\_\_\_\_\_ Preparing for the 11+ Pupils approaching the 11+ Examination face many challenges, including lack of time, uncertainty over what is required, and an ever-changing and secretive testing environment. Plain "mathematics" questions are progressively being replaced with more

demanding "numerical reasoning" questions. Selective schools are increasingly interested in not only rote recall of methods but also the ability to understand questions expressed in prose and skilfully apply (sometimes several) mathematical principles to arrive at an answer. The Eureka! 11+ Challenging Maths and Numerical Reasoning series of books to provide focused preparation for pupils and their busy parents. Questions are expressed in words, with the pupils learning the habit of extracting the relevant numbers and key facts. Most questions are multi-part, reflecting the trend in examinations to challenge pupils skills at progressively higher levels as the

question unfolds. These questions are the upper echelon of what is tested at 11+. Although they need only Key Stage 2 concepts, they are challenging because they require good command of multiple skills simultaneously. Pupils, and perhaps even parents, will find very few of these questions to be very easy. Thankfully, the real exam will contain many easier questions, but preparation time is best spent on those which present greater challenges and therefore more learning opportunities. When answering the questions Set yourself a target, e.g. "3 questions in half an hour" Write down clearly your steps of working in full to make checking easier Go

through the answers soon after doing the questions Do not be sad if you have made mistakes: learn from them Many questions cover areas where even strong pupils are prone to errors Watch out for the Traps described Incorporate the Tips into your methods in future See if the Method suggested is quicker or less open to error than yours For any examination, diligent practice, carefully analysing errors, mulling over methods, and developing and testing your own preferred approaches pay enormous dividends.

**1000 Logic and Reasoning Questions for Gifted and Talented Elementary School Students**

McGraw Hill Professional  
"1000 Logic and Reasoning Questions for Gifted and Talented Elementary School Students" gives 100 of the most effective tests for improving logical reasoning and problem solving skills in gifted young students. This book was written for elementary school students, with the goal of developing critical reasoning skills that will help them to excel in school and later perform well on standardized tests such as the SAT and ACT. The material in

this book includes:  
-100 logical reasoning tests with 1000 problems -a complete answer key  
Practicing with this book will result in a strong foundation in deductive reasoning, analytical thinking, and solving problems "outside the box." You will be trained to think quickly, carry out procedures without making careless errors, notice details within a short period of time, and detect inconsistencies. In addition you will be able to apply what you learn here to new situations as they arise. This book contains verbal, visual, and numerical questions involving numbers, processes, and tables. After completing the tests in this book you should

notice an increase in your level of mathematical maturity. This means you will be able to understand and communicate mathematics more effectively and with less effort. You will save yourself countless hours of frustration for many years to come.
