, with the ever-increasing pace of communication, flow of information, and pervasive urge to do more, the lessons from *A Mindful Nation* are perhaps even more important today. In this new and updated edition, retitled *Healing America*, Congressman Tim Ryan shares how the timeless practice of mindfulness, the natural capabilities of our brains and minds, and the core American values of self-reliance, determination, and getting the job done can positively affect every sector of our society. Ryan connects the dots between what's happening in the classrooms, hospitals, boardrooms, research labs, and military bases across the country. He explores the most recent scientific findings that support the

beneficial effects of mindfulness and shares powerful stories from the field, showing how this simple practice is helping schoolchildren improve their ability to learn, veterans heal from trauma, and CEOs become more effective leaders. He also provides practical tips for how to incorporate mindfulness into your life today. In this world of divisive politics and contentious dialogue, the barrage of tension never seems to let up. But there are solutions that will immediately benefit both you and society as a whole--actions that you can take, right here and right now. With a direct and in-depth understanding of politics, government budgets, and what it takes to get important tasks done, Ryan combines a practical approach with a hopeful vision for how mindfulness can

help reinvigorate the American Dream. *Special Reports on Educational Subjects*

With her groundbreaking debut book, *Birthing Ourselves into Being: A Year Long Women's Empowerment Program*, author Baraka Bethany Elihu transcends the restrictions of intellectually-based therapy by offering an experiential curriculum of personal healing centered not only in doing but in being. "Many women are naturally heading towards this gentler, organic approach in personal therapeutic work. Women are ready to be simply witnessed in their own mastery. We do not need to be managed, facilitated, taught or guided," explains Baraka. "The experts live within us." *Birthing Ourselves into Being* is fully situated in the metaphor of childbirth. The book consists of twelve chapters that explore the symbolic rhythms of the

childbearing year, including pre-conception and postpartum. Offering clear, innovative, and effective steps, this creative arts-based curriculum provides readers tools to emerge with an entirely new life and stories of adventure and love to inspire the journeys of other women. "We can surrender to our process and trust that a greater peace in the world will emerge naturally, from the very belly of our personal, quiet revolutions," Baraka writes.
