 "Learn how to make over seventy macramê knots and small repeat patterns, then use them to create a wide range of projects. Each knot is shown in a close-up photograph with clear step-by-step diagrams showing how they are tied. Starting with the basics, the knots progress on to more complicated and complex designs, but as all are clearly diagramed it is very easy to follow along. This invaluable guidebook opens with a discussion of the different types of threads

or cords available, shows a range of clasps and other findings, plus covers the types of beads to use. It also includes lots of tips and useful information like how to set up your work board, and other helpful lessons like how to keep track of the cord ends for less confusion. The thirty-three projects range from simple jewelry pieces like the classic friendship bracelet and watch straps to more complex ones like a variety of bags and baskets. Translated from the Japanese, Macramê pattern book is an outstanding resource for both new and more experienced "knotters."--

An illuminating study of the complex relationship between children and media in the digital age Now, as never before, young people are surrounded by media--thanks to the sophistication and portability of the technology that puts it literally in the palms of their hands. Drawing on data and empirical research that cross many fields and continents, authors Valkenburg and Piotrowski examine the role of media in the lives of children from birth through adolescence, addressing the complex issues of how media affect the young and what adults can do to encourage responsible use in an age of selfies, Twitter, Facebook, and Instagram. This important study looks at both the sunny and the dark side of media use by today's youth, including why and how their preferences change throughout childhood, whether digital gaming is harmful or helpful, the effects of placing tablets and smartphones in the hands of toddlers, the susceptibility of young people to online advertising, the legitimacy of parental concerns about media multitasking, and more.
