#1 NEW YORK TIMES
BESTSELLER • ONE OF
ESSENCE'S 50 MOST
IMPACTFUL BLACK BOOKS
OF THE PAST 50 YEARS In
this iconic memoir of his
early days, Barack Obama

“guides us straight to the intersection of the most serious questions of identity, class, and race” (The Washington Post Book World). “Quite extraordinary.”—Toni Morrison In this lyrical, unsentimental, and compelling memoir, the son of a black African father and a white American mother searches for a workable

meaning to his life as a black American. It begins in New York, where Barack Obama learns that his father—a figure he knows more as a myth than as a man—has been killed in a car accident. This sudden death inspires an emotional odyssey—first to a small town in Kansas, from which he retraces the migration of his mother’s

family to Hawaii, and then to Kenya, where he meets the African side of his family, confronts the bitter truth of his father's life, and at last reconciles his divided inheritance. Praise for *Dreams from My Father* "Beautifully crafted . . . moving and candid . . . This book belongs on the shelf beside works like James McBride's *The Color of Water* and Gregory Howard Williams's *Life on the Color Line* as a tale of living astride America's racial categories."—Scott Turow "Provocative . . .

Persuasively describes the phenomenon of belonging to two different worlds, and thus belonging to neither."—The New York Times Book Review "Obama's writing is incisive yet forgiving. This is a book worth savoring."—Alex Kotlowitz, author of *There Are No Children Here* "One of the most powerful books of self-discovery I've ever read, all the more so for its illuminating insights into the problems not only of race, class, and color, but of culture and ethnicity. It

is also beautifully written, skillfully layered, and paced like a good novel."—Charlayne Hunter-Gault, author of *In My Place* "*Dreams from My Father* is an exquisite, sensitive study of this wonderful young author's journey into adulthood, his search for community and his place in it, his quest for an understanding of his roots, and his discovery of the poetry of human life. Perceptive and wise, this book will tell you something about yourself whether you are black or

white.”—Marian Wright Edelman

Grading is one of the most hotly debated topics in education, and grading practices themselves are largely based on tradition, instinct, or personal history or philosophy. But to be effective, grading policies and practices must be based on trustworthy research evidence. Enter this book: a review of 100-plus years of grading research that presents the broadest and most comprehensive

summary of research on grading and reporting available to date, with clear takeaways for learning and teaching. Edited by Thomas R. Guskey and Susan M. Brookhart, this indispensable guide features thoughtful, thorough dives into the research from a distinguished team of scholars, geared to a broad range of stakeholders, including teachers, school leaders, policymakers, and researchers. Each chapter addresses a different area

of grading research and describes how the major findings in that area might be leveraged to improve grading policy and practice. Ultimately, Guskey and Brookhart identify four themes emerging from the research that can guide these efforts: - Start with clear learning goals, - Focus on the feedback function of grades, - Limit the number of grade categories, and - Provide multiple grades that reflect product, process, and progress criteria. By distilling the vast body of

research evidence into meaningful, actionable findings and strategies, this book is the jump-start all stakeholders need to build a better understanding of what works—and where to go from here.

The term "reproductive politics" was coined by feminists in the 1970s to describe contemporary Roe v. Wade-era power struggles over contraception and abortion, adoption and surrogacy, and other

satellite issues. Forty years later, questions about reproductive rights are just as complex--and controversial--as they were then. Focusing mainly on the United States, *Reproductive Politics: What Everyone Needs to Know®* explores the legal, political, religious, social, ethical, and medical dimensions of this hotly contested arena. Tracing the historical roots of reproductive politics up through the present, Rickie Solinger considers a range of topics from

abortion and contraception to health care reform and assisted reproductive technologies. Solinger tackles some of the most contentious questions up for debate today, including the definition of "fetal personhood," and the roles poverty and welfare policy play in shaping reproductive rights. The answers she provides are informative, balanced, and sometimes quite surprising. Offering a wide range of information in an accessible and engaging

manner, *Reproductive Politics: What Everyone Needs to Know®* orients readers and provides the knowledge necessary to follow the debates in this important and continually evolving field. *What Everyone Needs to Know®* is a registered trademark of Oxford University Press.

"Read Fake President....This book can help us replace Trump with truth." —Gloria Steinem "Terrific new book. Fake President

 -Laurence Tribe An incisive & witty look at the cost of lies on American lives *Wrecking America* is most up-to-date look at Trump's anything-goes "Fascism 2.0" presidency and campaign. It reveals how Trump's daily "twistifications" (a Jefferson coinage) are killing tens of thousands of Americans and millions of American jobs, polluting the air and public debate, selling out his country for personal gain...and trying to "Make the Confederacy Great

Again," as he preoccupies himself with golfing, seething, and tweeting. By four-time presidential candidate Ralph Nader and bestselling author Mark Green, *Wrecking America* organizes Trump's lies and lawbreaking issue-by-issue—focusing on Covid-19 and racial protests. This scathing, witty, accessible paperback is the last up-to-date book on "the Lyin' King" keyed to General Election voters and post-election America. This November will test our

231-year experiment in self-governance like no time since 1860 and 1932. Will it be re-election or realignment? A Fascism for the few or Democracy for all? The wrecking ball of American Brownshirts or a new progressive backlash and era?

