Evelyn Lau's new book of poems, *A Grain of Rice*, picks up on some of the themes she covered in her last wonderful book, *Living Under Plastic*. Once again she honours people, in particular family, and the past; the presence and importance of nature in urban spaces; the influence of other writers on her life and in her career as a writer. *A Grain of Rice* includes a passionate suite of poems that pay tribute to John Updike's life and work (he is the writer who has most influenced her writing career). Many of the poems in *A Grain of Rice*, her sixth book of poetry, are haunted by the deaths of friends and family. They explore cultural history, stories in the news, travel and place—especially the relationship between home and our nomadic inclinations. In many respects the book is a meditation on loss. Grief and aging, family history, an attention to place. Poems on local urban social issues; poems that seek and find their inspiration in Asian culture and literature—all form a tapestry of faces that simultaneously defy and embrace the inevitable and celebrate the transformational. *Expanding the Canon of Early Modern Women's Writing* East African Publishers

The author describes his early years up until the age of ten, growing up on a Missouri farm and how he decided to be a writer.

Radical universalism vs postcolonial theory *The World in a Grain of Sand* offers a framework for reading literature from the global South that goes against the grain of dominant theories in cultural studies, especially, postcolonial theory. It critiques the valorization of the local in cultural theories typically accompanied by a rejection of universal categories - viewed as Eurocentric projections. But the privileging of the local usually amounts to an exercise in exoticization of the South. The book argues that the rejection of Eurocentric theories can be complemented by embracing another, richer and non-parochial form of universalism. Through readings of texts from India, Sri Lanka, Palestine and Egypt, the book shows that the fine grained engagement with culture, the mapping of ordinary lives not just as objects but subjects of their history, is embedded in much of postcolonial literature in a radical universalism - one that is rooted in local realities, but is able to unearth in them the needs, conflicts and desires that stretch across cultures and time. It is a universalism recognized by Marx and steeped in the spirit of anti-colonialism, but hostile to any whiff of exoticism.

In this layered collage of memory within memory, Hale recreates for readers her kaleidoscopic experience of a decades-long

journey to acceptance and insight. Writer, prodigal daughter, single parent, Buddhist disciple, and, late in midlife, a newlywed, she is transformed through an unconventional relationship with a female spiritual teacher and an odd ritual of repeated tattooing with her two young adult children. "Christine Hale's evocation of the bewildering complexities of life as a mother, daughter, wife (and ex-wife), and student of Buddhism is both a poem and a letter to those she has worked so long and hard to understand. On a journey that takes her through emotional and actual hurricanes, love and cruelty, urgent losses, and painful gains, she climbs to sometimes unnervingly high altitudes as she experiences "the joy and the sorrow of samsara." In beautiful, clear language, Hale explores the wounds life gives us, the wounds we give ourselves, and the long process of healing." - Sarah Stone, author of *The True Sources of the Nile* Christine Hale is the author of a novel, *Basil's Dream* (Livingston Press 2009); National Book Award finalist Joan Silber says, "Basil's Dream...seems to prove fiction can go where other forms can't." Ms. Hale's creative nonfiction has appeared in *Arts & Letters*, *Spry*, *Still*, *Hippocampus*, and *Prime Number*, among other journals. A fellow of MacDowell, Ucross, Hedgebrook, and the Virginia Center for the Creative Arts, she earned her MFA from Warren Wilson College. She teaches in the Antioch University-Los Angeles Low-Residency MFA Program as well as the Great Smokies Writing Program in Asheville, North Carolina, where she and her husband live.

During and after the Second World War, there was a concerted thinking about religion in Britain. Not only were leading international thinkers of the day theologians--Ronald Niebuhr, Paul Tillich, Jacques Maritain--but leading writers contributed to discussions about religion. Graham Greene, Muriel Spark, and Barbara Pym incorporated miracles, evil, and church-going into their novels, while Louis MacNeice, T. S. Eliot, and C. S. Lewis gave radio broadcasts about the role of Christianity in

contemporary society. Certainly the war revived interest in aspects of Christian life. Salvation and redemption were on many people's minds. The Ministry of Information used images of bombed churches to stoke patriotic fervour, and King George VI led a series of Days of National Prayer that coincided with crucial events in the Allied campaign. After the war and throughout the 1950s, approximately 1.4 million Britons converted to Roman Catholicism as a way of expressing their spiritual ambitions and solidarity with humanity on a world-wide scale. Religion provided one way for writers to answer the question, 'what is man?' It also afforded ways to think about social obligation and ethical engagement. Moreover, the mid-century turn to religion offered ways to articulate statehood, not from the perspective of nationhood and politics, but from the perspective of moral action and social improvement. Instead of being a retreat into seclusion and solitude, the mid-century turn to religion is a call to responsibility.

