101 Labs - Book Series  
Experts agree that we

retain only 10% of what we read but 90% of what we do. Perhaps this explains why the global pass rate for most IT exams is a ghastly 40%. This is where the 101 Labs book series can help. We are revolutionizing how IT people train for their exams and the real

world with our Learn - By - Doing teaching method. 101 Labs' mission is to turn you into an IT expert by doing instead of reading. Using free software and free trials, our experts take you by the hand and walk you through every aspect of the protocols and

technologies you will encounter in your IT career. We share our configuration tips and tricks with you as well as how to avoid the common mistakes many novice engineers make, which can quickly become career-ending. 101 Labs - CompTIA Network] This book is designed to help you pass the new N10-007 exam. It now features Performance-based questions (PBQs). These questions test your configuration and troubleshooting skills and add a new level of

complexity to the exam. The only way to answer these types of questions is to have hands-on experience with the protocols and technology listed in the exam syllabus. The Network+ exam is probably the most useful exam in the IT industry. It equips you with all the necessary knowledge you need in order to work with other IT professionals and work in the IT industry. You learn TCP/IP, security, networking protocols and standards, best practices, subnetting and IP

addressing, IPv6, troubleshooting tools and software, security, wireless, routing protocol basics, and much more. CompTIA presumes around 9-12 months of on-the-job experience for all of its exams, but of course, most of the students who take the exam don't have this. Even if they are working in IT roles, such as in helpdesk or server support, they will have been exposed to only a tiny number of the skills tested in the exam. Doing all the labs in this book

will give you that experience. Please use the free resources at [www.101labs.net/resources](http://www.101labs.net/resources) which will help you with the labs. About the Author Paul Browning left behind a career in law enforcement in 2000 and started an IT consulting and training company. He's written over 15 best selling IT books and through his books, classroom courses, and websites he's trained tens of thousands of people from all walks of life. He's spent the last 16 years dedicated to training and

teaching IT students from all walks of life to pass their exams and enjoy a rewarding career. [CompTIA PenTest+ Study Guide](#) John Wiley & Sons Thoroughly revised for the new CompTIA Network+ exam, the Seventh Edition of this bestselling All-in-One Exam Guide delivers 100% coverage of the exam objectives and serves as a valuable on-the-job reference Take the latest version of the CompTIA Network+ exam with complete confidence using the fully updated information contained in

this comprehensive self-study system. The book offers clear instruction and real-world examples from training expert and bestselling author Mike Meyers along with hundreds of accurate practice questions. Fulfilling the promise of the All-in-One series, this complete reference serves both as a study tool and a valuable on-the-job reference that will serve readers beyond the exam. CompTIA Network+ Certification All-in-One Exam Guide, Seventh Edition (Exam N10-007)

also includes access to free video training and interactive hands-on labs and simulations that prepare you for difficult performance-based questions. A valuable pre-assessment test enables readers to gauge their familiarity with the test's objectives and tailor an effective course for study.

- Contains complete coverage of every objective for the CompTIA Network+ Certification exam
- Written by CompTIA training and certification guru Mike Meyers
- Electronic

content includes the Total Tester exam simulator with over 100 practice questions, over an hour of training videos, and a collection of Mike Meyers' favorite shareware and freeware networking utilities

"Pass the CompTIA Network+ (N10-007) exam with help from an expert in the field! Taught by an expert in information technology and cybersecurity with over 20 years of experience, this course is a fun way to master the fundamentals of networking. Jason has taught hundreds of

students in his bootcamps and college classes on how to pass the A+, Network+, Security+, and Certified Ethical Hacker exams. This course was recorded during a live bootcamp where 100% of those students achieved their Network+ certification, and now you can too! This course is designed to help prepare you for the CompTIA Network+ (N10-007) certification exam and covers the five domains for the Network+ (N10-007) certification exam: Network

Architecture, Network Operations, Network Security, Troubleshooting, and Industry Standards, Practices, and Network Theory. You will learn the fundamentals of network and gain experience in the configuration, management, and troubleshooting of common wired and wireless network devices. Also, we will discuss emerging technologies such as unified communications, mobile, cloud, and virtualization technologies."--Resource description page.