How You See Me, How You Don't W. W. Norton & Company

Americans now face a caring deficit: there are simply too many demands on people's time for us to care adequately for our children, elderly people, and ourselves. At the

same time, political involvement in the United States is at an all-time low, and although political life should help us to care better, people see caring as unsupported by public life and deem the concerns of politics as remote from their lives.

Caring Democracy argues that we need to rethink American democracy, as well as our fundamental values and commitments, from a caring perspective. The idea that production and economic life are the most important political and human concerns

ignores the reality that caring, for ourselves and others, should be the highest value that shapes how we view the economy, politics, and institutions such as schools and the family. Care is at the center of our human lives, but Tronto argues it is currently too far removed from the concerns of politics. Caring Democracy traces the reasons for this disconnection and argues for the need to make care, not economics, the central concern of

democratic political life. Joan C. Tronto is a Professor in the Political Science Department at the University of Minnesota. She is the author of *Moral Boundaries: A Political Argument for an Ethic of Care* (Routledge). *Our Declaration: A Reading of the Declaration of Independence in Defense of Equality* Princeton University Press
A “searching and emotionally intimate memoir” (The New York Times) told with a candor

never before undertaken by a sitting Justice. This “powerful defense of empathy” (The Washington Post) is destined to become a classic of self-invention and self-discovery. The first Hispanic and third woman appointed to the United States Supreme Court, Sonia Sotomayor has become an instant American icon. In this story of human triumph that “hums with hope and exhilaration” (NPR), she recounts her life from a Bronx housing project to the federal bench, a

journey that offers an inspiring testament to her own extraordinary determination and the power of believing in oneself. Here is the story of a precarious childhood, with an alcoholic father (who would die when she was nine) and a devoted but overburdened mother, and of the refuge a little girl took from the turmoil at home with her passionately spirited paternal grandmother. But it was when she was diagnosed with juvenile diabetes that the precocious Sonia

recognized she must ultimately depend on herself. She would learn to give herself the insulin shots she needed to survive and soon imagined a path to a different life. With only television characters for her professional role models, and little understanding of what was involved, she determined to become a lawyer, a dream that would sustain her on an unlikely course, from valedictorian of her high school class to the highest honors at Princeton, Yale

Law School, the New York County District Attorney's office, private practice, and appointment to the Federal District Court before the age of forty. Along the way we see how she was shaped by her invaluable mentors, a failed marriage, and the modern version of extended family she has created from cherished friends and their children. Through her still-astonished eyes, America's infinite possibilities are envisioned anew in this warm and honest book.

 Your cell phone provider tracks your location and knows who's with you. Your online and in-store purchasing patterns are recorded, and reveal if you're unemployed, sick, or pregnant. Your e-mails

and texts expose your intimate and casual friends. Google knows what you're thinking because it saves your private searches. Facebook can determine your sexual orientation without you ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we're offered. Governments use

surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But

have we given up more than we've gained? In *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit

cards, or even your car in the same way again.

[American Government in Black and White](#) Cambridge University Press Black Harvard Doctorate in Poetics launches poetry that explores modern blackness. Clint Smith's debut poetry collection, *Counting Descent*, is a coming of age story that seeks to complicate our conception of lineage and

tradition. Smith explores the cognitive dissonance that results from belonging to a community that unapologetically celebrates black humanity while living in a world that often renders blackness a caricature of fear. His poems move fluidly across personal and political histories, all the while reflecting on the social construction of our lived experiences.  According to conventional wisdom in American legal culture, the 1870s to 1920s was the age of legal formalism, when judges believed that the law was autonomous and logically ordered, and that they mechanically deduced right answers in

cases. In the 1920s and 1930s, the story continues, the legal realists discredited this view by demonstrating that the law is marked by gaps and contradictions, arguing that judges construct legal justifications to support desired outcomes. This often-repeated historical account is virtually taken for granted today, and continues to shape understandings about judging. In this groundbreaking book, esteemed legal theorist Brian Tamanaha

thoroughly debunks the formalist-realist divide. Drawing from extensive research into the writings of judges and scholars, Tamanaha shows how, over the past century and a half, jurists have regularly expressed a balanced view of judging that acknowledges the limitations of law and of judges, yet recognizes that judges can and do render rule-bound decisions. He reveals how the story about the formalist age was an invention of politically motivated critics of the

courts, and how it has led to significant misunderstandings about legal realism. Beyond the Formalist-Realist Divide traces how this false tale has distorted studies of judging by political scientists and debates among legal theorists. Recovering a balanced realism about judging, this book fundamentally rewrites legal history and offers a fresh perspective for theorists, judges, and practitioners of law. Caring Democracy One World
Since Roe v. Wade,

abortion has continued to be a divisive political issue in the United States. In contrast, it has remained primarily a medical issue in Britain and Canada despite the countries' shared heritage. Doctors and Demonstrators looks beyond simplistic cultural or religious explanations to find out why abortion politics and policies differ so dramatically in these otherwise similar countries. Drew Halfmann argues that political institutions are the key. In the United States,

federalism, judicial review, and a private health care system contributed to the public definition of abortion as an individual right rather than a medical necessity. Meanwhile, Halfmann explains, the porous structure of American political parties gave pro-choice and pro-life groups the opportunity to move the issue onto the political agenda. A groundbreaking study of the complex legal and political factors behind the evolution of abortion policy, Doctors and Demonstrators will be

vital for anyone trying to understand this contentious issue.