A leading poet from the Cultural Revolution to the present day, Duo Duo is one of China's most influential contemporary writers. He began writing in the 1970s. His poetic vision matured in Beijing in the 1980s and during his exile in the 1990s following the Tiananmen Square Massacre, finally bursting into full bloom with his return home in 2004. Responding to the Chinese political landscape with his investigations into language and an idiosyncratic take on the Zen Buddhist tradition, Duo Duo writes poetry for poets. In exacting translations by award-winning translator Lucas Klein, this career-spanning anthology features Duo Duo's entire oeuvre since his return to China, as well as a selection of his early poems, presenting nearly five decades of work from "a resolute seer of some of the most basic, universal human values" (Mai Mang, Neustadt Prize Ceremony).

This title brings together Jack Webster's two volumes of autobiography. The first part brings to life his homeland of Buchan in the north-east of Scotland. He describes in detail his childhood years in Aberdeenshire with stories of honest hard-working folk, people with often dour exteriors and a sharp, wry sense of humour twinkling beneath. From his childhood, the story moves on to the early years of his career on the "Turiff Advertiser" and his time at the "Scottish Daily Express", with tales of his travels and meeting with the famous all over the world. The second part continues his story, opening with the "roup" in Maud, the auctioning of his family farm, and going on to tell stories and anecdotes of the famous and not-so-famous inhabitants of his native Buchan - people like his great grandfather, Gavin Greig, a

scholar of international repute, and the celebrated writer, Lesi Grassic Gibbon, who tragically died at the age of 33. Whether writing of his meetings with the rich and famous, of great events, bloody murder or simply his memories of his childhood, Jack Webster displays the qualities of writing that has made him one of Scotland's best-loved journalists. He is the author of "Famous Ships of the Clyde".

[The Grain of Rice That Made a Difference](#) Bloomsbury Publishing Barack Obama, via Facebook: "A compelling story of how the transformative events of history weigh on individual lives and relationships." The Nobel Prize-nominated Kenyan writer's best-known novel, featuring an introduction by Nobel Prize winner Abdulrazak Gurnah Set in the wake of the Mau Mau rebellion and on the cusp of Kenya's independence from Britain, *A Grain of Wheat* follows a group of villagers whose lives have been transformed by the 1952-1960 Emergency. At the center of it all is the reticent Mugo, the village's chosen hero and a man haunted by a terrible secret. As we learn of the villagers' tangled histories in a narrative interwoven with myth and peppered with allusions to real-life leaders, including Jomo Kenyatta, a masterly story unfolds in which compromises are forced, friendships are betrayed, and loves are tested. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Fuchsia Dunlop trained as a chef at China's leading cooking school and is internationally renowned for her delicious recipes and brilliant writing about Chinese food. Every Grain of Rice is inspired by the healthy and vibrant home cooking of southern China, in which meat and fish are enjoyed in moderation, but vegetables play the starring role. Try your hand at blanched choy sam with sizzling oil, Hangzhou broad beans with ham, pock-marked old woman's beancurd or steamed chicken with shiitake mushrooms, or, if you've ever in need of a quick fix, Fuchsia's emergency late-night noodles. Many of the recipes require few ingredients and are startlingly easy to make. The book includes a comprehensive introduction to the key seasonings and techniques of the Chinese kitchen, as well as the 'magic ingredients' that can transform modest vegetarian ingredients into wonderful delicacies. With stunning photography and clear instructions, this is an essential volume for beginners and connoisseurs alike.

This major work by one of the world's top theologians offers a provocative and closely argued perspective on natural theology. Stanley Hauerwas shows how natural theology, divorced from a confessional doctrine of God, inevitably distorts our understanding of God's character and the world in which we live. This critically acclaimed book, winner of a Christianity Today Book Award, is now in paper. It includes a new afterword that sets the book in contemporary context and responds to critics.

Many people around the world accept the possibility of telepathy

or clairvoyance. Very rarely, however, has anyone been able to demonstrate these psychic faculties with enough accuracy and reliability to produce significant results in repeated experimentation. An exception to this was the Polish engineer and industrialist Stefan Ossowiecki. Ossowiecki (1877-1944) is perhaps the most gifted psychic ever to come under the scrutiny of researchers. He demonstrated a range and quality of clairvoyance that no one has exceeded, at least under experimental controls. Equally important, he was eager to learn more about his talent and allowed a variety of researchers to use him in experiments. Anecdotal accounts of his talent abounded, but it was the controlled observations of investigators in experiments conducted in Paris and Warsaw that confirmed his gift. For the first time, this book brings to English-speaking researchers and the public detailed accounts of the crucial experiments carried out with Ossowiecki, which produced compelling evidence of paranormal cognition.

