Named a top food & drink

book of 2017 by Food Network, Wired, Sprudge, and Booklist This comprehensive but accessible handbook is for the average coffee lover who wants to make better coffee at home. Unlike other coffee books, this one focuses exclusively on coffee—not espresso—and explores multiple pour-over, immersion, and cold-brew techniques on 10 different devices. Thanks to a small but growing number of dedicated farmers, importers, roasters, and baristas, coffee quality is

at an all-time high. But for nonprofessionals, achieving café quality at home can seem out of reach. With dozens of equipment options, conflicting information on how to use that equipment, and an industry language that, at times, doesn't seem made for the rest of us, it can be difficult to know where to begin. *Craft Coffee: A Manual*, written by a coffee enthusiast for coffee enthusiasts, provides all the information readers need to discover what they like

in a cup of specialty coffee—and how to replicate the perfect cup day after day. From the science of extraction and brewing techniques to choosing equipment and deciphering coffee bags, Craft Coffee focuses on the issues—cost, time, taste, and accessibility—that home coffee brewers negotiate and shows that no matter where you are in your coffee journey, you can make a great cup at home. “Engaging and fun . . . I really can’t recommend Craft Coffee:

A Manual enough. If you’re even mildly curious about brewing coffee at home, it’s absolutely worth a read.” —BuzzFeed

 Consulting is an Art, not a Science - Design on the

other hand is beyond Art; it’s about pragmatic compromise, not perfection. Design Thinking in literal terms means thinking as a designer would. Design Thinking as a method is empirical in the sense that it is both experimental and experiential. However, like all methods, it’s not what it is but what you do with it that counts! Design Thinking is an approach to innovation that is powerful, effective and broadly accessible, which can be integrated into all

aspects of products, services, business and society. Design Thinking in Consulting is structured in three parts along the lines of Roger Martin's 'Knowledge Funnel' moving from Mystery to Heuristic to Algorithm. Part I | Consulting Overview of Consulting with a specific focus on Consulting Spectrum and Consulting Cycle for the purpose of this book - The Mystery. Part II | Design Thinking Introduction to Design Thinking, the various schools of thought, approaches,

tools and techniques analyzed and articulated as a matrix of Principles vs Practices for the purpose of this book - The Heuristic. Part III | Design Thinking in Consulting In separate chapters for each of the Consulting Phases, the above Design Thinking Principles and Practices are evaluated to be fit for purpose and further extrapolated to relevant segments of the Consulting Spectrum for the purpose of this book - The Algorithm.