 Teach Living Poets opens up the flourishing world of contemporary poetry to secondary teachers, giving advice on reading contemporary poetry, discovering new poets, and inviting living poets into the classroom, as well as sharing sample lessons, writing prompts,

and ways to become an engaged member of a professional learning community. The #TeachLivingPoets approach, which has grown out of the vibrant movement and community founded by high school teacher Melissa Alter Smith and been codeveloped with poet and scholar Lindsay Illich, offers rich opportunities for students to improve critical reading and writing, opportunities for self-expression and social-emotional learning, and, perhaps the most

desirable outcome, the opportunity to fall in love with language and discover (or renew) their love of reading. The many poems included in Teach Living Poets are representative of the diverse poets writing today.

 This book shows readers how the media really works, giving a much

deeper insight and context to the uses, gratifications, and effects of media exposure as well as how media stories are framed in order to help audiences understand what it means to be a girl, boy, man, woman, white, black, etc. With chapters and research dedicated to racism, sexism, and other disparities in media, this text goes far beyond the range of traditional readers. New, innovative research studies presented in each chapter of this book have been carefully chosen to keep

topic coverage timely and research findings accessible and engaging for students and professionals in the mass media industry. It is no secret that today's media landscape is ever evolving and changing at a fast and furious pace. And although students are familiar with and may be familiar with changing media environments like social media and digital technologies, they may not understand how these media changes have affected others and exactly what these

changes mean. This book shows readers how the media really works, giving a much deeper insight and context to the uses, gratifications, and effects of media exposure as well as how media stories are framed in order to help audiences understand what it means to be a girl, boy, man, woman, white, black, etc. The Outing Princeton University Press Supreme Court Justice Antonin Scalia once remarked that the theory of an evolving, "living" Constitution effectively

"rendered the Constitution useless." He wanted a "dead Constitution," he joked, arguing it must be interpreted as the framers originally understood it. In *The Living Constitution*, leading constitutional scholar David Strauss forcefully argues against the claims of Scalia, Clarence Thomas, Robert Bork, and other "originalists," explaining in clear, jargon-free English how the Constitution can sensibly evolve, without falling into the anything-goes

flexibility caricatured by opponents. The living Constitution is not an out-of-touch liberal theory, Strauss further shows, but a mainstream tradition of American jurisprudence--a common-law approach to the Constitution, rooted in the written document but also based on precedent. Each generation has contributed precedents that guide and confine judicial rulings, yet allow us to meet the demands of today, not force us to follow the commands of the long-dead Founders. Strauss explores how

judicial decisions adapted the Constitution's text (and contradicted original intent) to produce some of our most profound accomplishments: the end of racial segregation, the expansion of women's rights, and the freedom of speech. By contrast, originalism suffers from fatal flaws: the impossibility of truly divining original intent, the difficulty of adapting eighteenth-century understandings to the modern world, and the pointlessness of chaining ourselves to decisions

made centuries ago. David Strauss is one of our leading authorities on Constitutional law--one with practical knowledge as well, having served as Assistant Solicitor General of the United States and argued eighteen cases before the United States Supreme Court. Now he offers a profound new understanding of how the Constitution can remain vital to life in the twenty-first century.

Based on Wardle and Downs' research, the first edition of Writing about Writing marked a milestone in the field of composition. By showing students how to draw on what they know in order to contribute to ongoing conversations about writing and literacy, it helped them transfer their writing-related skills from

first-year composition to other courses and contexts. Now used by tens of thousands of students, Writing about Writing presents accessible writing studies research by authors such as Mike Rose, Deborah Brandt, John Swales, and Nancy Sommers, together with popular texts by authors such as Malcolm X and Anne Lamott, and texts from student writers. Throughout the book, friendly explanations and scaffolded activities and questions help students

connect to readings and develop knowledge about writing that they can use at work, in their everyday lives, and in college. The new edition builds on this success and refines the approach to make it even more teachable. The second edition includes

more help for understanding the rhetorical situation and an exciting new chapter on multimodal composing. The print text is now integrated with e-Pages for Writing about Writing, designed to take advantage of what the

Web can do. The conversation on writing about writing continues on the authors' blog, Write On: Notes on Writing about Writing (a channel on Bedford Bits, the Bedford/St. Martin's blog for teachers of writing).