Wilson Harris, Writing Against the Grain Oxford University Press

This exciting collection of original essays on early modern women's writing offers a range of approaches to a growing field. As a whole, the volume introduces readers to a number of writers, such as Mirabai and Liu Rushi, who are virtually invisible in Anglophone scholarship, and to writers who remain little known, such as Elizabeth Melville, Elizabeth Hatton, and Jane Sharpe. The volume also represents critical strategies designed to open up the emergent canon of early modern women's writing to new approaches, especially those that have consolidated the integration of literary and intellectual history, with an emphasis on religion, legal issues, and questions of genre. The authors expand the methodological possibilities available to approach early modern women who wrote in a diverse number of genres, from letters to poetry, autobiography and prose fiction. The sixteen essays are a major contribution to an area that has attracted the interest of a number of fields, including literary studies, history, cultural studies, and women's studies.

[With the Grain of the Universe](#) Cambridge Scholars Publishing 'Life-writing' is a generic term meant to encompass a range of writings about lives or parts of lives, or which provide materials out of which lives or parts of lives are composed. These writings include not only memoir, autobiography, biography, diaries, autobiographical fiction, and biographical fiction, but letters, writs, wills, written anecdotes, depositions, marginalia, lyric poems, scientific and historical writings, and digital forms (including blogs, tweets, Facebook entries). On Life-Writing offers a sampling of approaches to the study of life-writing, introducing readers to something of the range of forms the term encompasses, their changing fortunes and features, the notions of 'life,' 'self' and 'story' which help to explain these changing fortunes and features, recent attempts to group forms, the permeability of the boundaries between forms, the moral problems raised by life-writing in all forms, but particularly in fictional forms, and the relations between life-writing and history, life-writing and psychoanalysis, life-writing and philosophy. The essays mostly focus on individual instances rather than fields,

whether historical, theoretical or generic. Generalizations are grounded in particulars. For example, the role of the 'life-changing encounter,' a frequent trope in literary life-writing, is pondered by Hermione Lee through an account of a much-storied first meeting between the philosopher Isaiah Berlin and the Russian poet Anna Akhmatova; James Shapiro examines the history of the 'cradle to grave' life-narrative, as well as the potential distortions it breeds, by focusing on Shakespeare biography, in particular attempts to explain Shakespeare's so-called 'lost years'.

A Pollan-esque look at the truth about wheat, with surprising insights on the advantages of eating the world's most contested grain You owe it to your mind and body to step away from the gluten-free frenzy long enough to do what's best for your own personal health. Once you separate fad from fact you'll quickly discover the answer: whole grains, including wheat. Most recently, a Harvard School of Public Health long-term study that followed 117, 500 men and women over a 25-year span revealed that people who eat a whole grain-rich diet lower their risk of cardiovascular disease by 20 percent, and increase their lifespan at least 6 percent. No other food produces similar results. As for the gluten found in wheat, rye and barley—at most six out of a hundred of us have any real problem with it, and less than one percent of us, with celiac disease, cannot tolerate it in any form. So why has wheat become the new asbestos? Why are the shelves of every grocery store and supermarket in America heaped high with gluten-free products? That's what Stephen Yafa sets out to discover in *Grain of Truth*—a book drawn in part from personal experience that is as entertaining as it is informative. After hundreds of interviews with food scientists, gluten-sensitive individuals, bakers, nutritionists, gastroenterologists and others, he finds that indeed there is indeed a culprit. But it's not wheat. It's not gluten. It's the way that grain is milled and processed by large industrial manufacturers and bakeries. That discovery spurs him to search out growers, millers and bakers who deliver whole wheat to us the way it was meant to be: naturally fermented, with all parts, bran, germ, and white endosperm intact. Yafa finds a thriving local grain movement gaining strength across the country, much as the organic movement did a few decades back. And as he apprentices with local artisan bakers and make his own sourdough breads at home he learns something that few of us know: naturally fermented over two days, as opposed to four hours in commercial bakeries, whole wheat is easily digested by the vast majority of us, including many who consider themselves gluten-sensitive. The long fermentation processing method breaks down these bulky gluten proteins into tiny fragments while slowing the conversion rate of starch to sugar in our bloodstream. Along the way *Grain of Truth* challenges many common myths. Yafa shows us the science that proves a gluten-free diet doesn't lead to weight loss and that it isn't healthier in any way. He counters common assumptions that modern wheat has been genetically manipulated to contain more gluten, and he point out that despite much web chatter to the contrary, there is no GMO wheat. Those are only some of the reasons that *Grain of Truth* offers a badly needed fact-based response to anti-wheat hysteria. It also offers an ingredient in short supply these days—common sense, measured out with just enough savvy and substance to make you reconsider what's best for you—and to help you find a healthy answer in real, delicious food. For readers of *Salt Sugar Fat* and *The Omnivore's Dilemma*, *Grain of Truth* smoothly blends science, history, biology, economics, and nutrition to give us back our daily bread.
